

The Society Bee-Hive

By MELLIFICIA Thursday, April 24, 1913.
 SHE was about to mount a Council Bluffs car, when a ferocious gust of wind descended from the Woodmen of the World building, caught under the brim of her new spring hat and carried it to the top of the Paxton hotel. As it whirled downward a gallant man stepped from the hotel and spied it. He gave pursuit. The hat veered toward the Krug theater, was approaching the walk in front, when another breeze lifted it toward the roof of the Paxton hotel annex. The gallant man started across the street. Approaching the hat, it made a dart to pass him. Lifting high his foot, he crashed down upon it. His heel went through the crown of the beautiful Milan straw. Its owner then came to him and took the hat.
 "Thank you," she said, icily, as she again stepped on the car. The conductor gave two bells.

Beautiful Dancer Helping in Omaha

MISS LUCY SEMPLE BRADFORD OF SPRINGFIELD, ILL.

Patrons for Relief Benefit.

At the big benefit performance of "Sleeping Beauty" to be given at the Brandeis Saturday for the tornado relief fund a large number of prominent society women will act as patronesses, including: Meadames—Charles T. Kountze, Victor Rosewater, Frederick Nash, W. H. Squier, George A. Joslyn, N. B. Epdike, Carl E. Hartmann, J. W. Towle, Nathan Merriam, M. C. Peters, J. J. Hannighen, T. H. Matters, H. N. McClanahan, H. P. Shaw, A. J. Love, R. L. Carter, C. N. Dietz, O. T. Eastman, John Bourke, Clement Chase, John Latenser, E. H. Howland, H. N. Engleman, E. J. McVann, A. R. Knode, D. M. Vinsonhaler, Walter E. Page, J. E. Summers.

Shower for Bride.

Mrs. T. J. Farrell and Mrs. I. A. Brayton entertained at a kitchen shower Wednesday afternoon at the home of Mrs. Brayton in honor of Miss Freda Baumgarten, a May bride. The rooms had a decoration of red hearts and flowers. The guests were: Meadames—L. Vanant, E. E. Emmons, Harry Wheeler, A. S. Jewett, A. D. Major, H. C. Vedmillion, John Smiley, W. G. Nelman, J. M. Campbell, J. E. Miller, J. E. Curt, O. P. Taylor, Misses—Vera Bennett, Freda Baumgarten.

Mu Sigma Club Elects Officers.

The members of the Mu Sigma club met Wednesday morning at the home of Mrs. Frank Boyd and held the annual election of officers for the coming year. All of the officers of the last year were re-elected and are Mrs. C. W. Axtell, president; Mrs. George H. Damon, vice president; Mrs. M. D. Ruffe, secretary; and Mrs. E. M. Axtell, treasurer. The club will continue the study of English literature and will take into the Victorian period. This was the last meeting of the club until October.

Thimble Club Entertained.

Mrs. Isaac Carpenter entertained the members of the Thimble club Tuesday afternoon. Seventeen members were present. The time was spent in needle work, and a 6 o'clock tea was served. In two weeks the club will be entertained by Mrs. W. G. Templeton.

Anniversary Club Meets.

Mrs. Ida Elder entertained the members of the Anniversary club at luncheon Tuesday. Covers were laid for twelve and Mrs. Joe Frush and Mrs. Bert Stewart of Sioux City were guests of the club. Cards were played in the afternoon and prizes won by Mrs. Hatfield, Mrs. Maxwell and Mrs. Otis.

GOLD DUST

makes clean, healthy homes

Gold Dust acts like magic on dirty floors, doors and woodwork. You do not have to bend until your poor back is nearly breaking in an effort to scour and scrub away the dirt. Add a heaping teaspoonful of Gold Dust to a pail of water and the Gold Dust Twins will do the rest.

Gold Dust makes floors and doors spotlessly clean. It searches out dirt, germs and impurities from every crack and crevice.

Gold Dust makes home "sweet" home. Save your strength by calling Gold Dust to your aid.

