

MOST DEATHS PREVENTABLE

This Startling Statement Was Made by Dr. Vaughn.

FAMOUS SPECIALIST COMING

Will Maintain Offices in the National Fidelity and Casualty Building.

Doctor Victor C. Vaughn, dean of the Ann Arbor Medical College, once stated that eighty-five per cent of the deaths in this country are from preventable diseases.

People flee in horror from such scourges as Cholera, Smallpox, Yellow Fever and other similar complaints because the effect is so speedy and so apparent, but they have no fear at all of an ailment of the Nervous System.

This is where the people deceive themselves because nearly every ailment with which the people are afflicted started in the nervous system.

A derangement of the Nervous System saps the vitality of the brain and every organ of the body; the subject gets so run down in health that he or she is an easy mark for any disease.

Electro Oxygen is the latest and greatest discovery of the 20th century for removing growth destroying germs and poisons from the system, at the same time building up the blood nerves and muscles.

To demonstrate this wonderful new discovery One Hundred cases will be treated free of charge Monday, April 14th, in the newly established offices on the second floor of the National Fidelity and Casualty Bldg., 12th and Farnam Sts. Hours 9 to 12, 2 to 4, and 7 to 8, Rooms 213-17.

Iowa Suffragist Defends Methods of Mrs. Pankhurst

BOONE, Ia., April 9.—Mrs. Rowena Edson Stevens of this city, wife of Judge John L. Stevens, candidate for governor at the last election on the progressive ticket, and at the present time national committeeman for Iowa, has given to the press an interview in which she upholds the work of Mrs. Pankhurst in England, and denounces the sentence as one of great injustice to the leader of the militant suffragettes. Mrs. Stevens is one of the militant type and she heartily commends the suffragettes for the window-smashing, mail-destructing antics which they have been pursuing.

Mrs. Stevens' interview follows: "With window smashing, mail destroying and other destruction which the English suffragettes have caused, let us remember at no time has human life been jeopardized or human blood shed. The shop keepers did not lose when their windows were broken, for the glass was insured in large insurance companies, who had influence with the government; the government is responsible for the male. The aim of all attacks have been toward the government, which, for many years, has denied them the final hearing on the woman suffrage bill in Parliament, although the bill has had a majority sufficient to pass it on its third reading for years and promises have been given yet always broken.

Mrs. Emmeline Pankhurst is a woman of wealth, position and education; refined cultured, gentle of manner and a kind heart; she has taken up the burden of the poor and oppressed; she believes that the ballot in the hand of woman will relieve a great deal of suffering and distress and work for the good of mankind. She has given of her means, her time and strength, and pledged her own to the work; she has wrought great good and injured no one. We believe the sentence of hard labor unjust and would speak for mercy as did the jury that tried her."
