LONG SHOT WINS THE DERBY

Rich British Stake Goes to Obouyer, a Rank Outsider.

SUFFRAGETTE IS FATALLY HURT

Woman Grasps Bridle of King's Horse, Anmer, Near Finish and is Trampled Under Foot - Two Jockeys Hurt.

EPSON, June 4.—The most dramatic Derby ever run on the historic course at Epsom Downs was accompanied today by a series of events of the most startling character. Just before the finish a suffragette attempted to seize the bridle of the king's entry, Anmer, while he was running at his topmost speed. The woman was fatally injured when the horse fell, and the jockey was badly hurt. The king and queen and scores of royalties witnessed the incident.

The woman lies unconscious in the local hospital. Her name is given as E. Davison and she is thought to be Miss Emily Wilding Davison, a member of the Women's Social and Political Union, who since 1900 has been sentenced eight different times to imprisonment for participation in suffragette outrages. Emily Davison was the woman who assaulted a Baptist minister at Aberdeen station, mistaking him for David Lloyd George, chancellor of the exchequer. Whenever she has been imprisoned she has started a "hunger strike" and has generally been released. She has been found hidden in the House of Commons three times and ejected.

James, the jockey who was riding Anmer, was unable to disengage himself from the stirrups and fell to the ground. He was badly injured and had to be attended by a surgeon. The race itself was unusual. The favorite, Cragenour, crossed the line first, but was promptly disqualified for "bumping" and was displaced by Obouyer, a 100-to-1 shot.

In the race immediately following the Derby Jockey Whalley was seriously injured and his horse had to be shot. Second and third places went to W. Raphael's Louvois and W. Hall Walker's Greatport, while the French horse, Nimbus, was placed fourth.

Fifteen horses start. Of the 86 original entries for the stakes of \$25,000 only fifteen participated. The time of Cragenour for the mile and a half was 2:37 1/2. There was only a head between Cragenour and Obouyer and neck between Obouyer and Louvois. There were no American-owned horses in the race. The fifteen runners got away to a good start. The rank outsider, Obouyer, showed the way up the hill. Six furlongs from home Obouyer was still leading, fol-

FEDERAL TIRES HONORED BY UNIVERSITY OF MINNESOTA

The University of Minnesota believes in developing its students along practical as well as theoretical lines, especially in those departments that have to do with preparation for a business career. Every year the university sends its graduating class in chemistry on a tour of inspection of the country's leading industries. A select list is made of manufacturing concerns turning out the highest type of product in their lines in which applied chemistry and scientific laboratory practice play an important part. This year the Federal Rubber Manufacturing company of Milwaukee was selected by the university as representative of America's pneumatic tire industry. The class of 1913 recently made a complete tour of the Federal plant and a careful study of laboratory work as applied to the production of quality and reduction of manufacturing costs in the production of Federal tires. The advantages of this method are obvious, students obtain practical first hand knowledge that is of the greatest value.

Complete Tieup of Sioux City Packing Plants Today Likely

SIoux CITY, Ia., June 4.—A complete tieup of the Cudahy and Armour packing plants in Sioux City was the forecast of the strike situation late tonight. Cleans Blood Through Kidneys

A Most Important Function and One to be Carefully Guarded.

The purpose of the kidneys being to filter the blood the question of treating supposed kidney weakness should be considered carefully. Instead of drugs and alleged kidney stimulants the better plan is to purify the blood with an antiodic effect such as you get from S. S. S. It should be remembered that the kidneys are made up of a fine net work of blood vessels, and it is to stimulate the functional activity of kidney tissue through its own capillary network that S. S. S. shows one of its most remarkable effects.

The medicinal value of the components of S. S. S. is relatively just as vital to healthy kidney action as the nutrient obtained from grain, meat, fats, sugars, or any other part of our daily food is to the natural reconstructive requirements of the tissues. And there is one component of S. S. S. which serves the active purpose of stimulating the cellular tissues of the kidneys to a healthy and judicious selection of its own essential nutrient. Thus, in cases of rheumatism, cystitis, chronic sore throat, business of voice, bronchitis, asthma, and the myriad of other reflex indications of weak kidney action, first purify your blood with S. S. S. so it will enable the tissues to rebuild their cellular strength and regain their normal health. S. S. S. is prepared by The Swift Specific Co., 137 Swift Bldg., Atlanta, Ga., and if you have any deep-seated or obstinate blood trouble, write to their Medical Dept. for free advice. It will be worth your while to do so. You will find S. S. S. on sale at all drug stores.
