EDUCATION

HUSBAND-"My dear, our boy Robert graduates from the public schools very soon, you know. Have you thought what he had best do then?" Wife-"Well John, I'd like ever so much to send him to college if you

think we could afford it." HUSBAND-"I'm afraid that is out of the question, my dear. Do you know it would cost at the very least \$800 a year for him at any good college?" WIFE-"Goodness, as much as that? Of course we can't send him. But I do want to give him a good start in the world, and I don't think a public school education is enough to equip him for the battle of life."

HUSBAND-"No, it is not to-day, when education is so general Now, I've been set a thinking by an advertisement I saw in our paper the other day and that is why I brought up the subject to-night. I was reading about the Revised Encyclopedia Britannica to-day, and its really a great thing. With these books in the house, Robert will have information upon every possible subject, and it is the most reliable information in the world. What ever his natural bent is he can find proper development for it in this encyclopedia, whether its the law, mechanics, engineering, literature or any of the arts and sciences. Besides, there he will find the life stories of all the great men of the past and he will know of their efforts, their struggles and their successes, and he may have a better and more serious view of life. These books have in them all the instruction he can get in a college education. Honestly, our paper has given us a great opportunity. Now, my dear, what do you think of my scheme?"

WIFE-"Its just splendid John; but what will the books cost?" HUSBAND-"Why, that's the most surprising thing of all. We can get them for only ten cents a day, just think of it . Here is the offer."
