Tugwell's Waste Goes On and On

Spends 278 Million; Houses Far Short of Program; Payroll Huge.

Washington.—When the District of Columbia court of appeals held that the President's transfer of relief funds to Prof. Rexford Guy Tugwell's resettlement administration was unconstitutional, it did not save the hundreds of millions of dollars of the taxpayers' money which have been spent by what one congressman has called "the most extravagant, the most unjustified and the most useless" of the New Deal alphabetical bureaus.

Between May 4 of 1935 and March 23 of this year, Tugwell has received \$278,347,171, of which \$31,950,000, or nearly one dollar in every nine, has gone for "administrative" expense. Other expenditures: submarginal land purchases, \$44,129,328; subsistence homesteads, \$15,275,735; rural rehabilitation and resettlement, \$124,279,046; direct relief, \$16,109,354; suburban development, \$31,000,000, and land development, \$15,000,000.

Payroll Numbers 17,055.

What started out as only a handful of executives in the RA has swelled to a payroll of 17,055. The payroll for administering the various units in 27 Washington buildings alone is \$25,062,085 a year. Sixteen executives are paid \$7,000 to \$9,000 annually; 41 from \$6,000 to \$7,000, and 55 from \$5,000 to \$6,000.

Houses Fail to Rise.

Tugwell has spent \$278,347,171, but few houses, comparatively, have ever been completed. In most cases the lands on which they are built are too poor to raise crops profitably and few families are attracted to move in.

Spending in Lucid Terms

Washington.—The \$11,001,083,884 spent by the Roosevelt administration up to the middle of May for industrial "pump-priming" and relief is nearly twice the amount of all the money in circulation in the United States.

We doubt whether the price of agricultural land will ever rise, so long as so many farmers seem so anxious to admit that farming is a failure.

international security. Without admitting this what will it do to our economic security?

We hope that Secretary Hull doesn't do any more to lower the tariff on nuts. We have an over-supply in the United States right now.

The United States is engaged in an impossible job. It is trying to write a tax bill that will not be a burden to the average consumer. It's just got to be a burden, one way or another.
