

GRAIN AND PRODUCE MARKET

Many Things Work Against Higher Level of Values.

BULLS WATCHING THE WEATHER

Chicago Traders Are Bullish on Corn—Every Time They Lift the Market Up It Proceeds to React.

OMAHA, Jan. 4, 1913.

Poor absorbing power was disclosed in the wheat market yesterday, which, together with other influences, worked against a higher level of values.

Reports from the winter wheat districts indicated that the greater part of the 1912-13 crop of the Mississippi river and received more of the moisture and that the condition of the wheat in this region is now seasonably satisfactory.

In the northwest region, the crop is better, and the plant is still unprotected from severe winter weather.

In Missouri, the ground is as dry as a bone, but warm weather is said to have saved the wheat up to date, but a hard freeze without rain or snow, it is claimed, would do considerable damage.

In those sections the farmers are hauling water for stock and other purposes because of the extraordinary dry spell.

In parts of our own state the growing wheat is reported in excellent condition. The great winter of damage reports which have come in during the last few days have caused more or less apprehension and up to yesterday's close the leading factors in creating a liberal buying movement in the speculative market.

The market was generally surprised at the condition of wheat as indicated by the Oklahoma state crop report which gave an almost perfect condition.

Authorities in the northwest are of the opinion that winter wheat as yet, but that rain will be needed soon to maintain that condition. The average in that state is large.

Wheat bulls are watching the weather over the winter wheat states of the north, which is the only place where uncertainty is shown in west of the Mississippi river. The deficit from September 1 to the present is estimated at 1.15 inches. There are spots, however, where an excess is shown, Omaha being 1.14 inches above the normal 7.62 inches.

Cash wheat unchanged to 1/2 higher. There are half a dozen corn and soybean markets, but it is noticeable that every time they lift the market, it comes down.

Primary corn receipts were 1,466,000 bu. and shipments 800,000 bu., against receipts of 300,000 bu. and shipments of 21,000 bu. last year.
