SIXTY-FIVE PER CENT OF NORMAL

Yield Per Aere Shows Decrease of Seven Bushels Below Last Year-Figures on Wheat and

WASHINGTON, Oct. 2.-With the gar nering of the crops of the country, the Department of Agriculture today continued its preliminary estimates of the production of these crops in the October report of the Crop Reporting Board, of its Bureau of Statistics. The report, compiled from reports of correspondents and agents of the bureau and issued at 2:15 e'clock this afternoon, announced preliminary estimates of the production of spring wheat, all wheat, oats and barley and estimated, from condition reports, the prospective total yield of corn, potatoes and tobacco.

Details of the report, with comparisons for other years (condition figures) relate to October 1, or at time of harvest), follow:

normal compared with 65.1 per cent on 1912, and 80.6 per cent the ten-year aver-22.2 bushels, compared with 29.2 bushels bushels harvested last year, and 2,531,000,- yield of the stock." 600 bushels harvested in 1911.

Spring Wheat: Indicated yield per ore, 13 bushels, compared with 17.2 garding the policy of the company. bushels last year, and 13.3 bushels, the average yield, 1905-12. On the planted area 18,662,000 acres, it is preliminarily estimated the total final production will be 242,714,000 bushels, compared with 230,248,-000 bushels harvested last year and 190, 632,000 bushels harvested in 1911. Quality, a ten-year average of 26.9 per cent.

All wheat-Indicated yield per acre, 15.2 bushels harvested in 1911.

is preliminarily estimated the total final strangely. Members of the crew became production will be 1,122,123,000 bushels, alarmed, compared with 1,418,337,000 bushels harvested last year and \$22,295,000 bushels it was plastered with strange looking harvested in 1911. Quality, 80.1 per cent fish, extended to the keel plates. of a normal, compared with a ten-year average of 87.1 per cent.

bushels, compared with 29.7 bushels last mediately resumed its speed. year and M.5 bushels, the average yield 1908-12. On the planted area, 7,255,000 acres, it is preliminarily estimated the total final production will be 175,301,000 bushele, compared with 223,824,000 bushels harvested last year and 160,240,000 bushels harvested in 1911. Quality, 86.4 per cent of a normal, compared with a ten-year

September 1, 1913; 85.1 per cent in October in the trial of Williard Arney, charged last year and 76.4 per cent the ten-year with the murder of Highshew. It was average for October. Indicated yield per the theory of the state that Booker was acre, \$6.7 bushels, compared with 113.4 with Arney when the crime was commitbushels harvested last year and 96.1 bush els the average yield per acre 1908-12. On the planted area, 3,685,000 acres, it is estimated from condition reports the total final production will be 319,000,000 bushels, compared with 421,000,000 hushels harvested last year and 232,000,000 busbels harvested

Tobacca-Condition, 78.6 per cent of a normal, compared with 74.5 per cent on September 1, 1913, 81.8 per cent in October, iast year, and 63.1 per cent the ten-year average condition for October. Indicated yield per acre, 765 pounds, compared with 786.5 pounds harvested last year and 822.3 nds, the average yield per acre, 1908-12. On the planted area, 1,144,500 acres, it is estimated from condition reports, the topounds, compared with 963,000,000 pounds arvested last year and 905,000,000 pounds barveated in 1911.

Plax-Condition, 74.7 per cent of a nornal, compared with 749 per cent on September 1, 1912, 83.8 per cent in October, hat year, and 78.3 per cent the October average for the last ten years. Indicated yield per acre. 2.7 bushels, compared with 2.8 bushels last year and 3.3 bushels, the average yield, 1906-12. On the planted area, 2,425,000 acres, it is estimated, from andition reports, the total final produc tion will be \$1,000,000 bushels, compared with 28,000,000 bushels harvested last year and 19,900,000 bushels harvested in 1911.

Apples-Confiltion, 46.6 per cent of a normal, compared with 47.7 per cent on September 1, 1913; 67.8 per cent in October last year and 54.1 per cent, the October average condition for the last ten
