The Day of the Automobile.

Without entering upon detailed consideration of the various elements that enter into its whole, the general proposition may safely be made that this is the day of the self-propelled vehicle. No invention since the telephone has so generally modified conditions under which we live as has the automobile. Its adaptability and general usefulness are becoming to be appreciated, although no one is rash enough to propose a limit for the "machine." The industry has sprung up so suddenly, and spread with such rapidity, that it is almost beyond the comprehension of those who are engaged in it. It is the great ment of the twentieth century.
