Farming and Stock Raising on Top of the Andes

the great plateau that lies between the two ranges of the Andes. This plateau runs north and south for a thouannd or more miles through and Perm I am now at the southern end of it, several hundred miles south of the region I have described in my letters from Cerro de Pasco. To reach Cerro, I had to cross the mountains at an altitude of 15,000 feet. The pass by which I came here is only 1,000 feet lower, and it was through a driving snowstorm that I slid over the mountains from the Pacific slope to the

AM at Slewani, a little town on

It took me three days by rail to get here from the ocean. My road was the Southern Railway of Peru, which is one of the best managed in the republic. Its trains start on time and get there. The ride here was comparatively comfortable. although a part of my journey was not on the express. By the fast trains it is possible to reach Coxeo from the ocean inside of three days. I am taking four, in order that I may better see the country and people. The first stage of my travels was up the mountains from the port of Mollendo to Arequipa. That city is the metropolis of southern Prru. It is 7,000 feet above the sea, and in/reaching it you cover only a little more than half of the altitude to the top of the Andes. stayed there for a day or so, and then went on to Juliaca, a town a short distance from Lake Titlenes. The latter journey requires a full day's railroad soroche at the hotel where we stopped the Southern railroad divides; one branch going southward to Puno on Lake Titicaca, and the other northward over made by the express in one day. The ordinary trains take two days, and therefore after nine hours from Juliaca I have to stop over night at Sicuani. Tomorrow I shall resume my journey to the famed city of the Incas, which is about 100 miles

Journey is Wonderful. I have already described the ride over top of the mountains is even more won- greatly improved. derful. You start from the level of Mexico City and wind your way around Mount Misti, which is more than 19,009 feet high, and at the same time you can see other mountains, such as Chachacani, which are more than four miles above the sea and which are covered with snow all the year round. Higher still there are mountains covered with glaciers and on the way up the valley to Cuzco at La which must cover many square miles. The greater part of the way is through extinct volcanues. The slope of Mount Misti is covered with great blocks of black lava and the mountains that wall this high valley in the region where I now am have Niagaras of lava which seem to have been frozen as they flowed from the craters above down the slopes. In places you look over the walls of such

eyes can reach. Vegetation is Spotted The vegetation changes the m you near the top of the Andes. As you climb the western slope at an altitude of two miles or more the grass begins to sprinkle the semi-arid hillsides, and when you cross the pass and come down to the plateau you are in a region of sod covered with tufts of wiry grass which are The plateau itself is covered with flocks a new future for the highlands of l'eru. too coarse for anything but the llamas. of sheep and alpacas. There are herds of cattle, and you see droves of llamas loaded

Farming in the Sky. And just here I want to give you an

ECZEMA ITCHED

Kept Spreading. Covered Face and Hands to Elbow. Couldn't Sleep or Rest. Cuticura Soap and Ointment Cured In a Week.

R. F. D. No. 1, Lawton, N. Dak .- "My little girl's eczema started with a sore in the back of her neck about as big as a ten-cent piece. It broke out in little pimples and they formed a circle. It itched night and day and she scratched it all the time and it kept spreading. It at last covered her face and hands up to her elbows.

HAMINA It licked and burned so she couldn't sleep nights or rest any time. It swelled her face all out of shape and her hands were swelled and she surely looked awfully as long as it was on her face. Her face and hands were as red as fire. Her clothing irritated her arms so I had to keep them wrapped with cloths

all the time. She cried with it. "She had the eczema about two weeks when I saw the advertisement of Cuticura Soap and Ointment in the paper and I thought I would send for some. I put them on right away and in a couple of days she egan to get better and she could sleep. In a week she was cured." (Signed) Mrs.

Emms Dibble, June 10, 1913. Cuticura Soap and Ointment do so much for poor complexions, red, rough hands, and dry, thin and falling hair, and cost so little, that it is almost criminal not to use them. field by dealers throughout the world. Liberal sample of each malled free, with 32-p. book on the skin and scalp. Address post-

card "Cuticura, Dept. T. Boston." sicura Soap will find it best for skin and scalp.

Mr Harry V Harlan of United States Department of Agriculture

They have all been taken up by the earth. Scattered over them are the the whites or the Cholos, and are extufts of wire grass, the new sprouts of ploited by them with Indian labor. Here a small patch of potatoes or quinus or which are occupied by the Indians, who the Peruvian desert from the ocean to barley, and there is no doubt but that do the hard work. On the nonirrigated Arequips. The journey from there to the the whole region might be plowed up and plateaus the land yields much less and

