

THE FRONTIER

Crops In Northern Part of the County Damaged Monday By Hail Storm

During the past week this section has been visited with three showers. The first one fell last Thursday evening and amounted to 1.1 hundredths of an inch. Then Sunday we had 0.1 of an inch and on Monday evening 23 hundredths of an inch, making the rainfall for the past week .35 hundredths of an inch. This brings the rainfall for the month of June up to 4.03 inches and since the first of January 16.49 inches. This is 1.06 inches more than we received during the entire year of 1934 and .18 less than we received during the entire year of 1933.

The rainfall Monday night was very heavy in the northern and eastern part of the county and in the extreme west end. Stuart reported 1.75 inches and there was quite a little wind and some hail in parts of the county. Near Midway the rainfall was about .250 inches and it fell in a half hour. There was a good deal of wind and quite a little hail in that vicinity, and south and east, which greatly injured the rye, oats and some corn. Joe Stein said that about half of his rye crop was destroyed. The barn on the old Polk place, now occupied by Lloyd Whaley, was scattered over the farm, windmill and outbuildings were destroyed. Not much hail there but a good rain. We have heard of no other place in the county where the wind done any damage. We understand that William Langan, the Simonsons, Charles Wrede, John Robertson, the Pete Eggar farm, Charles Berger, Axel Borg, Eric Borg and Albert and W. F. Kaczor were hit hard by hail losing from a third to one half of their rye crop and oats.

Frank Nelson, who lives a couple of miles north of Meek postoffice, says they had an inch and a half of rain there and it fell in about thirty minutes. He said his corn was damaged some, but he looked for it to come out all right. There was very little hail at his place.

John Carson says they had about four inches in his neighborhood, the Dorsey country. Gardens were covered with water, but there was little hail and he did not think crops were damaged to any extent.

Thursday afternoon—a heavy rain fell here about noon and for a couple of hours thereafter, to .34 hundredths of an inch. The rainfall for the month of June is now 4.97 inches; since the first of the year 17.43 inches, or 2 inches more moisture than for the entire year of 1934 and .76 hundredths of an inch more than for the year 1933.

The proposed substantial pension for citizens in good standing who have attained the allotted three score years has dwindled to a possible stipend of fifteen per month—about what a relief worker gets for dabbled around a little with a shovel in the mighty federal road aid program.
