CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing

Prices on Board of Trade. CHICAGO, April 30.—Development of a cold export demand for new crop winter rades had a rallying influence today on grades had a rallying influence today on the wheat market as a whole. In the end prices were firm at the same as last night to 'ac higher. Other speculative articles showed a net gain all around—corn 'ac to 'ac. oats 'ac to 'ac and provisions to 29c. Export sales of new orop winter wheat here aggregated 500,000 bushels. In addition 50,000 bushels of old No. 2 hard was reported as having been sold to Baltimore for ocean shipment, with 50,000 bushels more virtually accepted.

Improved feeling on the bull side of the wheat market was preceded by a temporarily successful demonstration on the part of the bears. Lively selling that prevailed for a while was due largely to further rains in western kansas and Nebraska and to excellent field conditions in the apring corn belt, regardless of some delay in seeding in normern Minnesota and North Dakota.

Important covering by conspicuous

delay in seeding in northern Minnesota and North Dakota.

Important covering by conspicuous shorts turned corn prices upgrade after an early period of weakness. Efforts to dislodge holders of May options were for the most part a failure, although deliveries tomorrow promise to be large. Demand that appeared to be springing up in the southwest had a stimulating effect on the market here.

Quats had a raily with corn and wheat. It was said most of the deliveries of oats would be taken by shippers.

Provisions felt the effect of the revived strength in grain. During a considerable part of the day, however, prices suffered from the weakness of the hog market and from a disposition by packers to sell on the hard spots.

Quoistions ranged as follows:
