RAILROAD EARNINGS GROW

Net Receipts of Transportation Lines Show Big Increase. THORNE PRESENTS FIGURES

Low Commission Says Statements Presented by Carriers Do Not Reveal Facts—Earnings Double in Fifteen Years.

DES MOINES, Ia., March 9.—(Special.)—American railways will be put on the defensive this week before the Interstate Commerce commission in the matter of their demand for higher freight rates in the eastern districts.

Revenues Are Sufficient. Mr. Thorne claims that their own reports show that the railroads have already a sufficient revenue, that their revenues have been steadily increasing and are higher now than ever before.

Carriers' Figures Contradicted. A direct issue is raised on the question of adequacy of revenues. Mr. Thorne's figures are contradictory of those given by the carriers.

Capitalization Basis Unfair. The Interstate Commerce commission has declined to take as its basis the capitalization which does not represent either value or investment, but a valuation is now in process, and until that is completed it will not be possible to have a basis for rates.

Increase in Earnings Enormous. The net revenues of American railways for the five-year period ending with 1913 were approximately 3 per cent greater than in 1899; the increase during the next five-year period was 7 per cent; the increase in the next five-year period was 64 per cent over 1899; the net increase was 11 per cent in 1913 this increase over 1899 was 150 per cent; in 1911 it was 153 per cent; in 1912 it was 124 per cent, and in 1913 it was 147 per cent.

Statistics prepared here by Mr. Thorne and taken to Washington for presentation to the commission commencing today will show the revenues of the railroads to be increasing and sufficient, and no good reason existing for the demand for an increase in freight rates. It will now be up to the railroads to discredit the statistics or to make a counter showing of need of more revenue for some other reason.