Gold Dust is sold in 50 size and large packages. The large package means greatest economy.

"Let the GOLD DUST TWINS do your work"

Coaching-Charity Entertainment.

Miss Lucy Semple Bradford, a young society woman of Springfield, Ill., was in charge of the dances to be given in the "Sleeping Beauty" at the Brandeis next Saturday evening for the benefit of the relief fund.
 Miss Bradford graduated at the New York Normal school of Physical Education and then took up Settlement work. Last year she was athletic coach of the New York High school.
 Miss Bradford originated many of the dances which will be given Saturday evening. She plans to spend next winter in Dresden continuing her studies.

Tuesday Bridge Luncheon.

Mrs. Charles Brohm will be hostess of the Tuesday Bridge Luncheon club at the meeting next week.

Wedding Surprises.

Miss Welcome Houchin, daughter of Mr. and Mrs. J. L. Houchin, and Mr. Larry O. Scott surprised their friends Wednesday afternoon by going to Fremont to be married. The ceremony took place at 5 o'clock at the residence of the officiating clergyman, Rev. Cissel, formerly of Omaha.
 After June 1 Mr. and Mrs. Scott will reside in Scott City, Kan.

Program to Be Given.

The program which was to have been given Easter Sunday evening at the synagogue at Nineteenth and Burr streets will be given this evening under the auspices of the ladies' auxiliary of the Beth Hamedrash Ha Todeh at the same place.

In and Out of the Bee Hive.

Mr. Will H. Thomas has returned from an extended stay in California.
 Mr. and Mrs. G. W. Wattle and two little daughters, Margaret and Mary, will return home May 1 from their winter home, Juilita, in Hollywood, Cal.
 Mrs. G. A. Rohrbaugh has returned from a stay at several weeks in Florida.
 Mr. Paul Chad, who spent the winter at the Coak ranch in New Mexico, has been visiting his brother, Mr. Ralph Chad, at Columbia university, New York.
 Mr. and Mrs. William Austin, who have been in Chicago and the east for the last week, are expected home the early part of next week.
 Mrs. J. H. Dumont will arrive home Thursday from Des Moines, where she has spent the last week.
 Mr. and Mrs. J. E. Fitzgerald and daughter, Marguerite, of Fargo, N. D., are visiting at the home of Mr. and Mrs. T. H. Fitzgerald.

New Hastings Depot to Be Most Modern

Among other things talked of by the Union Pacific officials in the way of improvements and betterments is a new passenger depot at Hastings. This building comes along by reason of the building of the Hastings-Gibbon cut-off.
 Hastings' new depot will be of pressed brick and stone and will be modern in every particular. The exact cost is not announced, but it is estimated that it will be around \$50,000. It will be located near the business center of the city.

OMAHA AUTO CLUB YEAR BOOK IS QUITE NIFTY

A beautifully bound and engraved annual has been issued by the Omaha Automobile club under the direction of Colonel H. W. Jewell, which gives the list of the club and its articles of incorporation and bylaws. For the benefit of automobile owners, there is a valuable section of the book covering ordinances regulating vehicles. There is also a full list of active and honorary members of the club. It is profusely illustrated with tint-tone engravings of officers and directors, made by The Bee engraving department.

MRS. NEWTON HEADS ETHICS AND PHILOSOPHY BRANCHES

The philosophy and ethics department of the Omaha Woman's club held a special meeting at the club rooms Tuesday afternoon when the following officers were elected for the coming year: Leader and representative, Mrs. Mary B. Newton; assistant leader, Mrs. William Berry; secretary and treasurer, Miss Mary Krebs. Mrs. Newton, who was leader of the department last year and is one of the prominent members of the club, has just finished a most interesting year in which the study of the philosophy of St. Paul was the subject of several lessons.

POLICE PENSIONS INCREASED

Fifteen Members of the Department Eligible for the Raise.

FOUR ARE NOW PENSIONED

Others Have Served the Required Time on the Force, but Will Not Use the Pension for Some Time.

