

### His Mind is Centered on the ONE thing—"Prescriptions"

Saddle a thousand burdens onto the mind of a Prescription Clerk and he is apt to go WROTH on some of his measures and ingredients.

Here at the "Prescripto" the prescription clerk has his mind centered on but ONE thing—PRESCRIPTIONS—prescriptions first, last and always. He has a double check system of his own; he never hesitates, makeshifts, falters or substitutes; he attends to his business STRICTLY, because he KNOWS that the prescription end of the "Prescripto" is the end that BUILDS or UPROOTS the success of the institution.

The old time druggist was so particular about his prescriptions that folks nowadays would call him an "old fogey"—but—if CARE warrants such a name you may call US "Old Fogies," also.

## Unless You Act at Once--TODAY

You run the risk of missing the last chance to get an indispensable book at a price which is only possible because of the exceptional circumstances of its publication. You can, of course, defer the matter and buy later on at the higher price. More than 60,000 other persons have acted in the matter and have bought it at the low prices. The time you may give today to investigating this work will be time well spent. You may, or may not, decide to buy now. But if you do buy, it will be at a substantial saving, and you will have the added satisfaction of acquiring a thoroughly good book at a price that is really a great bargain. On May 28th the present prices will be advanced in all bindings.

### What Is This Extraordinary Book? What Is the Secret of Its Success? Why Is It Indispensable to All?

**1.** THE new Encyclopaedia Britannica is an extraordinary book because it deals with the whole field of human life, learning and achievement in a manner commensurate with the complicated needs of the present day. The world is so big, human interests so diverse, progress so astonishing, research so unrelenting, activities in every direction and in all lands so pressing that no ordinary book can do justice to them. The new Encyclopaedia Britannica contains 41,000 articles and 44,000,000 words of text. A smaller work cannot possibly cover the ground adequately, nor can any collection of 500 separate books cover it.

When you buy the Britannica, therefore, you buy quality, but the price you pay for it (until May 28th) is only a little more than three cents a thousand words.

**2.** THE success of the new Britannica is due to the fact that it was written, not by "hack" compilers, refurbishing old material taken from other books, but by recognized authorities; by men of action, men of learning and practical experts—by men whose names are known for ability, scholarship and original work in their respective fields. What they tell you in the new Britannica you can depend on. This is the reason that people go to this work to verify what they read elsewhere. It has often been called the "court of last resort." It is a vast storehouse of certified knowledge—certified by the signatures attached to the articles.

When, therefore, you buy the new Britannica, you buy not only quantity, but quality as well.

**3.** IT is an indispensable book—to the worker in any calling, to the writer, the thinker, the professional man, the home-maker, or to the young, because they find that they can go to it with the comfortable feeling that it will not fail them in any reasonable demand they may put upon it. The man who owns the Britannica need not experience the embarrassment of having to say "I do not know." He can now always say, when in doubt, "I know where to find out." The service the work affords to the information-seeker, or to the man who wishes to "read up" an entire subject, is little short of amazing, and this is best appreciated by those who try to put it to good use.

### The New Encyclopaedia Britannica

29 volumes, 41,000 articles, 44,000,000 words of text, the one great work of all human knowledge, superseding and displacing all other editions and all other works of reference

### The "Ideal" Encyclopaedia—because

- It is easy to buy—counting quantity alone, the cheapest book you can purchase—and counting quality, too, so cheap that there is no comparing it with anything else you could buy. You can pay as little as \$5 down and make the remaining payments in nearly any way you like.
- It is easy to handle—each volume, though it contains as much letter press as 15 ordinary books, is only an inch thick, weighs a little more than a couple of monthly magazines and may be held comfortably in one hand.
- It is easy to consult—to get a quick answer to any question—an elaborate index gives you the exact whereabouts of every item you want.
- It is easy to read for study or amusement, being interestingly and attractively written by masters of style.
