GRAIN AND PRODUCE MARKET.

Wheat Sellers of Last Week on Buying Side. CORN SHOWS MUCH FIRMNESS. Yellow Cereal is a Surprise to the Speculators as Well as to the Bull Faction of the Grain Pit.

OMAHA, Dec. 3, 1913. Those who have a friendly feeling for what have been saying all along that with the improvement of a demand for Uncle Sam's surplus, a bull market in that cereal would be a foregone conclusion. The purchase of 200,000 bushels hard winter by exporters yesterday caused an almost complete reversal of feeling in the bottom of the grain market. The market was closed with an advance of 1/4¢ for the day, and showed reactions from the bottom of 1/4¢ to 1/2¢. The market was 1/4¢ below the highest level. It was a market where considerable caution was shown by both buyers and sellers. The market was closed with an advance of 1/4¢ for the day, and showed reactions from the bottom of 1/4¢ to 1/2¢. The market was 1/4¢ below the highest level. It was a market where considerable caution was shown by both buyers and sellers.

Cash wheat was 1/4¢ to 1/2¢ lower. The action of corn was a surprise to the every day speculator, and especially to the bull. Firmness was shown in most of the day, but resting spots showed a little change. It is not selling any corn to speak of, mainly because the weather is too unfavorable for planting and harvesting on the railroads. All of the western markets were higher on new corn. Kansas City led 20,000 bushels sold there to go out. Cash corn was unchanged to 1/4¢ higher. The action of corn was a surprise to the every day speculator, and especially to the bull. Firmness was shown in most of the day, but resting spots showed a little change. It is not selling any corn to speak of, mainly because the weather is too unfavorable for planting and harvesting on the railroads. All of the western markets were higher on new corn. Kansas City led 20,000 bushels sold there to go out.

NEW YORK STOCK MARKET.

Trading Animated and Prices Rise in Last Hour. UNDERTONE FIRM THROUGHOUT. Final Quotations for the Representative Shares Show Gains of Two Points in Some Quotations.

NEW YORK, Dec. 3.—In the last hour of today's stock market trading became animated and prices moved up vigorously. Prior to that time the market was in a state of comparative inactivity, with business down to a low point. The undertone was firm throughout. Final quotations for the representative shares showed gains of two points in some instances. Short covering apparently was the main feature.

Today's traders learned of further reductions in working forces by railroads and industrial corporations. Some of the news was of a nature to cause concern, but other statements showed optimism in earnings. Assurances of big crop production, considered a reliable barometer of steel trade conditions, disclosed a decline from 10,000,000 tons in 1912 to 10,500,000 tons in 1913. Sentiment abroad was depressed by the French ministerial crisis which made more uncertain the prospects for the French government loan to the outcome of which great importance is attached by investors.

The stock market's advance in the face of the news was apparently was in response to technical points. Bonds did not share fully in the improvement, with a number of weak issues appearing and Rock Island receding. States 2 1/2 coupon, advanced 1/4¢ on call. Number of sales and leading quotations on stocks were:
