Features of the Trading and Closing Prices on Board of Trade.

Prices on Beard of Trade. CHICAGO, March 25-Corn today jumped higher than at any time since becomber is. Transactions can into mil-home of bushesia and brought severe pun-ishment to speculators who had been ag-gressive in selling the market short. The outcome was a stoady close at an ad-vance of 'birle to l'adlike to ind?sc, oats up 'sg?sc to 'sc, and provisions the same as Saturday night to a rise of 5c. It was the weat and south that started to indicate that cash bayers in both di-rections had become not only unable to subject to first reports, that bidding above the market dig not bring any ma-terial increase of offerings from rural holders in Iowa and Illinois. Des Moines was add to be tendering unsuccessfully was add to be tendering unsuccessfully was twould be equal to 'l cents at Chi-age for corn to go west. attempting to cover extensively about midday, the fact was disclosed that the market had been hopelessly oversold. Commission houses were in possession of the whole pit surplus, and there was no way out of the difficulty but for the leading beam to give up the fight. Profit taking on the pars of bolders allowed the market finally to recede somewhat for the top prices of the section. When played second fiddle to corn and a rather slow secand at that. As in corn there was too much short selling early, and a scramble to cover later on A big decrease in the visible supply had con-siderable to do with the tightening of the market. Attention was also given to southwestern reports of foreign bids for new wheat and th talk of a certainty of future of low supplies for the mills northwest.

northweat. Oata developed strength with corn. Trading, however, was not nearly so ac-tive as in the coarser grains. Provisions form ed no exception to other staples in responding to the corn bulge Longs took advantage of the situation and indulged in realizing to a moderate extent.
