Weather Produces Substantial Gains in Prices of Wheat.

CORN IS MAKING FRIENDS Cash Demand to Taking Care of the Mig Receipts and Will Likely Continue to Do So for

Rest of the Month.

OMAHA, Jan. 7, 1913. Substantial gains were made in wheat prices yesterday and the strength of the prices yesterday and the strength of the market seemed to be largely based upon an appreciation of possible damage to the growing crop from the expected cold wave in the southwest. The weather map showed some snow in that section, but the fall was generally light and not regarded as enough to furnish protection in case very severe weather should be experienced. In the Onio valley there has been some snowfall during the last two or three days and as far as can be learned the growing plant seems to be searned the growing plant seems to be reasonable well protected against any weather conditions that are now in

Wheat bears said last night that there had been advance enough for the time being, despite the low temperatures over a good part of the southwestern winter wheat belt. Bulls were disposed to rewheat belt. Bulls were disposed to re-gard the cold wave with light snows as a point in their favor and liable to re-suit in damage later on. They recalled the damage which came about the end of December last year and were disposed to work for higher prices.

There are many traders who would like to work on the bull side of wheat, but want something more tangible than has appeared of late. Cash wheat unchanged.

has appeared of late. Cash wheat unchanged.
Corn has gained many friends since its advance of nearly 2c from the low point of last week. Those who have been the best buyers of corn said last night that they considered corn the cheapest of all strains and feed being relatively cheaper than hay. The cash demand is taking care of the big receipts and is expected to for the balance of the month, as large sales have been made for export this and next month, the market being in the same position that oats were at the opening of the season when the movement had started and was taken care of.

A point made by buils yesterday was that the sale of 600,000 bushels made in Chicago for export was for immediate shipment at relatively better prices as compared with the May corn than here-tofore. A light snow fall was reported throughout the belt, accompanied by a cold wave, but this is not expected to interefere with the movement as long as the roads continue hard and smooth. Cash corn '5 to ic higher.

Oats prices ruled in sympathy with the

Liverpool close: Wheat, 4d to 4d igher; corn, 4d to 4d higher. higher; corn, ¼d to ¼d higher.

Primary wheat receipts were 283,000 bushels and shipments 507,000 bushels and shipments of 571,000 bushels and shipments of 191,000 bushels last year.

Primary corn receipts were 1,404,000 bushels and shipments 703,000 bushels and shipments 703,000 bushels and shipments of 422,000 bushels last year.

Primary oats receipts were \$79,000 bushels and shipments 5,000 bushels, against receipts of 224,000 bushels and shipments of 266,000 bushels last year.

The following cash sales were convited.

The following cash sales were reported

CHICAGO GRAIN AND PROVISIONS Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Jan. 7.—The contest over the price of wheat on the Board of Trade to-day looked like a draw most of the day, but the bears were on top at the close, with prices to the under yesterday. It took considerable unleading by longs with profits in sight, and much pressure' from short seliers to check a further advance in corn. Final prices were practically unchanged. Ocats were quiet and closed fregular, while provisions declined from 10c to 274c.

Wheat started higher on an advance at Liverpool, which market reflected the higher capital to the provisions of the country of the

Wheat started higher on an advance at Liverpool, which market reflected the higher market here yesterday, a decrease in the European visible, and the political situation in the Balkans. A good demand for flour, considering the season, was an additional buillish factor. These influences were short-lived. Longs, with profits in sight, started realizing because of the liberal snowfall and moderate weather, and May dropped to 91%c. Friends of the grain ran the prices back to 92%000%c. On this rise, would be sellers discovered that the demand had been pretty well satisfied and the price sagged to the lowest of the day.

The aggressive corn buyers who sent prices up yesterday continued their tactics today and stampeded a considerable short interest who bid the price of May up to to 50%c. The advance was well held for some time, but toward the close longs,

for some time, but toward the close longs, who thought it time to secure profits, found that demand had been satisfied on the way up, and prices slumped. At the

the way up, and prices stumped. At the bottom there was renewed support and the close was steady.

Oats fluctuated narrowly in sympathy with corn, and closed with little change from yesterday. Trade was light.

Six thousand tierces of lard delivered on January contracts yesterday were placed on sale in the provisions pit at the provisions presents. opening, resulting in a sharp decline all along the line. Opening prices for January lard were 17½c. Part of it went to carriers at 20c discount under May. January pork closed with a net loss of Two, and January ribr were lie lower, Deferred futures were less emphatically

London Stock Market. LONDON, Jan. 7.—American securities opened steady today. A good tone prevalled during the forenoon and prices advanced from 1s to 15s over parity. Southern Pacific, Union Pacific and United States Steel were the most active shares.