Fifteen members of the Omaha police department are eligible for a \$50-a-month pension under the provisions of a bill passed by the recent legislature, and four of these will actually receive the pension, while eleven—three officers and eight patrolmen—will stick to their jobs at \$10 and \$12 a month respectively. The pension for retired policemen was increased by this bill from \$40 to \$50 a month.
 Following are those now on pension, having retired after twenty years of active service on the force, and who receive \$40, and will, as soon as the new law goes into effect, ninety days from the day it was signed by the governor, receive \$10 a month additional: Fred Bausnick, Dick Flynn, Billy Fisk and Charley Bismarck.
 Those who have served the required time on the force, but prefer to continue rather than retire and draw pensions are: Chief of Police Henry W. Dunn, Patsy Hayes, assistant to Commissioner Ryder; Captain Dempsey; Andy Pahey, Mike Kissane, Mike Sullivan, A. N. Glover, Sam Ringelman, Lieutenant Hayes and Sergeant Sigwart.
 Sergeants and lieutenants receive \$10 a month and patrolmen salaries are \$5 a month.
 Chief Dunn believes probably four of those eligible will retire at the close of this year and go on pension.
 "The majority of those eligible are in fine health and have no notion of leaving the force," said the chief. "They will stick to the job for several years yet. Certainly I have no intention of quitting."
 Patrolmen are started at \$10 a month and at the end of six months' probation their salaries are raised to \$12 and thereafter they receive a semi-annual increase of \$5 until their salaries reach \$35, which is the maximum paid patrolmen.

School Boy Leaves His Home So He Can Have Chance to Work

The police have been requested to locate Carlisle Clancey, aged 15 years, who, together with a boy companion, Ivan McCabe, aged 19 years, disappeared from the Clancey home, 1524 North Fortieth street, at 2 p. m. Monday.
 Young Clancey, who had been ill for several weeks, was not attending school at the time of his disappearance and in his leisure had become acquainted with the McCabe boy, who was working in the neighborhood. Clancey did not want to go back to school this term and was in for securing a position until fall.
 His parents did not approve of him working after his recent illness and wished that he remain at home until a little stronger.
 Carlisle, however, was bent on occupation, and, aided by the influence of the older boy, ran away.
 Mrs. Clancey said: "Carlisle has had every opportunity a boy could wish for, a good home, clothes and spending money. I know of no reason for his leaving except his ambition to work, which in his present weakened condition he was unable to do."
 Information was received by Mr. Clancey this morning that one of his son's companions, Fred Helms, saw the two boys Monday evening and learned that they intended heading their way to Denver. Mr. Clancey, who is connected with the Commonwealth Life Insurance company, is using every possible means to secure any information as to his son's whereabouts. Repeated telegrams to the Denver police department have so far availed the anxious family nothing.

OSLYN PIPE ORGAN Unharmed by Storm, Says Great Organist

"I can give the reassuring news, too, that no danger whatever was done to the wonderful Joslyn pipe organ, notwithstanding the many delicate wires connecting the instrument with the four different organs. Mr. S. Archer Gibson, the famous New York organist, who has played for Mr. Joslyn several times before, arrived Wednesday for a two weeks stay, and tried the organ out last night and pronounced it in perfect condition."
 This comes from a close friend of the Joslyns, who speaks with authority. The talk about the proposed removal of the Joslyn family to California furthermore has no foundation whatever, according to this informant.
 "There is nothing more in Mr. Joslyn's mind about a residence in California than there has been all the time. It is true that he owns a plot of several acres adjoining Mr. Wattle's place in Hollywood, but he bought this four years ago for the purpose of building on it a winter residence, and with no idea of abandoning his home in Omaha. The best proof of his intentions is found in the fact that ever since the tornado he had twenty to twenty-five men continually employed in restoring his house and grounds."