> Making Improvements, And this brings me to the movement for

the improvement of the high plateaus of the Andes, which has been inaugurated by the Peruvian corporation, a British company that has charge of the railroads for the government. This institution has sent to the United States for one of its agricultural experts; and he is now experimenting here in different places to Raya you see glaciers in 's far distance, find out the best grasses and best grains to be grown upon the plateau. The man chosen was Mr. Harry V. Harlan, the agronomist, in the barley investigations of our Department of Agriculture. He ca--- here seven months ago and is al-

ready making good progress. I met Mr. Harian at Juliaca, and went with him to some of the experiment stations. He has one little farm of four or five acres right pear the railroad, and this has been rock a thousand feet high, and above planted to cereals and grasses of varithem see glaciers on mountains that are ous kinds. He showed me one plot of their owners or in charge of them for more than four miles in height. At times burley consisting of perhaps fifty rows, their masters, I never get tired of watchthese mountains ruse up like a great each from seed gathered from a different white rampart of irregular shape, kissing the sky; and again they extend in a saw-tooth construction as far as your and some from Russia and the western and some from Russia and the western the streets of the villages and droves of of the villages a rows were of seeds from Manchuria, the town. They are, in fact, the freight high plateaus of India, and others were trains of the high Andes, and they compete with the railroad. They carry grain, barieys are growing well and many of vegetables, hides, alcohol, cora leaves vegetables, hides, alcohol, cora leaves them far better than that from the native and goods of every description. Many Peruvian grain. There seems to be no of them are used to transfer the ore from doubt but that almost any kind of hardy the mines to the smelters, and the farmexperiments of Mr. Harian may open up the towns and railroads.

Soll in Rich. The soil of the plateau is almost free backs, the burden being tied on like with goods of one kind or another be- from stones. Its soil is rich, that of this saddle, and not in panniers, as upon the sides of the valley are the remains farmed. The Indians use plows made of the cultivation of the Incas. There of wood that cut the ground to depth These terraces were walled with stone, they did generations ago. Nevertheless and where possible the water was car- they grow fairly good crops, and with ried from level to level. In many places deep plowing large crops of barley might the terraced farms had no water and the be produced.

crops grown depended upon the scanty I talked with Mr. Harlan about the out on the plain, and he showed me the sod. It is a compact turf made of short native grasses, mixed with the wild clover that lies close to the ground.

It seemed to me very poor, but Mr. Harian says that the sheep and alpacas and liamas live well on it, although it is short for the cattle.

through the brown soil. I saw patches have long ears that stand up like those of Russian grasses that were growns in the luxuriantly and also wheat grasses from western plains, as well as one of the families of blue grass that thrive on the high plateaus of the Rockies. So far the high plateaus of the Rockies are grassed enough to experiments are not advanced enough to out food or water. Many of the farms make decided predictions, but there is no doubt, but that a great improvement can railroads, and a llama has often to make

Depend on Rainfall. farming it would not be sufficient for

wheat. It relates mostly to the pampa.

which is 13,000 feet high.

It is different where the soil can be irrigated. Everywhere along the railroad from the sea to the tops of the Andes there are irrigated valleys. On the western slopes the water supply is poor, and the streams are small, but a little water makes the desert a garden. The Chile river is one strip of green all the way from the sea to the tops of the Andes. and about Arequipa it raises wheat, barloy, corn and all of the vegetables and fruits of the tropic and temperate sones. Crossing over the coast range and coming into the plateau, you find cultivated lands along both sides of the Vilcanota river all the way down to Curco. The valley in the plateau is in fact a series of tittle gardens of Eden, the water being carried out over them so that it falls from level to level. The fields are in terraces that are now green with luxuriant crops. In coming here to Sicusti I saw many patches of barley, potatoes and

Idea of the farming that goes on away beans; and also hundreds of little fields by the Indians to spin thread and make

Use Mud Fences

which are eaten by the stock and the the lands are often divided by mud coarser shunned by all but the llamas. fences. The fields are consecutive, and Here and there near every Indian hut is you see the villages made of mud buts the greater part of them are given over to pastures. Here you find hundreds of Indian squatters, each of whom has his little mud but, with a corral or so made of stones or mud into which his flocks are driven at night. He may have two or three acres of potatoes or quinua, and perhaps a small patch of barley, but as a rule the crop is grown only to supply his own needs. The methods of such farming are crude to an extreme, but the patches seem clean and the Indians work

Stock Chief Industry. chief industry of this great plateau of the Andes is the raising of stock. I have seen millions of sheep on my way across the plateau, and tens of thousands of alpacas, Hamas, as well as many horses, cattle and donkeys. The donkeys and liamas form the beasts of burden, and you see them driven in long caravans over the plain, followed by indian men and women; who are either them line the plazas of every city and borley will grow on the pampas, and the ers employ them to take their goods to

Elsie-Mamma, I don't feel well.

The vicuna wool is finer than that of the alpaca, and it brings a high price. There is so little of it, however, that it is hardly worth mention, much of the vicuna cloth, so-called, being made of alpaca wool. The vicunas are yellow in color, and their woolly fur is as soft as that of a seal. For this reason their skins are used to make the rugs so highly prized by the tourists. These rugs vary in value according to the part of the animal from which the pieces of skin come. A rug made from the necks or legs is much more valuable than one from During my visit to South America fifteen years ago I bought a beautiful rug in La Paz, Bolivia, for about \$20 in gold. am told that similar ones will now

possible it is the duty of every woman to be always at her best. Begin taking three grain hypo-nuclane tablets, which are obtained in sealed cartons with directions, and continue until your weight is satisfactory. Frequently a two months treatment adds 15 to 30 pounds, besides adding more color to the cheeks and lips and a sparkle of health to the eyes.

Mrs. O." writes: "Kindly publish again the prescription for rheumatism which you gave to "Ted" some time ago."

Answer: I shall be very glad to repeas the formula. Get at the drug store the following ingredients and mix yourself, taking a teaspoonful at meal times and at bedtime: Iodide of potassium, 3 drams; sodium salicylate, 4 drams; wine of colchium, one-half oz.; comp. essence, cardiol, I oz.; comp fluid balmwort, I oz.; and syrup sarsaparilla, 5 ozs. This is my favorite prescription for rheumatism.

"Charlotte" writes: "Some time ago you answered through your columns tell-ing "Marie" how to cure had cough and cold. Will you kindly repeat the for-mula?"

Answer: I shall be very glad to repeat the formula for you. Get from your drugglat a 2½-os. package of essence mentholaxene and mix with honey or homemade sugar syrup and take according to directions given on the bottle. This is a very mild laxative and will surely overcome your cold in a few days at most. It is absolutely harmless and very pleasant to take.

"P. R. writes: "What can you pre-scribe to relieve dyspepsia, which annoys me very much? I have pains and heavy lumplike feeling after cating, sour ris-ings, nausea, etc." Answer: A three-course treatment, tri-

"Mary"-You can easily correct your little girl of bedwetting by mixing 1 oz. of comp. fluid balmwort, 2 drams tinc-ture rhus-aromatic and 1 dram tincture cubebs. Mix thoroughly and give in opentine tablets, is very effective in lieving and permanently overcomi stomach distress due to indigestion. ut one hour before each meal, G. O." writes: "I am constantly hawking and spitting on account of a bad case of catarrh and would like your advice to overcome it."

"John W." writes: "Being past middle age and observing that my nervous system is in bad shape, I write for a prescription. I do not gain strength from my food, am weak, listless, forgetful, sleepless at times, tired, and unable to act the part of a strong man or health, such as I was at one time." Answer: I always prescribe antiseptic rilane powder, which you can obtain in either a 2 or 8-ounce box with full directions. The results please all who try it. "Sadie" says: "I misplaced the pre-scription you sent me for dandruff and itching scalp. Will you please send it again."

Answer: Get from a well-stocked pharmacy a scaled tube of 3-grain cadomene tablets, which are especially made for those needing a strong, harmless, rejuvenating tonic. Astonishing and pleasing results follow and life and hope are renewed.

"Mrs. De V." asks: "I should like to ask you how one can reduce the weight. I am too large, and last summer suffered on acount of excessive fat. Can you advise a remedy, harmless and safe?" "Nina R." writes: "Please advise me what to take to overcome extreme thinness. My arms and bust have no development and my face is so thin that it is positively homely, although my features are regular."

Answer: I have frequently prescribed a liquid remedy, but, owing to its disagreeable taste, I am now prescribing the same formula in a tablet form. It is called 5-grain arbolone tablets and is gold by druggists in sealed tubes with full directions for home use. I advise anyone who is too fleshy to try this excellent tablet.—Advertisement.

\$50.00 REDUCTION On All Brand New

Kranich & Bach **Ultra Quality**

Answer: There is nothing better for dandruff and itching scalp than plain yellow minyol, which is sold in 4 oz. jars at any well-stocked drug store. Use this according to directions and you will soon be relieved of all diseases of the hair and scalp.

"Nina R." writes: "Please advise me what to take to overcome extreme thinness. My arms and bust have no development and my face is so thin that it is positively homely, although my features are regular."

Until May 15th Only!

The great offer of the Kranich & Bach factories to reduce standard prices \$50 on every instrument from April 15th to May 15th is meeting with the largest success that has been realized in the piano business for many years. The scope of this sale is National, therefore people readily realize its significance.

The great house of Kranich & Bach builds pianos unsurpassed for beauty of design, delicacy of touch-rare excellence and power of tone. Expert talent, plus fifty years' experience must be considered in favor of the Kranich & Bach piano. The Kranich & Bach idea and practice is to build the finest pianos possible.

The temporary reduction places these pianos in a class by themselves; no equal piano value for the money is obtainable today, When you buy a Kranich & Bach, you buy once in a lifetime, and surely it is well to know in advance that you will be permanently satisfied.

You like the Kranich & Bach tone the more you hear it. It mellows with age. Come in and let us show you this beautiful line, in cases embracing all the modern finishes. We show prices below on three popular Kranich & Bach styles.
