ENGINEERS ARE VINDICATED

Completion of York Revaluation Again in Their Favor.

RAI LBOARD IS WELL PLEASED

Effort of One Member of Commission to Bring Down Discredit Upon Body Fails for the Third Time.

(From a Staff Correspondent.) LINCOLN, April 10 .- (Special.) - Settlement of the York Telephone company imbroglio satisfactorily, at a cost of \$3,000 to the state, with full vindication of the commission's engineers, brings ou tagain that three times have certain elements, taking their cue from the attitude of one of the commissioners in questioning the ability of the commission's own engineers. raised a protest and demanded that an independent valuation be made, and three times have the department engineers been vindicated.

The first time the commission's experts were criticized and their work questioned was when their figures on the Lincoln zone properties of the Lincoln plant were questioned. The attack was not only oitter, but personal as well, so much so that Commissioners Clarke and Taylor resolved to call in the chief engineer of the Wisconsin Railway commission to check up the work, and he declared that the figures were correct.

The people of Lincoln were not satisfied then, and a second attempt was made to discredit the engineers, the city of Lincoln paying \$1,000 of the people's money to hire Blon J. Arnold & Co.'s expert engineer to come here and make a revaluation of the plant. The figures found by this expert were practically the same as those found by the state's engineers, but notwithstanding this Commissioner Hall was not satisfied and spent about three months to get up a dissenting opinion, which was conspicuous entirely for its length.

This gave the people of York a chance to raise a protest against the valuation of the commission's engineers on the York plant, and as a result the people will have to pay another \$3,000, the probable cost of the York revaluation just made, which is practically the same as the valuation of the commission's engineers, to satisfy the cravings of the minority member of the committee to keep in the lime light and the effort of certain Lincoln people to try to put a public commission to the bad.

.The result of the York controversy is most satisfying to people at the state house who are well acquainted with the conditions surrounding the railway commission and the repeated efforts to dis-

MELLOR SAYS EXPOSITION WILL BE BIG AFFAIR

(From a Staff Correspondent.) LINCOLN, Apr. 10 .- (Special)-W. R. Mellor of the Temperary Panama-Pacific Exposition commission, returned from San Francisco this morning. Mr. Mellor together with Lleut. Gov. S. R. Mc-Kelvie and Commissioner Peter January left on April 1 and during their stay thoroughly examined into the present condition of the project and performed the ceremony of laying the cornerstone for the Nebraska building, which they hope to have the citizens of the state creet from funds secured by private subscription, the legislature having failed to make appropriation therefor. Thirtyfour of the states of the union have siready signified their intention of erecting state buildings.

The site for Nebraska, selected by Senator Peter Jansen two years ago is centrally located with New York and Pennsylvania only between the site and HARTINGTON MAN MAKES FILING the main exposition buildings. Just beyond to the west is Illinois with Arizona E. B. Birschman Would Be Senator and South Dakota north.

The space allotted Nebraska is 100x200 and lies on the principal thoroughfare between the principal exhibit buildings and the live stock, athletics and aviation fields. The entire tract on which the exposition is situated contains about 625 acres and is practically one-half mile of instruction for officers and nonco wide by two miles in length along the edge of the bay, a most charming loca-

The main exhibit buildings are well on their way to completion, three of them lowing officers of the regular army to being practically finished and the balit as a momument commemorative of the

More foreign countries have signified ficers from different companies of the their intention of exhibiting than were guard. at either Chicago or the St. Louis expositions. At present everything points toward the commemoration of the building of the Panama canal by this exposition to be the greatest event of the
