A group of persons returning home after midnight were puzzled by seeing a man near the top of a telephone pole. He seemed to be busily at work. One of the group investigated.

The explanation was simple. In the telephone office a short time before, several telephone lines in the business district had suddenly gone out of service. Something had happened to a telephone cable.

Telephone cables are not often damaged but when one is, it calls for immediate action. It didn't take long for repairmen to locate the trouble. By getting to work on it at once, it was repaired before daylight and morning telephone calls.

It is our policy to maintain your telephone service as free as possible from interruptions, errors, and imperfections...to provide the best possible telephone service at the least cost to the public consistent with fair treatment of employees and the financial safety of the business.
