GRAIN AND PRODUCE MARKET Crop Report Causes Some Selling by

the Longs on Wheat.

CORN AND OATS CUT DOWN Many of the Large toncerns Are

Beurish-Cash Oats Prices Unchanged-Sales at Chicago Are Small.

OMAHA, Dec. 7, 1912. While the harvesting of wheat in our southwest is many months distant and there will be hundreds of changes in the crop promise before the grain has ripened, a report as sent out by the Modern Miller yesterday, attracted the speculative world if for no other reason than its bearish conclusions. According to compilations by it, the area sended to winter wheat this fall was \$2.500.000 agrees and the conby it, the area seeded to white this fall was 3.500,000 acres, and the condition, as made up of the winter wheat beit, is 82.5 per cent, thus indicating a crop of 5.320,000,000 bushels, against 350,000 bushels. 00,000 bushels harvesteed last year. While bear factors are almost too numerous to mention singly, the showing of the above report as to the condition of the winter wheat plant came as a help to the shorts

yesterday, and it closed with only the smallest fractional losses, but price at 11:30 o'clock. It caused some selling by longs and there were doubtless some short sales made on its account. Because of the fact that the figures given out. In the above report were complied by millers of the country, made it more at-tractive than it otherwise would have

Commission houses in the trade held buying orders around 20%; for May wheat yesterday; considerable was absorbed at that level. Those who believe that wheat prices are to advance to a higher level were absorbing the grain thrown into the pit, but their purchases were made in a cautious way. A feature of the gossip last night was the narrowness in indemnities for wheat (igo), and traders did not care much about buying them despite their closeness, while in corn and oats, ups and downs were hard to sell at the same murrin.

A trader, sizing up the situation in all A trader, sixing up the situation in all grains, said prices are too low to sell short, and yet too high to buy. It is said that the short interest in wheat and December corn and oats has been materially cut down in the last two days, and that a number of longs who bought early in the week have taken profits. The outside trader is conspicuously absent. fluctuations being too narrow to encourage operations. A good many of the big commission houses are beartsh and the few that are builtish advocate hypothesis and the few that are builtish advocate irchases only on breaks. Five hundred outsand bushels of corn have been sold r export from Chicago during the last

four days, mainly for January shipment. Sales yesterday were only 15,000 hushels out of a total of 55,000 bushels. The advance in ratures brought in larger country offerings, mainly from lows.

Cash outs prices were unchanged in the majority of markets yesterday with a

HOGS—While the receipts of hogs were almost 1.300 head short of a week ago, the run was very fair when compared with two weeks ago and a year ago. The moderate supply began to move at about the sund the sund three weeks from

with two weeks ago and a year ago. The moderate supply began to move at about the usual time at figures anywhere from steady to a nickel lower than the general market yesterday. The first sales were largely around \$1.559.7.60, with one load reaching \$7.55. the highest point during the day and a nickel below the top price yesterday. The packer buyers, although apparently wanting loogs, tried as usual to fill their orders at as low a cost as possible, most of their first bids being anywhere from a nickel to a dime lower. Sellers were slow to part with their offerings at any decline, consequently trade for the most part was slow and somewhat draggy. Eventually a comprotrade for the most part was slow and somewhat draggy. Eventually a compro-mise was agreed to and the bulk of the hogs went into the packers hands around \$7.5027.55, with the best grades chiefly at \$1.5527.55 or a nickel below the general run of sales on Friday's market. The bulk of all the hogs might be described as moving at a range of \$7.5027.55, as against the bulk yesterday at \$7.5027.55. While slow trude featured, the general market a fair riesways was made in good searon.

For the week receipts were liberal as about 69,600 head were yarded, as against 48,200 head last week, 69,500 head two weeks ago and 56,900 head during the corresponding time last year. The receipts were the largest from any week since June. The average price of hogs is 10@15c lower than last Saturday, the bulk today being at \$7.50@7.60, as against \$7.600