Bank Clearings. OMAHA, Jan. 7.—Bank clearings for to-day were \$2.687,427.65 and \$2.081,380.96 for the corresponding day last year.

Bank Clearings for 1912

The volume of bank clearings in 1912 far exceeded those of any preceding year, reflecting the remarkably improved conditions in all commercial, industrial and agricultural lines, the total at all cities in the United States, according to the statement compiled by R. G. Dun & Co., which includes returns from 128 leading centers, amount ing to \$174.189,507,180, a gain of 9.8 per cent. as compared with the year before and of 6.6 per cent, compared with 1910. Every section into which this statement is divided contributes to this favorable exhibit, and taking the year as a whole, practically every important city reports substantial improvement, demonstrating the notable broad ening of activity in every part of the country. Activity in the more important manufacturing industries in New England, notably textiles, footwear and the metal trades, as well as in general business, is reflected in good gains over both years at all of the leading cities, among them Boston, Springfield, Worcester, Fall River, Providence, Portland and Hartford. Bank clearings were in well mantained volume throughout the year at the principal cities in the Middle Atlantic States, as shown by gains of 7.6 per cent. over both preceding years in the total for that section. Philadelphia, Pittsburgh, Scranton, Reading, Buffalo, Rochester, Wheeling and numerous other points report increases, reflecting the generally prosperous conditions and especially the stimulating effect of the unprecedented activity in iron, steel and coal. That generally favorable conditions prevalled throughout the year in the South Atlantic States is indicated by the marked expansion in exchanges at most of the leading cities, among them Baltimore, Richmond, Norfolk, Charleston, Macon, Columbus, Ga., and Jacksonville. The lateness of the cotton crop, adverse weather and floods in some districts had a retarding effect on bank clearings in the Central South, and there is some irregularity in the returns—notably those for June and September—but notwithstanding this, all the leading cities report more or less gain for the entire year and the total is considerably larger than ever before. So isfactory agricultural conditions, with a resulting expansion in general business, had a remarkably stimulating effect on the volume bank clearings in the Central States, especially towards the end of the year, and practically all cities report good gains over both years, prominent among them being Chicago, Cincinnati, Cleveland, Detroit, Milwaukee, Toledo, Youngstown, Canton, Grand Rapids and Kalamasoo. Although the returns from the cities in the Western States were fairly satisfactory during the first half of the year, the depressing effect of conadderable crop uncertainty was reflected in contracted exchanges at a number of points, but when it became certain that large harvests would be gathered there was a general expansion in business and bank clearings increased until at many centers they reached the highest point ever touched. There were good gains at Minneapolis, St. Paul, Duluth, Sloux City, Kansas City, Cedar Rapids, Omaha, St. Joseph and Denver, and the total was much in excess of either 1911 or 1910. Generally favorable returns are made by the cities on the Pacific Slope, owing mainly to prosperous agricultural conditions, which favorably affected all departments of business, though districts the remarkable improvement in the lumber industry was also of great benefit. Les Angeles, Scattle and Portland are among the cities where consider

good an advantage as the matured mut-tons, but trade on them was active and strong compared with yesterday. Early in the morning a shipment of fed lambs changed bands at \$5.0). As usual of late the general market was brisk and most of the holdings were disposed of almost as soon as the buyers could get around to them.

Receipts were comparatively liberal, the supply being larger than last Tuesday.

Receipts were comparatively liberal, the supply being larger than last Tuesday, and greater than on the same day last year. As on yesterday ewe offerings made up a large proportion of the receipts and while lambs were also in fairly large supply, very few wethers of year-lings arrived. Among the offerings were about fifteen cars of range lambs ewes and yearlings from Wyoming, most of which were picked up as feeders. In point of general quality the supply was very fair compared with the last few days.

Notice is hereby given that the annual meeting of the stockholders of The Bankers' Reserve Life Company of the Bankers' Reserve Life Company of the building, in said city, at 4 o'clock P. M., on Wednesday, January 15, 1913, for the election of directors and the transaction of such other business as may properly come before it.

Omaha, Nebraska, Dec. 19, 1912. R. C. WAGNER, Secretary, Dec19-25-Jan2-8

The rear axie shafts of the RICH MOND are 1% inches in diameter. Ask for the dimension of the rear axle shaft on other cars. Take opportunity to compare and the RICHMOND will not suffer in the comparison. The adjustment of the bevel pinion

and bevel ring in the rear axis of the RICHMOND is easily made. It is not necessary to send a RICHMOND car to the shop, as the owner can easily make the adjustment to one-thousandth of an inch.

DAR ABSORBINE JR. HOR IT
