

He Gets Paid for Living in a Fog

The more befogged Paul B. Widlicska of Hollywood, Calif., gets the more money he makes. As fog expert for Sam Goldwyn studios, his job is to "build" all types of fogs, from the "pea-soups" of London to the high-riding haze of San Francisco, whatever a current picture may require. A native of Budapest, he began his Hollywood career in 1914 as a cabinet-maker. On a set one day an old-type fog of smoke and ammonia gases made his throat ache and his eyes water. As a result, he devised the present method—ordinary mineral oil, forced through an aperture under high pressure with a mixture of compressed air. By heating, he can control the height to which his fogs will rise.

Two Birthdays Mussolini Waiting? Italy's Gold in London Match This, Mr. Swope

Two important human beings celebrated their birthdays recently. Henry Ford was seventy-two. If you saw him going upstairs two steps at a time and guessed his age, you would say, at most, fifty-five.

Mussolini has just celebrated his fifty-second birthday. You may spend a profitable three minutes contrasting these two leaders of men in your imagination's eye.

Henry Ford has made millions of people independent of the law of gravitation.

History will tell exactly what Mussolini has done. His test lies in the future.

The London Times and Universal Service announce a clash between Ethiopians and Italians, 20 Ethiopians and 40 Italians, killed, a stream supplying the Italian camp turned in a new direction and the Italians compelled to retreat.

Rome "has no information" on the incident.

Perhaps Mussolini, who knows that war should supply only good news, is waiting to add something such as "Air bombardment of Addis Ababa has inflicted swift retribution for the killing of 40 Italians."

Italy has \$100,000,000 in gold stored in London and can't get it. Why cannot Italy get that gold? England says to Italy, "When you pay the money you borrowed in the war, you can have your gold."

Britons are practical. When they lent money to Italy they said, "Send along your gold; not that we question your honor, but as a mere formality."

Too bad this simple-minded country didn't think of that when it shipped \$100,000,000 abroad. Perhaps we shall think of it next time, more probably not.

The General Electric company has developed, electrically, a temperature of 13,000 degrees Fahrenheit, announced as "hotter than the sun's 9,000 degrees."

But 9,000 is only the sun's external temperature.

Go to some distance into the sun's interior, where atoms are throwing off electrons to supply us and other planets with heat and light, and you would find a temperature of 40,000,000,000 degrees centigrade. When will Gerard Swope develop that temperature artificially?

Thomas E. Dewey, chosen to fight racketeering in New York, says in a broadcast:

"The criminal underworld plays no favorites. It preys on the public, on industry and on labor alike. Organized labor has been one of its most recent and most tragic victims. Many originally honest and sound labor unions have been slowly but surely infected with the virus of organized crime. Today certain corruptive leaders operate as extortionists both upon industry and upon members of their own unions."

An intelligent group of motorists announce a "safe driving campaign for August," urging automobile drivers to consider safety, particularly in their own cars.

The safest thing would be to send tens of thousands of cars now running to the junk pile, get new cars and live longer. Modern tires give miraculous mileage, but often they look "good for ten thousand miles more" when they have reached the danger point.

In Yugoslavia 20 years ago Alexander Bogar, now living in Minneapolis, Minn., killed a friend in a fight. Wishing to make amends, he offered to marry the widow. That could not be done. He has saved \$15,000, working in mines, and now offers the money to the twenty-two-year-old daughter of the man he killed. She is poor and will accept.

Atonement by payment is almost as old as murder. There are still countries in which crime may be paid for in cash, the amount depending on the rank of the person murdered.

George, former king of Greece, will take the crown if 60 per cent of Greeks vote in his favor. He thinks 60 per cent enough. Once crowned, George might be surprised to find what 40 per cent of Greeks could do.

The British forbade shipment of arms from England to Abyssinia, also shipments from England to Italy. Annoyed, the emperor of Ethiopia declines to provide special guards for the British legation at Addis Ababa. The British will send their own guards. They have a way of protecting their nations.

Log Cabin Effect in Crocheted Rug

By GRANDMOTHER CLARK

Log cabins are always picturesque, and the many antiques usually found about the place add much to complete the picture.

We can't all live in cabins, but we can satisfy our antique cravings by giving these ideas some space in our homes.

This "Log Cabin" crocheted rug was developed from the old "Log Cabin" quilt which is known to many of our readers. This model measures 28x42 inches and requires about 4 pounds of rag rug material.

The inner square of 4 triangles is made first. Six elongated pieces of same size form the first row around center, two short and two long pieces form the next or second row. Four pieces of same size from the third row. Four same size triangles fit in corners. Slip-stitch sections together in black and single crochet all around in black. Color scheme may be all brown in light and dark shades or mixed colors. Alternate panels in light and dark shades to give contrast to rows. Measure each section as the work progresses and fit sections into spaces. Rag rug material may vary in weights.

Grandmother Clark's Rug Book No. 24 contains full directions for making this rug, and many others that will interest you. All illustrations in colors. Postpaid, 15c. Address—HOME CRAFT COMPANY, DEPARTMENT C, Nine-

teenth and St. Louis Avenue, St. Louis, Mo.

Enclose a stamped addressed envelope for reply, when writing for any information.

Trees and Rainfall

There is much controversy over the question whether trees and other heavy vegetation bring rain or not. A great number of forcible points are cited both for and against this question. But we cannot help noting with interest a report from the Soviet government. In Russia a considerable area was planted with trees in 56 foot strips 700 feet apart. Rainfall in the area of these strips was carefully checked against rainfall in surrounding untreed areas. The results were astonishing. The increase in rainfall in the area bordered by the forest strips was from 13 per cent to 27.2 per cent. In the treed areas the evaporation between the strips was from 20 to 35 per cent less than in the open.

What Italians Will Face in Ethiopia

If and when the Italian armies invade Ethiopia, the troops will be faced with long marches through heavy brush and across rapidly flowing, boulder-strewn streams. In the above picture, made recently, a party of explorers show how the Italians will have to ford rivers, using mules to carry food and supplies.

He Was the Largest of His Kind

This skeleton of the largest species of South American prehistoric ground sloth, and one of the largest of all prehistoric creatures, has just been assembled and placed on exhibition at the Field Museum of Natural History, Chicago. It is believed to be the only complete Nozotherium skeleton in any North American museum. The animal is 18 feet long.

Trying Out Real Warfare at Fort McPherson

This photograph shows a bit of exciting action in the mimic war staged at Fort McPherson on the outskirts of Atlanta, Ga. Two pursuit and observation planes may be seen as they dived at full speed to strike troops on the ground. The latter, members of the regular Twenty-second Infantry, fought back with rifles and machine guns. The planes were flown by the reserve officers under the command of Major Wiley R. Wright, and the infantry was under command of Col. F. S. Chalmers.
