Former Resident Passes
Away at Advanced Age
The following clipped from the Valentine Republican will be of interest to the old timers in this city and vicinity. Dennis Daly was a resident of this city in the early days, coming here about 1879. He was in partnership with John P. Purcell in the general mercantile business and later operated the for a time and later operated the City Hotel, which was located where the K. C. Hall now stands, and in about 1882 he was a candidate for postmaster of this city, but lost out to Patrick Hagerty. He went to Valentine the latter part of 1883 or the spring of 1884, where he lived for several years, then moving to Wahoo, Nebr., where he resided for many years. At the time of his death, Mr. Daly must have been well along in his eighties.

"Mrs. R. A. McQuade received word Monday of the death of her uncle, Dennis Daly, at an advanced age, at Washington, D. C. For a number of years Mr. Daly had been an inmate of a government soldier's home at Washington. "Mr. Daly came to Valentine early in 1883, as soon as the railroad reached here, from O'Neill. He had been a soldier in the army and fought in the Indian wars with General Crook. When Cherry county was temporarily established by action of the governor in the spring of 1883, a special election was held, and Mr. Daly was elected county superintendent. As such, he organized School District No. 1, the Valentine district. Permanent officers were elected in the fall, but whether he was re-elected this paper has not been informed. At that time as a homestead locator, and was very active here for a number of years, bringing many settlers into this section, it is said, from the vicinity of Emmet, Ia. He also established one of the first Republican newspapers here. This paper has never claimed the papers which were published before it was definitely established in December, 1887, but there was a "Republican" here before that date. Mr. Daly, Jim Connolly and Dr. Lewis having taken tries at promoting it.

PROFLIGATE GOVERNMENT
Here's a comparison that will give you something to think about: From the time of President Washington (1789) to the time of President Wilson (1913) the successive Federal congresses appropriated a total of \$24,000,000,000. That sum paid all the central government's expenses for the 124 years, including the cost of a number of wars, such as the Civil War, War of 1812 and Spanish American War.

During the last four years, two congresses have appropriated about \$32,500,000,000—eight billion more than was appropriated from the inception of the American government up to the first administration of Wilson. No one political party can be blamed for this prodigality—both Republicans and Democrats have shown a shameful disregard for the people's money. Nor has the spending trend been confined to the last few years—ever since the World War, the government has shown an accelerating tendency to fatten the budget. Nor can the politicians be blamed to the exclusion of everyone else—a supine and indifferent attitude on the part of the people has given them a free hand with the public's hard-earned dollars. Today taxation saps the wealth of the nation to a menacing extent. At least 20 per cent of the people's total earnings are taken by the tax-gatherers, and the percentage would be much greater if it were not for the fact that a large part of the spending is being charged

against the future, in the form of public debt. A thousand industries have discovered the meaning of "profitless prosperity"—their output and sales are soaring, but their profits are not, because of the tax bill. This all means that employment opportunities are constantly lessened for men and women—that industrial expansion and spending are stopped—that investors are frightened and refuse to place their savings in ventures that would create new sources of wealth and employment. Taxation is an intensely personal problem—it menaces everyone's source of income, whether that income comes from a job or an investment. We cannot have real and permanent prosperity so long as we permit government to disburse our dollars with profligate hands.

If all those pigs which were slaughtered by the A.A.A. three years ago had been permitted to grow, maybe now we could have two slices of ham in our sandwich. Well, if the Brain Trust engineers are not successful in harnessing the tides up in Maine, they can borrow a little from the old lady who tried to sweep 'em back with a broom. Of course the New Dealers are confident they will carry every state in the Union next November, but just the same they would be pleased to have Governor Lehman run for office in New York again.
