Believing that our employees, especially the girls and women, are entitled to rest and recreation these suitly evenings we freely and gladly agreed with other progressive merchants to close this store at 5 p. m. on Saturdays during August. You want shorter hours for yourself—why not assist these girls to get it by shopping in the day time rather than the night time?

MILLIONS FOR BANKS OF WEST

McAdoo Will Deposit Government Funds to Help Move Crops.

REQUIRES 2 PER CENT INTEREST

Federal, State and Municipal Bonds Accepted as Security—Prime Commercial Paper is Also Acceptable.

WASHINGTON, Aug. 1.—Twenty-five to fifty million dollars of government funds will be deposited in the national banks of the south and west at once by Secretary McAdoo to facilitate the movement of crops.

The motive of Secretary McAdoo in establishing this policy is to anticipate the money stringency in the late summer and fall, which invariably accompanies the marketing and movement of crops, especially when they are unusually large, as the harvest now beginning forecasts.

U. S. Bonds as Security. In a statement tonight, the secretary made the significant announcement that government bonds would be accepted at par as security for the new deposits and that the additional money would be placed only with banks which have taken out at least 40 per cent of their authorized circulation.

For the first time in history the government will accept prime commercial paper as security for deposits. This privilege will be granted, announced the secretary, in order to make these special deposits available to banks on securities readily within their reach.

Approval of Paper. "The commercial paper submitted," added Mr. McAdoo, "shall first be passed upon and approved by the clearing houses committed of the cities in which the banks offering such paper may be located. All commercial paper and bonds must be passed upon finally and accepted by the secretary."

Approved commercial paper will be accepted as security for the deposits at 60 per cent of its face value, and high class state, municipal and other bonds, exclusive of government bonds, at 75 per cent of their market value.

The additional deposits will be placed with the national banks in the two or three principal cities in each of the states where harvesting now is in progress and where the demand for money for moving the crops most conveniently can be met.

Return of Money. The banks will be required to return the money to the public treasury when the crops have been moved. The present suggestion is, Mr. McAdoo said, that "if per cent be repaid in December, 30 per cent in January, 20 per cent in February and 25 per cent in March next."

"Steps now are being taken to carry out the plan," added the secretary, "so that the funds may be available promptly for the movement of the crops."

The names of the banks to receive the deposits and other details of the arrangement will be announced later.

This new policy is the synthesis of that adopted by former Secretary of the Treasury MacVeagh, who a year ago declined to make government deposits to relieve the tight money market on the ground that the moderate surplus of federal funds at that time should be held as a reserve to be utilized at some possible critical stage.
