### PLEADS 'YOTES FOR WOMEN'

Dr. Anna Howard Shaw Addresses Large Audience at City Hall.

URGES EQUAL SUFFRAGE TO ALL

Attributes Trouble in England to What is Designated as Pig-Headed Stupidity of the

Men.

'Ir Englishmen had the sense that the American men have in matters of cman suffrage," sald Anna Howard Shaw, in addressing a large audience in the council examber of the city hall last night, "there would be no smashing of letter boxes and the other ridiculous things that are occurring in England. It is the pig-headed stupidity of those Englishmen that has made all that trouble possible. They have simply refused even to receive the petitions of the women in Parliament.'

Dr. Shaw, president of the National Woman Suffrage association, was to have talked to the teachers of the city. The audience, however, was by no means made up of teachers alone, for men and women of all ages filled the house even

to the gallery. Dr. Shaw was pleasing in her address, and drew forth repeated applause. Her courtesy to the long standing arguments of men against woman suffrage was unfailing and never did she grow real sarcastic. She simply laid bare some of the stock arguments of anti-suffrage in such a ruthless way that their absurdity was self evident.

Pleads for the Ballot. "My appeal is that they remove from us the stigma of disfranchisement. As teachers, how is it possible for a political nonentity to educate and train an

intelligent political entity?" The speaker took up the argument of one man in the south, who had said he did not want his wife to go down and vote with 50,000 "niggers," adding that if this wise man had bethought himself a moment he would have realized that no person votes with 50,000 other persons, whether "niggers" or whites.

"At the same time, what a reflection on himself it was to assume that his wife would leave him on election day and sneak away with 50,000 'niggers' to

"We have been given the right to vote on school matters," said the suffragist leader. "Well, the education of the young of the land has been considered of so little importance that we have been considered competent to pass on such matters, but never competent to vote on matters of street cleaning, handling of garbage and many other of the important things of city government.

We have been told that government derives its just power from the consent of the governed. People have remarked that freely on Fourth of July and on other patriotic occasions just exactly as though it were true. As a matter of fact, not a word of it is true. We have been told just as pompously that the voice of the people is the voice of God. Those who mouthed this sentiment forgot that the voice of God consists of a soprano as well as a bass, and that the voice of the people will never be the voice of God until the soprano and the bass mingle in divine harmony."

Criticism for Wilson. President-elect Wilson came in for a little criticism because he is taking too long to debute the suffrage question with himself, according to Dr. Shaw. The speaker referred to the article written by Wilson in the current issue of the World's Work, entitled, "Free Men Need No Guardian." She said she expected to send it back to him with some changes and suggest that "Free Women Need No Guardian, Either."

Dr Shaw told of how she happened to take up the suffrage movement. She told of the settlement work she had attempted to do in the slums of the cities. She found she had nothing the fallen women wanted. She said they did not want her religion, and so she went away and studied medicine. She came back to them, hoping to help them and was satisfied that she had helped a few individual cases, but at last it dawned upon her that the was not striking at the bottom of

"I found at last," Dr. Shaw said, "that was like a man with an ambulance standing at the bottom of a precipica, sathering up the broken fragments of persons that fell over the cliff. I decided I could not help them and I decided to look about me and find out who could I found there was no use talking virtue to a girl who is starving; I found that what is needed for girls is financial independence. They must have an honest day's wage and they must have work in conditions and surroundings in which they are able to keep their self respect. The first thing we must do then is to take away from women the brand of inferiority which they now carry and give them a chance. This brand of inferiority is theer disfranchisement."