OMAHA MATERIALLY HELPED BY GRAIN RATE DECISION

Railroad and grain men have rejoiced that the ice is out of the Straits of Saint Ste. Marie, and that navigation has opened on the lakes. As a result, considerable grain is moving to Chicago. However, the movement is not so great as was anticipated and large quantities are still going to the gulf ports for export and to the south for feed and milling.
 Railroad men having to do with the lines having southern connections are of the opinion that New Orleans will continue to be the leading market for Nebraska grain, especially that going across the ocean. They believe that Omaha has gained very materially as a grain market by virtue of the recent decision of the Interstate Commerce commission, which held that the rate of 10 cents to the gulf was not too low, as compared with the 15-cent rate to Chicago.

Officer Could Not See Santa Claus, but Did Hear Sleighbells

James Atterbury of South Omaha was poked up at Fifteenth and Douglas Wednesday evening laboring under the hallucination that he was being pursued by "Santa Claus in a sleigh." Officer Ferris listened to the man a moment and then looked up and down the thoroughfare to try and see what might be bothering him. There was nothing in sight and Ferris concluded that Atterbury's delusion was merely a result from an overdose of something.
 The two then proceeded towards the bastille, but had not gone more than five feet when a tinkling of a sleigh bell sounded from the rear. Atterbury then looked wisely into the officer's face, asking the question, "Who's looney now?"
 Of course, the officer might have answered, but he reflected a moment for he, too, had heard the bell. It was a perplexing situation and one doubt added itself to another as the two proceeded to the police station with a haunting intermittent tintinnulation of sleigh bells following them.
 When they arrived at the desk Ferris had large beads of perspiration standing out on his forehead and only after he had personally frisked the prisoner did he satisfy his first conviction. Underneath the prisoner's shirt was a bell attached to his body with a string around his waist. Just why it was there has not yet been explained to the officer, and he cares less, because he now knows that it was a reality.
 Ferris was in court bright and early Thursday morning to see Atterbury get his just deserts for perpetrating such a scare on a million of the law. After Judge Foster was apprised of the facts he is still 240 days till Christmas and sentenced him to fifteen days of them for rushing the season.

LEAKS IN THE WATER MAIN

Water Board Holds Session, but Nothing is Accomplished.
 LINE FROM FLORENCE DISCUSSED
 One Big Leak Reported, but Commissioners Are Unable to Locate the Place of Seepage.
 Another spurge toward the completion of the forty-eight-inch water main to Florence will be made by the Water board at a meeting Friday afternoon, when the contractors who were supposed to have finished the south half of the main are officially and finally notified that the board will itself complete the main.
 "It's high time we finished that main," Water Commissioner Howell told the board at a meeting this afternoon, noon.
 Howell rose to his feet when he made the assertion, quivering with rage—the same rage he has quivered with during several times while the contractors reported "progress," which was only continued delays.
 Then F. D. Weed, who always objects to everything proposed until it has been thoroughly explained by Howell, when he invariably acquiesces, started something by asserting that he had it from somebody who had it from the man who had it from the contractors that the contractors never would finish that main if they were forced to live up to certain nonleakage testing requirements. This was discussed at length and nothing came of it, except Howell's report in which he said the main had been tested and the south section found to leak five and one-fourth gallons of water per minute, a leak which would eventually have to be fixed.
 He Wants to Know.
 W. H. Buchholz wanted to know why the streets had not been filled up and the debris cleared away. Somebody said the contractors had been waiting for the completion of the tests, which were but recently made. Howell thought the contractors could have gone ahead and filled up the streets and then uncovered the pipe if leaks were found.
 An example of the logical working out of this advice is the leak in the south section which is 3,000 feet long. The leak cannot be located and if it is found, the filled-in ditch will have to be excavated. Howell said it would cost less than \$100 to stop the leak if it could be located.
 Jackson & McKenzie, who assert delay in testing the pipe is largely due to failure of the water commissioner to promptly test it when it was placed, are out of the city and the plan of the board to finish their contract will be discussed with their attorney.
 One of the partners of the Jackson & McKenzie firm returned to the city yesterday to handle the interests of the contractors. He said:
 "We will refuse to repair these leaks unless we are compensated. Our contract provided that the tests should be made before the pipe was covered, but Howell refused to give us money on the contract until the ditch had been filled. We were delayed in the laying of the pipe by the Water board's failure to have streets opened and ready for us and by the water commissioner's failure to have pipe on the ground."
 Under instructions from Howell, Jackson & McKenzie moved their gangs of workmen from the south to the north end of the south half of the main at considerable expense. The contractors have put in a bill for this work under the classification of "extras." These extras look big to the Water board and there will be a row over them before they are rejected or allowed.
 At the meeting of the board Wednesday afternoon contract for the purchase of 1,000 tons of cast iron pipe was let to the American Cast Iron Pipe company of Birmingham, Ala., the lowest of two bidders.
 A resolution was adopted giving Howell permission to install fire hydrants whenever and wherever he sees fit and at such times as is convenient for the workmen.

