The feature of the wheat market was the continued beavy buring by Thomson & McKinnon. This buying helped to hold values. The wheat was purchased in order to secure profits.

Corn shows advances of 150%c yesterday on a rush of shorts to cover. High temperatures and a lack of moistures in many sections of the corn belt were the controlling builtsh influences. The cash trade was small at 8,000 bushels, but Buffalo. Omaha and Kansas City reported a good business in the actual grain. The southwest was a buyer of futures here and the offerings were small and held tightly by the songs. A well known cash grain man in the Chicago trade says that no matter what the size of the coming crop may be, it will come in on empty cribs, and anything under an average outrun will be below our domestic requirements under normal conditions.
