

ASK U. S. TO PROTECT JAPS

Consuls Instructed to Give Them Protection in Border Towns.

MEXICAN BANK RUN CONTINUES

Revolutionists Refuse Over Reception of Their Officers by Rear Admiral Cowles Aboard Cruiser Pittsburgh.

WASHINGTON, Dec. 27.—The situation of foreigners in Mexico who have incurred the ill will of the rebels is again giving some concern to State department officials. The Japanese ambassador called today upon Acting Secretary Moore to request that the United States government do what it could to protect Japanese in Juarez and in other border points.

There is some apprehension that these Japanese may be made to feel the weight of resentment by the constitutionalists because the federals are receiving supplies of arms and ammunition from Japanese, although it has already been pointed out that these goods are being delivered under contracts made by Japanese merchants last April.

Acting Secretary Moore, promised to instruct the American consuls in the rebel country to extend the same care to Japanese as they would to American citizens. The American cruiser Pittsburgh, is now at Mazatlan. Officials said tonight that any of the vessels would extend aid to foreigners in any Pacific-Mexican ports, if reports of distress should prove true.

According to State department reports, General Canfield Aguilar, the rebel leader, with 700 men, recently entered the Hacienda Canahil, owned by the Tampico Navigation company, and compelled payment of \$5,000. Aguilar and his troops are said to be staying at Canahil, requiring the navigation company to feed both the men and horses.

Word reached the State department today that a large force of revolutionists on the National railway sixty miles north of San Luis Potosi destroyed a federal convoy train on Thursday, killing thirty-four federals. Traffic north of San Luis Potosi is suspended. It is reported that the situation at Tampico is unchanged. Phillip McLaughlin and mother for whom injury was made by the State department, are reported to be safe at Chihuahua.

Bank Run Continues

MEXICO CITY, Dec. 27.—The run on the Bank of London and Mexico was in no way diminished today, double lines of depositors extending out into the street for half a block. Payment on checks was restricted, as on previous days, to 20 pesos except for pay rolls and other urgent requirements. The run on the Bank of London and Mexico was reflected, but in a very minor degree, on the other banks in the capital.

OFFICIALS OF SINALOA RECEIVED

Roosevelt Denies Any Recognition of Constitutionalists. CULIACAN, Sinaloa, Mexico, Dec. 27.—Constitutionalist officials of Sinaloa were accorded official honors when they visited the United States cruiser Pittsburgh at San Blas, according to details

Asks for Guarantee that Water Pipes Will Not Leak for Five Years—Hanighen Says Job Had Been Accepted.

John J. Hanighen, the only contractor who ever succeeded in working for R. Beecher Howell and the Omaha Water board for any length of time without bitter disagreement, has finally risen in revolt against the bulldozing methods of the Water board boss.

Howell, supported by his board, seeks to hold Hanighen for the cost of operation of the Webster street pumping station for three months, the length of the extension of time granted the contractor to complete the north half of the forty-eight-inch water main to Florence.

Further the board is holding up nearly \$20,000 due Hanighen in an attempt to force him to put up a \$5,000 bond to guarantee the north half of the big main for five years, claiming the pipe was not properly riveted.

Hanighen contends he is not legally or morally bound to comply with either demand, and may test the autocratic authority assumed by the general manager of the Metropolitan Water district, R. B. Howell, in the courts.

Hanighen Makes Reply

Referring to the demand for a \$5,000 bond Hanighen said to the board: "The rivets are tight. It is a perfect job and now I do not feel that the company should be compelled to pay the premium of a bond, and hold itself liable for five years for this pipe, which has stood a pressure of 27 pounds, and has been accepted."

Howell said: "We had an expert go over every joint in the pipe and he said a third of the rivets were improperly driven."

Hanighen replied: "The expert was a member of the firm of Drake, Williams & Mount, who are my competitors, and who lost out on the job in the bidding. I cannot see why this firm or any member of it should be called in to pass judgment on my work. Anyway, you had two inspectors on the work constantly one inside the pipe and one outside. If the work was not done well the time to have corrected it was then, not after the ditch had been filled."

Hanighen said he did promise to give a \$5,000 bond, but declared he was forced to turn on the water and test the pipe unless he first promised to guarantee it for five years. "I am told this expert from the firm of my competitors spent just thirty-five minutes inspecting the riveting," said Hanighen, "and the fact that he condemned a third of the riveting indicates that he is prejudiced."

Howell exhibited some of the rivets, which he said had not been driven straight, and would therefore soon rust away and cause leaks. Hanighen said they would hold just as long as if they had been driven straight, and further that the steel pipe was painted with a paint which would resist water and prevent rust for twenty years.

