News comes in last week's dispatches of the incorporation of the United States Cordage Company with a capital stock of thirty-four million dollars.

The American Federation of Labor at its late meeting adopted a resolution declaring that "the right to work is the right to live."

DR. RAINSFORD, pastor of St. George's Church, New York, says: Do you know that one in every ten funerals goes to the Potters Field?

SOME time this month a party of twenty persons is to sail from London for East Africa to start a co-operative colony on the plan of "Freeland."

A LINCOLN preacher whom we and several hundred more listened to on Sunday, wanted us all to make this one resolve with him, that we would say nothing for six months about evil in the business world.

IN the small city of Yonkers, N. Y., the closing of the factories threw 2,000 employees out of work.

NO work to be had, no money for rent, no more goods to put in pawn with the usurers.

MR. HEBBARD, Superintendent of the Charity Organization Society of New York city, says: "You have heard of the increase of beggars. They are getting rabid."

WE print on the fifth page an article from Prof. Jones of Hastings on the subject of "The American Institute of Christian Sociology."

THE secretary of the Industrial Christian Alliance of New York is calling for enough charity offerings to enable them to provide 30,000 meals a day for the destitute starving of that city.

THE New York Tribune of last Thursday reported four attempts at suicide in that city during the previous twenty-four hours.

CHARLES HARRIS, a clerk, twenty years old shot himself in the head at his sisters at 401 East Fifteenth-st. He was out of employment, destitute, and preferred death to charity.

HENRY GRIEVE, a laborer thirty-five years old, living with his wife and two children at 87 First-ave, tried to kill himself by drinking coffee in which he had soaked the heads of mules.

THE secretary of the Industrial Christian Alliance of New York is calling for enough charity offerings to enable them to provide 30,000 meals a day for the destitute starving of that city.

THE secretary of the Industrial Christian Alliance of New York is calling for enough charity offerings to enable them to provide 30,000 meals a day for the destitute starving of that city.

money usury charges lead to. And whoever selfishly or ignorantly and apathetically supports the usury system, will find the bond of its despairing victim upon his garments.

DR. FELIX ADLER of New York, speaking of the East Side, where over a third of a million people are crowded into space only a mile-square says of the work of the Relief Committee of that district: They have a few hundred men and women at work in their tailor shop and at street-sweeping.

THE LORD'S GREAT BLUNDER. Rev. Dr. McSweeney of St. Bridget's church, New York, says: In this district the great problem among our poor Roman Catholics is not food nor fuel, but rent. Landlords are liberal enough, but there are bounds to their patience, as we well know.

WHY, bless your church worshiping soul, Doctor, don't you see there are too many people? The Lord didn't make a big enough world for them, and the landlords; and the landlords having used up all the patience they have waiting for the rents that must come, there is nothing to do but to crowd them off the earth.

VICTIMS OF AN ACCOURED SYSTEM. The University Settlement Society of New York City has made a house to house visitation of two streets in the Jewish quarters and forty per cent of the wage-earners there report themselves out of work.

THE financial system of the present and past is the usury system. No more money in circulation than the people can by saving themselves or others afford to borrow.

THE People's party is against the usury system in all its branched and ramifications. We consider it the world-over-shadowing parasitic tree of death.

THE People's party is against the usury system in all its branched and ramifications. We consider it the world-over-shadowing parasitic tree of death.

THE People's party is against the usury system in all its branched and ramifications. We consider it the world-over-shadowing parasitic tree of death.

THE FUTURE OF THE POPULIST MOVEMENT. [The following paper was read by the editor of the ALLIANCE-INDEPENDENT before the meeting of the Nebraska Independent Press Association held at Hastings, January 2, 1894.] My Fellow Laborers and Friends: It is not given to men in these days to lift the veil of futurity and have clear visions of what is to be.

discuss. The utmost they can do is to put obstacles in our way; they can misrepresent us, wall out our ideas, and so delay our final victory.

I am convinced that the great thing for us to do is to hold up to view the plan and usury-saving benefits of our government loan and banking system.

I am convinced that the great thing for us to do is to hold up to view the plan and usury-saving benefits of our government loan and banking system.
