PRICE OF SUGAR WILL FALL

Goes to Kalamazoo President Says This Will Be First Effect of Tariff

> Executive Thinks Some Factories Will Close for a Time for Ef-

WASHINGTON, April H .- President Wilson believes the tariff bill meets the general approval of the country; that no healthy business will be innterrupted and that while in most cases the cost of living will not be immediately reduced, the onsumer will feel at once the benefit of

feet, but They Will Re-

sume Business Later.

These views were expressed today by the president in an open talk with newspaper men at the White House. He explained that his main reason for desiring a reduction on sugar was that the consumer deserves it.

The president declared that arrangesents by which prices were fixed would surely be made impossible when a truly competitive system was created and that the public would get the benefit, very promptly in the case of sugar because he knew competitiive elements were ready to contest. Criticisms, he said, had been received from some perfectly legitimate interests contending that the cuts in their cases were more than they could at present stand. Mr. Wilson said he did not see any ruinous cuts in the bill. He referred to the fact that members of the ways and means committee had heard every person in interest and that their judgments were based on those hearings.

Effect of Free Wool. It was suggested to the president that many Ohio democrats in congress felt woolen industry. Mr. Wilson said he had been tryling to inform himself as much not feel their fears were justified by facts. He remarked that he had heard just the other day that the price of the wool was the same on both sides of the

In connection with the sugar tariff the president was asked if he thought sugar factories, both beet and cane, could operate under free sugar. He said that he certainly thought they could, remarking with a smile that the factories might shut down for effect for a time, but that they would open for business later.

The president said he hoped to open reciprocity negotiations with various ountries as soon as the tariff bill was
