

Nebraska
NEW FIRMS ENTER LISTS
 Million Dollar Ranch Incorporated by Its Owners.

NEW BASE BALL ASSOCIATION
 Norfolk Franchise Owners Incorporate with Capital Stock of Ten Thousand Dollars—New Bank in Sheridan County.

(From a Staff Correspondent.)
 LINCOLN, April 8.—(Special.)—Several corporations filed their articles with the secretary of state today. Among these are the following:

The Black Ranch company of Theford in Thomas county, with a capital stock of \$100,000. It is owned by A. L. Black secretary and Frank T. Braden treasurer. These with Fred G. Braden and Mrs. Hattie P. Black compose the board of directors.

The Norfolk Base Ball association incorporated with a capital stock of \$10,000, divided into 1,000 shares. The club has recently joined the State league, taking the place of Fremont. The incorporators are E. W. Smith, president, W. H. Hall, W. J. Stafford, E. L. Mulligan, Fred Koerber and R. L. Beveridge.

The Warfield Advertising company of Omaha with a capital of \$10,000 in corporation with James Balesman and Thomas O. Warfield as incorporators.

New Investment Company.
 Allen L. Powell of Sterling has written to the State Banking board to see what will be required in order for a company of which he is a member to get in under the state law regarding investment companies. His company will be known as the American Co-operative Investment and Loan company, limited, with headquarters at Sterling. It plans to run something along the line of a building and loan association, except that the time of the contracts shall run ten to twenty-one years, according to the payments, with a guarantee that the interest shall not exceed 2 per cent a year. The series runs in million-dollar amounts.

Lake-side Bank.
 Articles of incorporation of the Lake-side State bank of Lakeside, in Sheridan county, have been filed with the State Banking board. The capital is placed at \$100,000, and the incorporators are: H. C. Peterson, Fred W. Black, Jacob J. Herrman and Charles C. Jamison.

Tobey Will Run.
 George F. Tobey, who four years ago was a candidate against Will Hayward for the republican nomination for congress in the First district, has publicly announced that he will again contest for the nomination this fall. Mr. Tobey was private secretary to Senator Burkett for several years, but resigned during the senator's last term and came home and engaged in business. Wilbur Anness of Duncan has already filed for the same nomination and if no others get in the fight it will be up to one of these men to defeat the democratic nominee.

State Contracts Up.
 The State Board of Control is having its quarterly bid letting, although most of the contracts, except those covering perishable goods, will be let this time for six months. A large number of bidders are present.

Passes Up This Task.
 State officers like to give information whenever they are able to do so sometimes their wit is taxed to the utmost to furnish some of the information wanted by those who think that a state officer has nothing to do but act as a general information bureau. This morning State Auditor Howard received a letter from George E. Pinto, manager of the National Farmers' exchange, Omaha, asking him to furnish him with the names of all the farmers in the state, divide them into counties and give their rural route number. The auditor would gladly do this if he thought he could get them all, but he hates to leave out anybody and may turn over the job to someone else.

JANSEN URGES NEBRASKANS TO CONTRIBUTE TO EXPO
 (From a Staff Correspondent.)
 LINCOLN, April 8.—(Special.)—Peter Jansen, president of the Nebraska Temporary Panama-Pacific exposition, has issued the following statement:
 To the People of Nebraska:
 The Panama canal has been built and completed by the American people. Every American citizen has a right to feel a just pride in this, the greatest of the world's achievements of a continent. It will change the map of a continent, will revolutionize trade and result in great commercial benefits to all the people of the United States.

In order to fittingly celebrate this momentous event, the city of San Francisco has been selected by a vote of the states as a place to hold a great world's fair or international exposition, where the peoples of the earth will meet and exchange felicitations upon a great epoch in the world's history.

The arrangements for this great international festival are now well under way; the state of California and the city of San Francisco are spending millions of dollars for the visitors they expect. Railroad companies have agreed to grant very much reduced round trip rates and hundreds of thousands of people from the various states and Europe will pass through Nebraska on their way to the Golden Gate. Besides, thousands of our own people will go out there to see the beautiful exposition and the wonders of the Pacific.

