oration Reports on the Grain

from Argentina — Cern

Shows Some Losses.

OMAHA, Feb. 19, 1914.

The bullish enthusiasm in the wheat market, so pronounced at the close of bosiness Tuesday, gave way to a bearish feeling with fractional decline at the close oyetterday. The sales were probably 185, 000 busnels, with most of it taken by exporters at the seabourd and the balance by interior millers in the Chicago territory. The market centers that reported sales Tuesday on foreign account said it was impossible to do any business. Foreigners not only refused to buy freely of the wheat surplus in this country, but they sold some futures at Chicago in which they had a profit.

The fact was clearly demonstrated yesterday that in order to keep wheat prices at the present level it will be necessary to have a good cash cemand from day to have a good cash cem

The situation in wheat at the moment presents the appearance of a boot-strap game. It looks as if the American speculator is holding up the market for a purpose-possibly in order to sell some wheat and secure a profit if lons, or to put out a short line and cover at a lower price. It has been the case for many years past for the "Yankee" speculator to hold the price of wheat at a level where exporters refused to absorb freely, as they were able to go to a competing country and make their purchases at prices below those asked by United States holders.

The average trader in wheat is waiting

States holders.

The average trader in wheat is waiting for the deterioration reports, which he believes will be of interest sooner or later, and he is carrying some wheat with the idea of securing a profit. It was reported here late yesterday that Liverpool bought several cargoes of Australian and Argentine wheat, and this being the case, it is not out of place to make the claim that the Liverpool men named the price, although traders have been led to believe that both those countries will have little wheat to sell and that they will probably secure their own price. Cash wheat was unchanged.

Minneapolis reported Chicago as a big seller of July wheat there, and reported the cash market as firm but slow, owing to the larger receipts. That Minneapolis millers have bought half a million bushels of cash wheat to arrive there, and that a great deal of this was bought at Omaha. The average trader in wheat is waiting

that a great deal of this was considered on the corn was unable to stand up under the news of yesterday and showed losses of ya@ac. Some markets in the corn belt were reporting heavy acceptances on the crop and cash sales were again small, 200,000 bushels selling to go to store because of a lack of demand. A lot of Argentine corn sold at New York at 70 cents, which showed 1/2 loss. Shorts were buyers in the former market on free export takings. Cash corn was 1/40 to lower.

SHEEP—There seemed to be a change for the better in conditions surrounding the sheep market because the packer buyers were good competitors for another liberal supply of killing sheep and lambs and were willing to pay prices generally strong to 106556 higher, the most improvement being on the best grades. The second messages from other markets indicated ony steady trade at those points, and in view of this traders regarded the local market as very satisfactory. It did not take buyers long to reach a trading basis, and most everything was taken out of first hands comparatively early in the forenoon, it being again a case of the best killers moving first and the less desirable grades selling afterward.

again a case of the best killers moving first and the less desirable grades selling afterward.

Most of the lambs were of the fed western class and were picked up largely at \$7.15g7.70, the latter figure being top for the day and week. The bulk of the warmed up grades sold to packers went around \$7.00g7.25, and those that found an outlet to feeder buyers changed hands principally at \$6.75g7.00. A range of \$4.85 g6.30 included practically all the ewee, there being few if any strictly choice kinds of the right weight in sight. Some yearlings, the same as those that have been bringing \$6.00 right along, brought \$6.15 this morning.

Up until today prices have been generally steady on both sheep and lambs, but the advance this morning makes the general market strong to 10g16c better than the close of last week.

McAdoo and Houston Back in apCital After Long Trip.

CONFIDENCE IN MONEY BILL

Country Shown by Facts and Figures to Be Exceptionally Sound and Strong, Secretaries Declare.

ness men.

Evidence of Economic Strength. The committee's statement, in part, said: "In every section of the country the committee found a practically unanimous conviction among bankers and business men that the currency bill will bring about most beneficial changes in the business of the country. The committee was presented everywhere with overwhelming evidence of the enormous economic strength of the country and of the rapid progress of every section. The fact that the nation's banking resources as a whole made enormous advances every twelve or fifteen years, approximately doubling in each such period, was made evident. While this is true of the country as a whole, it was shown that certain sections are advancing with more rapid strides than others, and that the country is fundamentally exceptionally sound and strong economically. The facts and figures submitted to the committee in every part of the country show a condition of financial, industrial, commercial and agricultural soundness and prosperity that leaves no doubts as to the future.

Impressed by Admission. "The committee was impressed by the frank admission of bankers throughout the country that the present banking system not only encourages but actually has created striking artificial conditions of banking. With practical unanimity, the opinion was expressed that the new measure will restore normal conditions with great resulting benefits; that the present system not only furnishes no protection in times of real stringency, but also, even in times of great prosperity, especially when there are bounteous crops, makes it impossible to meet the conditions and that there has been presented the singular contradiction providing bankers thrown into fear of panic by the emergency of wealth. The bankers were unanimously of the opinion that the establishment of this reservo system will no longer make our prosperity a peril and that it will relieve them of apprehension and distress in those circumstances and give confidence and stability to business generally.

"Already practically all the capital represented by the national banks has applied for national charters and many have applied for membership in the fed-

eral reserve system. "In every state in the union which the committee has visited it has heard expressions from governors, banking commissioners and others to the effect that where there is 'any legal disability against subscription by state banks, that disability would be removed and the further expression, that state banks which were eligible would very generally seek

to enter the system." MeAdoo's Statement. Here is Secretary McAdoo's statement: "In a few instances the question was asked if the new federal reserve banks would be organized in time to take care of the crop moving contingency next fall. It is hoped that the system may be established before that time, but if it should not be the resources of the United States treasury will be placed again at the disposal of and be used for the protection of the legitimate business CHICAGO LIVE STOCK MARKET interests of the country. The treasury resources are believed to be adequate Cattle Steady to Ten Cents Higher- for the purpose, but if they should not prove to be, then it should be remembered that the Aldrich-Vreeland act has
