A scheme of international policy at once more ill-judged and short-sighted could hardly have been devised. From every point of view it was positively senseless. It proposed precisely the things which wisdom and duty told us plainly not to do. To start with, it bore out the hurtful contention that our ultimate aim is the domination of the residue of the continent south of us. It asserted a police power which cannot be maintained except at enormous cost, physical and implying vast moneyed responsiaggression, meancing to our liberties at home and our peace abroad.
