Dakota, was somewhat unfavorable, with considerable damage reported, and rain is needed in other states to the westward. Severe damage by rust in western Minne-sota. The week was generally unfavor-able for corn east of the Mississippi river, Drouth is again severe in the Ohlo val-ley, with the crop cut short in large areas. West of the Mississippi river, corn made excellent growth in the more north-ern states, where the molsture was gen-erally sufficient for present needs, but drouth was severe, and much damage was done in many sections to the south-ward, especially in southeastern Missouri and Oklahoma, where upland corn is largely a failure. Oat harvest and thresh-ing is progressing in northern and middle districts. There are complaints of poor yield in many localities. Fruit prospects are generally good. In many tobacco growing sections the crop is at a stand-still from lack of molsture. Local Forecaster, Westher Bureau.
