

**DO YOU** know what a big part of our work, family washing has become?

Some of your neighbors know, because our wagons now gather it from every part of this city. The only reason we keep on getting it is because people are pleased with our work—that's self-evident.

We can do the hard, disagreeable part of your laundry work better than you can, of course, but do you know that, taking everything into account, we can do it even cheaper than you can have it done at home?

Surprises you, doesn't it? Don't stop there—make us prove it. Call us up now; tell us which day you would like to have us stop for your bundle.

**A Cleaning Service for the TOURISTS!**

OMAHANS at present away from the city are having the DRESSER CLEANING SERVICE shipped to them, as it were. Each day sees the arrival here of hundreds of packets of cleaning work. Gentlemen vacationists want their Palm Beach Suits cleaned (\$1), and ladies are sending their White Dresses, Skirts, Waists and similar balmy attire. Chances are there is a cleaning establishment near their hotel but Omahans won't trust the work.

BEST part of it is that those vacationers get back their work almost as quickly by sending it in to Dressers as to have it done where they are resorting. Dressers, by the way, pay Parcel Post or Express charges on all work amounting to \$3 or over. Phone Tyler 345.

**Grandeur of Frisco Fair Buildings is Already Apparent**

SAN FRANCISCO, June 29.—The immensity and grandeur of the Panama-Pacific International exposition as it will appear on its opening day, February 9 of next year, is apparent to every visitor to the site in San Francisco. The exposition has taken shape; it has passed the preliminary stage and has developed into a form which is appreciated by the thousands of spectators who throng the grounds on every Sunday and on holidays.

All of the great exhibit palaces are in process of construction and several have been completed. Of these the first to stand ready for its exhibits is the Palace of Machinery, the largest wooden building ever erected and to be noted in history as the building in which the first indoor aeroplane flight was ever held; this was when Lincoln Beachy on December 20, 1913, flew the length of the giant structure in a seventy-five feet wide center aisle between the massive columns.

With frames in place and outer structures completed or nearly completed on all of the buildings the exquisite beauty of the architecture is no longer the subject of conjecture, but can be accurately gauged and judged.

The work has progressed with unprecedented rapidity. This will be the first exposition that was ever perfect in every detail on the date of opening. That is a point upon which the Panama-Pacific International exposition directors have been most insistent. There is no question but that when the exposition is formally opened on February 20, 1914, there will be in the ensemble no uncompleted work to mar the beauty of the finished spectacle.

The construction of an exposition of the immense size and indescribable grandeur of one is a task that to the layman is inconceivable and even to engineers presents so many baffling problems that the greatest experts in each line were necessarily employed upon the work.

The site, composed of 825 acres almost in the very heart of San Francisco, was selected for two reasons, first, its location, which is close to the hotel and shopping district and but a few minutes by trolley from all parts of the city, and, secondly, for the remarkable natural beauty of surrounding regions.

**Contracts Let for Erection of Press Building at Fair**

Contracts have been let for the construction of the press building and the press building of the Panama-Pacific International exposition. The press building is to cost \$2,000 and the press building, which is for the publicity department of the exposition and for visiting newspaper men from all parts of the world, will cost \$2,000.