Omaha's Public Schools

Free Text Books. Annual cost of books (1913), \$11,000. Cost per pupil per year, about 74 cents. Average life of book, five to six years.

Free text books forms one of the most interesting aspects of the public school question in Omaha. Books are supplied free to pupils in the grade and high schools and stationary sold to high school students at cost to the Board of Education.

From \$10,000 to \$12,000 is required annually for books. This year the appropriation is \$11,000. On the basis of the actual daily average attendance, that means about 74 cents per pupil per year for books. The board and superintendent consider the outlay very reasonable.

The text books are bought chiefly from three publishing firms, Ginn & Co., the American Book company and the Houghton-Mifflin company. Bids are obtained where possible, but many people know school book publishers do not cut each other's throats in the matter of competition. They seem to operate on a strangely amicable basis when it comes to that and if they do not systematically divide territory and orders proportionately among themselves, at least they usually avoid unseemly exhibitions of rivalry.

The situation has been characterized by the somewhat odious term of "school book trust," evidence of whose machinations has in years past, so reports have had it, been found in Omaha. How are the books purchased? By the board's book committee on recommendation of the superintendent of schools. The superintendent is absolute in the selection of books. As he chooses, he consults this one or that, but to him the committee defer, on the theory that his professional experience and technical knowledge fit him to pass on the books to be used. The purchases, of course, must be kept within the limit of the annual appropriation, which last year was \$12,000 and this year is \$11,000.

When the books arrive from the publisher they go to the board's store and shop building at Twenty-first and Nicholas streets, where they are held until taken in charge. By him they are delivered to the various schools on the order of the principals, as called for by the teachers. The old books are also returned to this storage house, those no longer fit for use disposed of to a paper plant, and those good for a little more service, sold to schools elsewhere.

Books for the high school are transferred directly to that building, which has a rather elaborate text book library, superintended by Dr. H. A. Senter, head of the chemistry department. He has direct personal supervision of the 40,000 books used, though not all at one time. In the high school, Dr. Senter has devised his own system of looking after the books, his own shelving and everything else connected with the library. He can tell you in a jiffy the record of every book for the last sixteen years. By means of a card index he can name just what this book or that did on the Fourteenth of February, 1902, for example, and just where it is now, whether gone to its eternal resting place or still among the nations. No book, however elusive, has ever yet been known to deceive or escape the scientific eye of the doctor.

In addition to 40,000 text books, each department at the high school has its own technical reference library. These high school books, naturally much in use, occupy special shelves in the library when not in the class room.

3,000 Offices, Stores and Factories in Omaha have demonstrated to their entire satisfaction that it is a profitable investment to

KEEP CLEAN We supply a million and a half clean towels annually, and buy every dollar's worth of supplies in Omaha—that Omaha can supply. It will pay you to start the new year right with a liberal supply of clean towels in your office or factory. We furnish the Towels. Omaha Towel Supply ESTABLISHED 1884 "OLDEST, LARGEST, BEST" Office at the "New Daylight Laundry"

Help your help to Keep Clean Attractive fixtures are furnished for offices. We supply towels to hundreds of small offices as well as to large ones. Our service includes the fixtures and all toilet accessories—brush, comb and soap. The cost is small and the service as prompt as we can make it. Phone Douglas 5288. Omaha Towel Supply 207 South 11th Street.

LOG CABIN SYRUP A Better Breakfast Your wheat cakes and waffles will taste better when served with TOWLE'S LOG CABIN SYRUP—the syrup with the delicious flavor of pure maple. Get a can from your grocer today. If he hasn't it, send me his name and 25 cents, and I'll send you a full pint can by prepaid Parcel Post, and my Free Recipe Book, giving many tasty maple dishes. Address me, Jack Towle, care of The Towle Maple Products Co. Dept. 37 St. Paul, Minn.

