ROCK ISLAND OFFICIAL FINDS IOWA CROPS FINE

Assistant General Manager Smalley of the second division of the Rock Island, with headquarters at Topeka, Kan., accompanied by his wife, daughter and two sons, arrived in Omaha after having spent two weeks touring Iowa in an automobile. From here they went home on the train.

Mr. Smalley visited every portion of Iowa touched by the Rock Island lines, and everywhere, he says, he found crops in good condition. Farmers have finished the harvesting of a large crop of small grain, and corn, considering the long hot and dry spell, looks good. Rain, he says, is badly needed, but generally corn can stand another week of the drought without suffering any great amount of damage.

It is used to actually build facial tissue, besides noticeably restoring youthful contour, color and appearance instantly. If this be true, none of us need worry over the ravages of Father Time.

Shamp Looks Up New Co-operative Plan

C. L. Shamp of the Central Labor union and member of a special committee of labor organizations which is planning the establishment of co-operative stores in Omaha, went to Kansas City to investigate and bring back a report on the advisability of establishing at least half a dozen such stores in Omaha.

"We have no intention of starting fifty cheap or ten better stores," Shamp said, "but we intend to buy out several of the storekeepers now in business and gradually increase until we will be eventually catering to the majority of the people."

The plan of the co-operative store boosters is to sell stock in their stores, probably a share each to a great many people, and then to sell goods at a profit which will merely be covering the operating cost.

The wounded man was cared for and all were then arrested and locked up.

Light Rain Falls in Some Parts of State

Some rain fell in Nebraska Tuesday night, according to reports to the roads, but it lacked much of being general. Fairly heavy showers were scattered over Northwestern territory west of Long Pine and up along the Bonsteel branch. On the Burlington there were numerous showers up through the Alliance country, but none in other portions of the state. Railroad reports indicate that in the western portion of the state and in the central and western parts of the South Platte country corn is beginning to feel the effects of the hot and dry weather. Pastures are rapidly drying up and feed for cattle and horses is said to be getting scarce.

THIS IS THE WAY THEY DO IT

Fake Reformers Shun the Truth and Shame the Devil.

NEW ASSAULT ON THE CHARTER

Charter Writers Accused of Monkeying with State Standard for Cream Tests—Much Surprised to Hear They Did.

One of the fake reform newspapers which has instructed its scribes to "dig into the home rule charter and find something we can fight it on," publishes under a Lincoln date line, an inspired yarn about the "steel-riveted charter" in which the charter convention is credited with "flirting" with Food Commissioner Harman.

The "story" charges the charter convention with attempting to evade the

state law regarding the percentage of butter fat which shall be in cream sold here. Harman himself lets loose a fine flow of oratory in which he repeats his oath of office and grandiloquently asserts he'll enforce the state law to the letter, regardless of charters, etc.

Members of the charter convention are surprised to learn that they changed butter fat standards. They understand that the city commission has under consideration an ordinance which will, when passed, if passed at all, provide for tests here under the state standard. The city commission has had this ordinance under consideration for some time. The charter convention never considered butter fat or milk testing standards.

"That article is an example of the sincerity with which the fake reformers are fighting the home rule charter," said a member of the charter convention. "It may be pure misrepresentation on the part of the fake reform organ. It looks like it is. That is the manner in which the fakers fight. But as to the food

OMAHA GRAIN MART ACTIVE

On Dry Weather Reports Opens Two Cents Higher.

NEW WHEAT RECEIPTS HEAVY

Bulls Have Their Own Way on Corn and Oats, Pushing Up the Futures and Buying for December Delivery.

Wednesday was another busy day on the Omaha Grain exchange, nearly 100 cars of new wheat having been on the market, considerable of which was on the open board. It was about the first day since new wheat has been coming that the speculators had a chance to get quick action on their money.

Owing to reports of dry weather and high temperatures, wheat opened close to 2 cents above the close of Tuesday, holding the advance all through the session, with a strong tendency to go higher.

Buying was spirited on September delivery, with the December option strong. Corn followed wheat, by some this being said to be due to sympathy and by others on account of the possibility of a short crop in some of the heaviest producing states.

The oat market was strong on reports of the yield not being up to what had been reported earlier in the season, when grain men were talking bumper crop. Grain men who have watched the market say that December oats are a good buy and that the price is bound to go higher.

ECONOMIC LEAGUE TO LIST SPEAKERS IN THE GAS FIGHT

A WOMAN'S WISDOM.

The worried mother wakes up to hear her baby's heavy breathing—a little cough—perhaps the croup or whooping cough. She does not want to send for the doctor when perhaps the trouble does not amount to much. Finally she thinks of that medical book her father gave her, The Common Sense Medical Adviser, by R. V. Pierce, M. D. She says "Just the thing to find out what is the matter with the little dear." Two million households in this country own one—and it's to be had for only 31c. in stamps—1,000 pages in splendid cloth binding. A good family adviser in any emergency. It is for either sex. This is what many women write Dr. Pierce—in respect to his "Favorite Prescription," a remedy which has made thousands of melancholy and miserable women cheerful and happy, by curing the painful womanly diseases which undermine a woman's health and strength.

"My desire is to write a few lines to let you know what your valuable medicine has done for me," writes Mrs. MARGARET ZUBERT, of 323 S. Benton Street, Baltimore, Md. "Before the croup came to our house I was a very sick woman. I wrote you for advice which was kindly given and which made me a different woman in a short time. After taking the first bottle of 'Favorite Prescription' I began improving so that I hardly knew I was in such a condition. I did my own housework—washing and ironing, cooking, sewing, and the worst of all nursed three children who had whooping cough. I hardly knew of the advent ten minutes before—so easy was it. The baby is as fat as a butter-ball. Dr. Pierce's Favorite Prescription is the best medicine for any woman to take when in this condition. I recommend it to all my friends."
