Most Popular Car of Its Type in the Entire World

Popular because it gives the buyer greater value and satisfaction than any other car of its kind manufactured.

There is a reason for the 1914 Overland's unparalleled success.

It is this---

No other factory in the world can build a car the equal of the 1914 Overland for less than \$1,200.

Consider the tremendous value of this magnificent car.

Note its many new features---

A larger motor; a larger wheel base and larger tires.

The new car has electric lights throughout—even under the dash.

Then there is the larger tonneau, a jeweled Stewart speedometer, deeper upholstery, a finer finish and the price is lower than ever before.

This Car Costs You Thirty Per Cent Less

---at \$950 than any other similar car made.

This is due to the enormous production of the Overland factory.

It is only reasonable that a factory which purchases its raw materials in such large quantities as does the Overland, should be able to buy for less than the manufacturer whose output is not so large.

This saving in original cost to the Overland Company reverts to the man who buys the car. It enables the company to build a car of real value at a lower cost than any other factory building a similar car can possibly do.

When you choose your car for 1914 why not follow the precedent established by thousands of other discriminating buyers who are now satisfied owners of this famous car.
