Already Busy on "Fourth of July" Cleaning Work!

We are already SUBMERGED in "Fourth of July" work: bundles by HUNDREDS are already coming in here marked: "To be finished in time for wear on Fourth of July." And believe us, we are certainly tickled to get started on special work that far ahead.

A masterpiece cannot be created in a minute; neither can a high grade, exquisitely perfect job of Cleaning, Dyeing, Repairing or Altering be done in a half hour or so. Therefore, give us ALL the time you can on your "Fourth of July" work, although we CAN if necessary, turn out work SWIFTER than any other concern west of Chicago, for we have a MATCHLESS force and equipment. (An investment of \$7,000). Give us a little extra time and we will give you work many extra loving touches; those careful examinations; those critical inspections, that count for SO much.

WIND BLOWS HAT OFF AND FIVE-DOLLAR BILL IS LOST

"It's an ill wind that blows no good," remarked Assistant City Prosecutor Paul Bohan as he took up a vagrancy complaint against J. W. Kirkland, who was accused by Nels Lundell of appropriating a \$5 bill which fell out of his hatband when his hat blew off.

It happened under the Eleventh street viaduct. Lundell's hat blew off his head and Kirkland stopped it. The bill fell out and Kirkland is alleged to have taken it and then returned the hat. He called a policeman, but as the \$5 could not be found when Kirkland was searched the complaint was changed from larceny to vagrancy. He was dismissed by Judge Foster and ordered to leave town inside of twenty-four hours.

The motion picture film and a large number of colored exposition stereopticon views are new and some have never before been shown.

Mr. Leffingwell is known to many Omahans and those who have heard him know that he is able to tell his story interestingly and instructively. He has possibly traveled the route to and from California more times than any other lecturer in this country.

Cuts that print---

There is often all the difference in the world between a cut that shows up well in the engraver's proof and one that shows up well when it is printed. Cuts made for a newspaper have to be made so that they will give good results under the most adverse conditions. For that reason, a newspaper engraving plant produces cuts that the ordinary printer can use and get good results.

If you have some engraving to be done, send us the work and compare both the results and the prices with that of ordinary engraving plants.