In order to provide for our own people a home and a meeting place and to show visitors the great advantages and resources of our state, it is of the utmost importance that Nebraska should be creditably represented at this gathering of states and nations by having its own building.

A beautiful site has been selected and deeded by the officials of the exposition to the state of Nebraska.

The governor of Nebraska, Hon. J. H. Morehead, realizing the importance of united action, has appointed a temporary committee, of which he and the state officers are members, to devise a plan by which the necessary funds for the erection of a state building and the maintenance of the same can be raised. It is estimated that at least \$50,000 should be provided for this purpose.

It is proposed to make a state-wide appeal and to give everybody an opportunity to help along this most laudable and patriotic cause.

You will be solicited by accredited persons to make your contribution, be it large or small. All banks will have subscription lists and will receive and receipt for donations. All commercial clubs

Nebraska
 will be asked to exert their influence on behalf of this cause. All moneys will be disbursed by vouchers, duly signed by the proper officials, and at the termination of the exposition a full report of the money collected and of the expenditures will be made to the public.

It is proposed to use moving pictures as a means of showing the agricultural wealth and resources of our great state, and also our various industries, public buildings, cities, etc.

Cheyenne County Farmers Busy with Their Spring Work
 (From a Staff Correspondent.)
 LINCOLN, April 8.—(Special.)—The telephone hearing had its second inning before the State Railway commission today. Some time ago the Lincoln Telephone company made application to the commission for a raise in rates at the York plant and a hearing was had, in which parties interested in creating a sentiment against the responsibility of the commission's engineers demanded that an independent engineer be sent to York to make an independent valuation of the plant.

In order to satisfy the demands of these parties the commission granted the request with the provision that the York people should select a good man, and the commission in order to satisfy all criticism would pay the bills of the engineer selected.

Attorney Brandeis of New York was appealed to to give the York people the name of a good man, and he proposed a well known engineer, Bemis of Chicago. Mr. Bemis agreed to make the valuation and was to receive \$5 a day and an assistant who should receive \$25 a day in addition. In due course of time the commission received word that Mr. Stone would make the valuation, and since that time Mr. Stone has been working upon the plant.

When he made his report to Mr. Bemis the latter sent the report on to the commission and in checking it up the engineer's mistakes. It was sent back to Mr. Bemis for correction. It was again referred to the commission and the report shows that Mr. Stone has placed the reproduction value of the York plant at \$155,981 and the present value at \$93,251. The engineers of the commission found the reproduction value at \$164,148 and the present value to be \$119,529.56.

Although it was supposed that Mr. Bemis would at least come to Nebraska once, he has failed to do so, and did not show up today at the hearing.

However, Mr. Stone was present and was on the stand most of the forenoon in an effort to convince the commission that the valuation made by him was the real figures. Mr. Stone endeavored to justify the figures he had made in the valuation in order to show why he had not taken into consideration certain expenditures which entered into the construction of the plant. His testimony developed there were many things about the valuation of telephone plants that had been used by the commission's engineers which had not been shown by him at all.

At one time he showed what an ideal plant such as would be needed at York would cost and the best service to be received for the least money. In his opinion such a plant would cost \$75,000 and the cost of maintenance should be 1 per cent.

In other words, a plant costing \$75,000 should be maintained at a cost of \$750. Twice or three times in his testimony Mr. Stone gave his opinion that 1 per cent ought to pay the maintenance cost of a telephone plant.

At another time he exploited reproduction value of a plant as the basis for rate making instead of the present value which is used by the commission. In such a case it would result in a higher rate than the commission has allowed. This has all cost the commission in the neighborhood of \$2,000, and the farther the investigation goes the more evident it becomes in the minds of the commissioners that the commission's en-

In such a case it would result in a higher rate than the commission has allowed. This has all cost the commission in the neighborhood of \$2,000, and the farther the investigation goes the more evident it becomes in the minds of the commissioners that the commission's en-

Nebraska
 were were right in their valuation placed upon the plant.

Although Mr. Stone had put in two months in making a physical valuation of the plant, when asked by President Woods, of the telephone company, if there were any dead lines connected with the York plant, he replied that he did not know, but there might be out in the country.

