## Have You Heard That Chassis Lecture?

A LITTLE experience in the pulpit—a little on the stage and a personality you will not forget, made John Rose a lecturer worth hearing.

He gives that remarkable chassis talk at the Cross Country exhibit. It's the big educational feature of the Automobile Show.

Stop and listen to the technical talks of salesmen at any other exhibit. They are able men—but do they make you understand?

Then hear John Rose.

He tells the story of the Cross Country in simple words. He drives it home with a laugh-provoking yarn. You are not bored, but educated and entertained.

He demonstrates the U. S. L. electric starting and lighting system in such a way that you leave with two thoughts in your mind—it's silent—it's efficient.

The crowd is always large, but Jeffery men are trained to practice courtesy.

### OATS HURRIED TO THE SOUTH

Rock Island Seizes Cars Wherever it Happens to Find Them.

### CONDITIONS NEAR WAR STAGE

Justifies Its Action on This Ground—Grain is Ordered to Be Delivered Earlier Than Date of the Contract.

Omaha grain companies that secured government contracts for the delivery of from 1,000,000 to 1,500,000 pounds of oats at points along the Texas border at any time prior to April 30 have been notified that the delivery of the bulk of the grain will be required before that date.

Notice now comes that delivery must be made at once and as a result there is a hustling to get cars to load for the south. In the bidding for the government of the oats the Rock Island secured the contract. Officials of this road take the position that this is a time when conditions are near war stage and that they have a right to take and use cars wherever they can be found, regardless of ownership. As a result the Rock Island is picking up cars wherever it can find them and loading them out with oats. A special train of this grain was moved out last night and another will go away today. These trains will go ahead of everything except trains loaded with soldiers.

### New Law May Affect Men Who Rob Cars

The three railroad employees of the Northwestern road, arrested by detectives some time ago for the theft of merchandise from the company's cars, may have to serve a long term in the penitentiary as the result of a national law enacted four days before they robbed the cars.

On February 13 congress passed a law making it a serious offense to rob interstate railroad companies' cars. The law provides for a fine of \$5,000 and ten years in the penitentiary or for either one. W. E. White, John P. Johnson and Edward Brown, three brakemen, broke into the cars on February 17. They will be tried under the new law.

### BOND FOR FRANK PAINTER TO BE RAISED IN OMAHA

A \$20,000 bond is to be raised by labor unions of Omaha to secure the release from federal prison of Frank Painter, one of the many recently convicted on the charge of interstate trafficking in dynamite for illegal purposes. Committee from the Central Labor Union, the Iron Workers, the Odd Fellows and the Woodmen decided upon this at Labor temple last night. The bond will be executed through a surety company. Fifteen individuals and business establishments raised the \$20,000. C. L. Shamp and George E. Norman presented the case of Painter before the committees last night. Mrs. Painter is at present at the home of C. L. Shamp in Omaha.

### FIRE CHIEF RUNS BUICK MANY THOUSAND MILES

Fire Chief J. F. McGee of the Dallas fire department recently elected president of the National Fire Chiefs' association, has had a Buick for three years and has gone 50,000 miles in it. You know the kind of miles a fire chief rides. But

be's still doing it. And down in Boston the fire department boasts a Buick that has turned 100,000 miles and is in such condition today that when they had a chance to turn it in on the purchase of another, they wouldn't even consider it.

### Wins Hill Climb.

In the fourteen days of the imperial reliability trials in Russia, the Buick landed a score of 1,900 points, 100 points a day and not another entry, American or foreign make, was even a close second.

The start was made in St. Petersburg and the Buick arrived in Moscow on time to the minute. In addition to the gold medal, the Buick won the hill climbing and speed contests, too.

Key to the Situation—Bee Advertising.

## See the New Kelly Models at the Truck Show

Our new water-cooled models created a sensation at the New York, Chicago and Philadelphia Truck Shows.

An inspection of these trucks at the Show or at our local branch will repay your serious attention.

# KELLY TRUCKS

are shown in two tonnages—one and three.

We are pioneer builders of motor trucks. We build nothing but motor trucks—they are not a side-line.

## ANDREW MURPHY & SON

1410 Jackson St., Omaha, Neb.

## All That You Demand In a Superior Car

"If You'd Drive the Car You'd Like to Drive—" **MIDLAND** Left-Hand Drive, Center Control, T-Head Motor Electric Lights, Electric Starter, Superb Appearance.

Note the low, rakish, graceful lines in this car, the Midland 1913. You sit IN the body, not ON it.

Mark the trim, clean-cut appearance, how the dash lamps are hidden, how extra trim are carried in the rear—how everything is constructed to make this an admired car.

The power parts are built with the same care, with the same thoughtfulness for economy, speed and ease of operation. Read over the specifications, then see the car itself at the Automobile Show or at our Display Rooms. You will find MORE than you expect at the price. You will find it a superior car on comparison point for point. You will find it the car you want to drive and to own.

Midland Instantaneous Service Phone for Demonstration  
A new idea in Motordom. A service that eliminates delays and troubles, that furnishes you assistance WHEEN and WHEEN you need. Let us explain.

We'll gladly make appointment to demonstrate either the 4-40 or the 6-50 Model T Midland at your convenience without the slightest obligation to you.

# Cadillac

STANDARD OF THE WORLD

Design, selection of materials and accuracy of workmanship are the three greatest essentials in a real motor car.

Cadillac materials for every individual part are determined upon only after application of definite and concrete knowledge as to their adaptability and fitness for the functions and duties which they must perform.

Cadillac designs are approved only after the most severe tests which prove to the greatest possible degree that they are thoroughly efficient and worthy to be entrusted to uphold the name Cadillac and all that the name implies in the motoring world.

Cadillac workmanship is famous the world over, wherever the science of mechanics is known. It is famous for its accuracy, famous for its uniformity, famous for its standardization.
