FIRE FIGHTERS ARE HOPEFUL

Blaze on Mount Tamalpais is Fairly Under Control.

FIVE SOLDIERS BURN TO DEATH

Half Dozen Hamlets and Grove of Giant Trees in Muir Woods Are Inside the Danger Zone.

SAN FRANCISCO, July 10.—A still, cloudless dawn brought hope to Mill Valley, Corte Madera and Larkspur today that before night fell the forest fires on Mount Tamalpais would be so thoroughly beaten out that the afternoon trade winds would not fan them to new danger, as they have for the last three days. Paint columns of thick smoke from the beds of the canyons showed that four fires were still smoldering. Mill Valley was still in danger. Communication with the Muir woods, a grove of giant sequoias, was still broken this morning. One newspaper man, who made the trip on foot, brought back word that although sixteen cottages on the edge of the forest had been destroyed, the big trees were untouched and seemed to be out of danger. All authorities agreed that nothing but lack of wind had saved the forest and the town.

Before noon 1,000 militiamen were expected to come to the aid of the three soldiers and volunteer fire fighters who had been up all night. Five soldiers are reported burned to death and half a dozen little hamlets and towns at the foot of Mount Tamalpais await their salvation or doom from the morning breeze today, while the fire which swept the mountain for three days is reaching toward the pleasant plains and vineyards and the Muir woods national park on the south.

Rutherford, Ia.—"My little girl had a head crust form on her head. Her head had a rash on it and it itched and burned so she would wake up nights and cry. "Then I used Cuticura Soap and Ointment and they cured her entirely in six weeks and her hair came in lovely. As that case was about ten years old and now she is twenty-six and has never had any more trouble." (Signed) Mrs. H. Z. Wadley, Dec. 14, 1912.

RAIL APPRAISERS CHOSEN

Commerce Commission Accepts Aid of States' Committee.

FIFTEEN MEN ARE SELECTED

Commissioner Clarke of Nebraska on Committee Which Will Aid in Making Physical Valuation of Railroads.

(From a Staff Correspondent.) WASHINGTON, July 10.—(Special Telegram)—A valuation committee of fifteen state railroad commissioners headed by Clifford Thorne of the Iowa commission was selected today by the executive committee of the National Association of State Railway Commissioners to cooperate with the Interstate Commerce commission in making a physical valuation of railroads.

Commissioners from fifteen states were named on the committee. Commissioner Clarke of Nebraska, being among the number. The following states are represented on the committee: Nebraska, Iowa, Kansas, Minnesota, Virginia, California, Oregon, South Carolina, Michigan, Wisconsin, Illinois, Ohio, Massachusetts, New York and Oklahoma.

The Interstate Commerce commission met the state railroad commissioners half way with respect to co-operation between the state and commercial commissions in the physical valuation plans. In addition to the valuation committee, the commissioners agreed to keep in touch with the state commissioners through a member of the executive committee of the state commission investigating who is to act for that body. Charles S. Staples of Minnesota was selected to act in this capacity.

The state commissioners say that in making the valuations they realize that proper rate making is the real object of the valuation and that they wish to do their part in enabling the states to make use of the power given them by the Minnesota rate case decision. The state commissioners in Washington today expressed great satisfaction over the fact that the Interstate Commerce commission welcomed as readily their plan of co-operation in valuation of railroads.

Plan to Form a Society for Better Schools

Superintendent James E. Delsell of Lincoln, chairman of the Nebraska state organizing committee of the Fourth International Congress on School Hygiene, which is to be held at Buffalo the last week in August, has received a letter from Dr. Thomas A. Storey of the College of the City of New York and secretary-general of the congress, suggesting the continuance of the state committee for the purpose of establishing a permanent organization in the interest of better school hygiene.

In his letter Dr. Storey writes: "The various state organizing committees are serving a useful and important purpose in their relation to the progress and success of this congress. But it would be a pity for these committees to go out of existence as soon as this congress becomes a thing of history. The service they render this international enterprise is small in comparison with the service they might render society in general if they were to effect a permanent organization in the interest of better hygiene conditions in all the schools of our country. Let me urge you then to use your committee as the nucleus of a state organization whose object shall be the acquisition and conservation of the health of the school child."

All the foregoing organizations are also being urged to send delegates to the Buffalo congress. The congress is open to all persons interested in improving the health and efficiency of school children.