Graduate Nurses Meet in Beatrice
 BEATRICE, Neb., April 8.—(Special.)—The Nebraska Graduate Nurses' association held a meeting in the city Tuesday afternoon with about twenty-five nurses from out of the city in attendance. A general business meeting was held in the afternoon, and in the evening a program was given. Drs. J. P. Fall and H. M. Hesperion of Beatrice delivered addresses. The Gage County Medical society also held its quarterly meeting at the Burwood hotel, at which papers were read by Dr. Miller of Omaha, and Dr. Baehle of Barneston.

G. M. Johnston, a former Beatrice resident, died suddenly Monday night at his home at Sulphur Springs, Ark., aged 64 years. Mr. Johnston was an attorney in this city for years. He is survived by a widow and four children.

Orla Leroy Life and Miss Opal Runney, both of this city, were married Tuesday evening at the Presbyterian church. Rev. D. L. Young officiating.

CAMPBELL APPOINTED POSTMASTER OF WYMORE
 BEATRICE, Neb., April 8.—(Special.)—George Campbell, for many years a leading democrat of southern Gage county, yesterday received news from Washington, D. C., of his appointment as postmaster of Wymore. Mr. Campbell was a former member of the county board of supervisors, and for the last few years has been in the employ of the Standard Bridge company of Omaha.

Ladies! Secret to Darken Gray Hair
 Bring back color, gloss and thickness with Grandma's recipe of Sage and Sulphur.

Common garden sage brewed into a heavy tea, with sulphur and alcohol added, will turn gray, streaked and faded hair beautifully dark and luxuriant; remove every bit of dandruff, stop scalp itching and falling hair. Mixing the Sage Tea and Sulphur recipe at home, though, is troublesome. An easier way is to get the ready-to-use tonic, at drug stores, known as "Wyeth's Sage and Sulphur Hair Remedy," thus avoiding a lot of fuss.

While wispy, gray, faded hair is not sinful, we all desire to retain our youthful appearance and attractiveness. By darkening your hair with Wyeth's Sage and Sulphur, no one can tell, because it does it so naturally, so evenly. You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time; by morning all gray hairs have disappeared. After another application or two your hair becomes beautifully dark, glossy, soft and luxuriant and you appear years younger.—Advertisement.

HUDSON Six-40
 \$1750 f. o. b. Detroit

The HUDSON Leads All Other "Sixes"

The strongest advocates of the Fours admit that the Sixes lead. And the HUDSON stands head and shoulders above all other Sixes.

The highest recommendation a salesman for other Sixes knows is: "It's as good as the HUDSON."

The HUDSON Six is the standard by which other makers measure their motors, their body designs, their prices.

The HUDSON First Choice

If price, and old car allowance, and other conditions were equal every buyer would choose a HUDSON Six.

The HUDSON is always the first choice. If we would sell a HUDSON at a "cut price"; or if we offered a big "trading value" for an old car; or if we "threw in" a lot of extra equipment, every man who enters our showrooms would take the HUDSON.

Competition is not on the quality of the other car. It is on these things we refuse to meet.

You Buy Guy L. Smith Service With a HUDSON Car

When you buy a HUDSON Six you buy with it the "best service in Omaha."

Some dealers cut prices, give long trading allowances, sacrifice present profits for future repair jobs. You can expect no care of your car from such a dealer.

The honest, legitimate dealer who is in business for a fair profit and a permanent business follows every car with infinite care and service.

In Omaha the HUDSON is the 365-day-a-year car. If you own a HUDSON you can use it every day in the year.

The HUDSON a New-Type Six

The HUDSON is a new-type Six. It is different from the old style Six of big cylinders, great power and costly upkeep.

Makers of four-cylinder cars make comparisons with the Sixes of several years ago. You do not find them comparing their Fours with present-day Sixes.

The HUDSON Six-40—for example—has a small-bore, long-stroke motor. It is light in weight—2980 pounds certified railway weight. Its mileage per gallon of gasoline exceeds equivalent fours. Its tire cost, because of lack of vibration, is immensely less.

It is infinitely more enjoyable to ride in. To drive it is a revelation to one accustomed only to a Four.

Come, see these modern motor-cars. Drive a HUDSON Six and learn why the HUDSON leads. We will give you an entirely new meaning of motor-car satisfaction.
