Ground Dry and Hard.

All the machines operated under one disadvantage. The ground was very dry and very hard, and the dryness and the hardness made it a difficult matter to turn furrows smoothly, in such a way as to cover all trash. It must be said, however, that taking everything into consideration, the excellent work done far transcended anything that might reasonably be expected.

Tomorrow is Douglas county day.

Caring for Crows.

Creates Central Bank.

In their minority report on the bill the republicans of the committee pointed out what they held to be the weaknesses of the measure. They said they found the democrats of the country "so bound by their caucus action that they could not consider amendments to the bill, which, if adopted, would have eliminated its unsound and questionable provisions."

They suggested that the provisions compelling national banks to subscribe for the capital stock of the federal reserve banks on pain of forfeiture of their charters, was "of doubtful constitutional validity and wholly unnecessary and inexpedient."

If the plan of the bill is a good one, they said, the banks would gladly participate; if not, should the banks refuse to enter the system, "all business would be disastrously affected." The republicans declared the provision making the new federal reserve notes "obligations of the United States" practically creates a central bank. They urged that the powers of the federal reserve board were too great and that "there is great danger as the bill is now drawn, that the banking business of the country may be used for partisan political advantage."

The progressive views of the currency question were set forth in a report on the Glass bill filed several days ago by Representative Lincoln of Minnesota, the progressive member of the committee.