Omaha's Public Schools Free Text Books. Annual cost of books (1913), \$11,000. Cost per pupil per year, about 74 cents. Average life of book, five to six years. They may stand compactly together on the shelves, yet are aired through a little vent between the shelves. Now, also, in this repository are kept other supplies, such as stationery, chalk, erasers, ink, pens and pencils, all things that high school students need. These articles not furnished free are sold to the students at cost. For instance, here is a bunch of writing paper the pupil gets for 4 cents, which at regular retail prices would cost him 10 cents; a cover for his reference or lecture notes for 5 cents, that sells for 17 cents elsewhere, and so on. Why supply these things? For the sake of system and uniformity, seen therein, incidentally the student's pocketbook. It is a part of education to have all students using the same sort of stationery, etc. As to the life of school books, it varies according to the book and its use. Some books are not as well bound as others, yet used more. They naturally wear out quicker. Some books have been known to last for seventeen years, others ten, while others exhaust themselves in less than five years, so that the average life is placed at about five or six years. It undoubtedly would be less than that but for the fact that the books are promptly replaced when injured. In the graded schools the pupils do the repairing, themselves, under the teacher's direction. They have on hand transparent paper made especially for such purposes and paste a little bit over a rent, making the page almost as good as ever. Extra caution in the use of books is enjoined on all children and, considering that each book passes through the hands of several boys and girls from year to year, it seems not surprising that the life line averages about five or six years. As to the ordering of books, the teachers make up an estimated inventory of their needs for the next year in January. These go to the Board of Education, which acts on them in May, as a rule, and hand about August the new books begin to come in. They are taken to the store and shop building, where all school books are kept, and pass into the custody of Mr. Maynard. Revised inventories are filled as the school year progresses. This store and shop building is an interesting place, one of the hobbies of President Holmboe, realized since he came on the board. In this building are to be found desks, tables, shelves, and everything that goes into a school room. It is the depot, in fact. But the most interesting feature of this place is the miniature planing mill and workshop. In this are made tables, shelving, cabinets and many an odd article of use in or about the school that the average taxpayer seldom if ever thinks of. Forces of carpenters, cabinet makers and painters are steadily employed, in number varying with the demands of the seasons. Some handsome and artistic work is turned out of this shop. Besides the new work, resurfacing is done to great advantage, financially as well as otherwise. Old school desks, for instance, are worked over. They are planed down to the fresh wood and restained and polished. The claim is made that the plant nets a big saving every year. It occupies a brick building of two stories and basement, with subdivisions for special articles. One might wonder why, in erecting such a building, the board did not make it entirely fireproof.

NEW YORK, Dec. 27.—The city for the first time in its history is to have a woman at the head of one of its most important departments, according to those in close touch with the plan of Mayor John Murray Mitchell, for filling offices at his disposal January 1. The woman, it is said, is Dr. Catherine B. Davis, superintendent of the Bedford Reformatory for Girls, and the office that of commissioner of correction. The salary is \$7,500. All the complex and extensive correctional work of the city is under the jurisdiction of the incumbent.

GERMAN MINISTERS NOW HAVE AN ORGANIZATION

Pursuant to a mutual call of the majority of German pastors in this city, a meeting was held in the Young Men's Christian association to consider the advisability of organizing a German Ministerial association. The following names were present: Rev. F. Osterlag, Rev. G. J. Jaiser, Rev. F. Mueller, Rev. F. Hillebrand and Rev. Oscar Autritt.

An organization was effected with Rev. G. J. Jaiser, president, and Rev. Oscar Autritt, secretary. It was voted that the name be "Freiwillige Vereinigung der Deutschen Kirchenmänner in Omaha." At the last meeting the association decided to conduct a series of evangelistic meetings which shall be held in the different German churches throughout the city.

The following dates, churches and speakers have been voted upon: German Methodist Church—Corner Eleventh and Center streets, December 31, with a sermon by Rev. F. Osterlag.

German Baptist Church—Corner Twenty-fourth and Binney streets, January 1, with a sermon by Rev. G. J. Jaiser.

German Congregational Church—Corner Eleventh and Center streets, January 2, with a sermon by Rev. F. Mueller.

German Presbyterian Church—Corner Eleventh and Center streets, January 5, with a sermon by Rev. F. Hillebrand.

German Evangelical Church—Corner Eleventh and Center streets, January 8, with a sermon by Rev. F. Hillebrand.

CHRISTIAN SCIENTISTS ENTERTAIN DEMPSTER

The Christian Scientists of Omaha entertained Robert Dempster, leading man in "The Right Princess," appearing at the Brandeis theater, with a tea at the home of Mrs. Dempster last evening. A corded a hearty reception by Scientists everywhere that he has played in "The Right Princess." It is particularly appealing with them because it brings out several features of their creed.

Quite a number of Scientists visited him all afternoon long and discussed various phases of the character that had been depicted from scene to scene in the show. Mr. Dempster played the part of Billy for the first time about a year ago at the Bijou theater in New York City. It met with an open-arm reception by those who believe in mental therapeutics, and since then there has been one continuous demand from various cities all over the country asking that the performance be brought to them. As a consequence it is not extensively advertised and is generally given under a sort of patronage of the Christian Science church. Notwithstanding that, it has also attracted many sociological students for the salient developments of mental character are its strongest hold as a Theatopian attraction.
