direct, positive, certain in its influence. It is one of those rare medical forces which act in the blood with the same degree of certainty that is found in all matural tendencies. The manner in which it dominates and controls the mysterious transference of the rich, red, pure arterial blood for the impaired blood is marvelous.

Out through every skin pore acids, germs and other blood impurities are loresd in the form of invisible vapor. The lungs breathe it out, the liver is wilmulated to consume a great proportion of impurities, the stomach and intestinas cease to convey harmful germs into the blood; the bowels, kidneys, hadder and all emunctories of the body are marshaled into a fighting force to expel every vestige of impurities.

Six Girls Make Dress in Twenty Minutes

PARIS, Sept. 8.-Tube travelers who were recently astonished to see six young women hurriedly cutting and making a fashionable gown while riding in a tube train, have learned that the unusual performance was the result of a wager that the mindinettes could not fashion a dress complete during a trip from the Porte d'Orleans to the Porte De Clignancourt a twenty-minute journey.

The design was submitted to the dress makers as they boarded the train, and as soon as they had taken their places the six fell to their task in whirlwind fashion. Two of them made sleeves, another the body, a fourth the skirt, while the fifth and sixth attached hooks and eyes and trimmings. As the train drew up at Clignancourt the girls stepped from their car and held out the finished dress with a shout of triumph. The dress is of pink chiffon, designed

in the latest style, with a draped tunic and lavish ornamentation.
