I see nothing whatever in favor of the single tax in Mr. Quinby's story. If the man who elected to pay twice as much rent in a town with all modern improvements as he would have had to pay in a town with none of them, and then objected to paying taxes because he had already paid rent. But why not pay the taxes? Somebody had to pay, and if it had been the landlord he would have exacted higher rent. Because there is occasionally a vacant lot or an idle for its health department for the compiece of land I see no good reason for ing year. revolutionizing our whole system of taxation. It would be about like using a big siege gun to shoot a sparrow.

W. F. Baxter sald that a tax on merchandise was never paid by the merchant, but by the consumer, and that a tax on land values is the only one that will stay where it is put; and the conclusion of course is that all tax should be

on the value of land. Now it occurs to me that there is very transparent fallacy in that sort of reasoning. Suppose, for instance, that the tax paid by Thomas Kilpatrick & Co. on merchandise, building and lot was all put on the lot alone, would Thomas Kilpatrick & Co. sell their goods at any the less price, and would not the consumer pay the tax in the one case as of Omaha were taxed in the same way no article of commerce would be sold for i cent less, and the increased tax on the few vacant lots (beg pardon, the "value" of them) would make no appreciable difference in the situation.

But with the single tax in general operation where would the farmer be "getting off at?" The next time the gentlemen discuss the single tax in public it might be well for them to enlighten us somewhat on that point. CHARLES WOOSTER.
