If Kidneys and Bladder Bother

Take Salts to flush Kidneys and neutralize irritating acids. Kidney and bladder weakness result from uric acid, says a noted authority. The kidneys filter this acid from the blood and pass it on to the bladder, where it often remains to irritate and inflame, causing a burning, stinging sensation, or setting up an irritation at the neck of the bladder, obliging you to seek relief two or three times during the night. The sufferer is in constant dread, the water passes sometimes with a scalding sensation and is very profuse; again, there is difficulty in voiding it.

"It may be a double-cross," the senator replied, recalling the "sting of ingratitude," and how his patronage is going to waste.