JUNIOR BROTHERHOOD ALL READY FOR THE BIG SHOW

The boys of the Junior Brotherhood of Trinity Cathedral announce that the final rehearsal of their play, "Up Caesar's Creek," has taken place, and on the date set, Saturday, they will astonish their friends with their histrionic ability. The youngsters have been working with enthusiasm on their little sketch, in which genuine, care-free "boy nature" prevails. The characters are typical American boys and their actions in camp, and in the minstrel show will delight all who attend.
 The event will take place at Jacobs' Memorial hall, 1726 Dodge street, at 8 p. m. Saturday evening.

W. D. HALLER, MAYOR OF BLAIR, IS CONVALESCENT

W. D. Haller, mayor of Blair, Neb., who has had several operations performed for hemorrhage of the bladder, is now resting very easily at St. Joseph's hospital. Mr. Haller is widely known and will be remembered by many as the ex-state representative and senator from Washington county. He has been confined at St. Joseph's hospital for the last two weeks, but expects to be able to return to his home in Blair in a few days.

IF you knew how many different ways Faust Macaroni can be served, you would have it several times every week—write for free recipe book and find out. Faust Macaroni is a savory, toothsome dish—you make a whole meal on it alone and feel thoroughly satisfied.

It is strengthening, too. A 10c package contains more nutrition than 4 pounds of beef—it is extremely rich in gluten—the muscle, bone and flesh former. Comes in air-tight, moisture-proof package—makes a meal that's a feast.

At all grocers—10c package.

FAUST MACARONI

REHABILITATION WORK CALLS FOR HELP FROM THE OUTSIDE.

The relief committee is still in need of the services of automobiles in the investigation work. During the last few weeks the committee has daily made use of some three or four automobiles, the services of which were donated to the committee, and it is still casting about constantly to keep this supply of automobiles coming in from day to day. There is a great deal of field work yet to be done in the way of investigation and this requires cars.
 The various departments of the committees are now neatly and snugly established at 313 South Fifteenth street. The nine relief station desks have been concentrated into three desks. Some of the volunteer workers who absolutely can't stay no longer will be relieved and each desk will be supplied with but three persons to handle the requisitions of persons that come in.
 Miss Barker and Miss Griggs of Chicago, who have been giving their services for some weeks, will now help George Morton in taking records of the cases as applications are made. The relief desks occupy one side of the house and the rehabilitation the other. All are neatly fenced in by railings that have been provided for the purpose. The reconstruction work of the relief committee is now moving along steadily from day to day. The first move made by Mr. Rasmussen, in charge of John W. Towle's desk, was to make out nine lumber bills, which he turned over to Captain Stritzinger to purchase. Other purchases of lumber will be ordered during the day, but this was simply the first move of the morning, indicating that this branch of the relief work is now in full swing. Besides the five contracts were let to contractors who will repair homes, furnishing their own material for a given sum.
 Volunteer business men are still needed by the relief committee as well as automobiles. Their services are needed in gathering data in the field in regard to the damage to certain houses and the amount required to repair them, and for many other matters that are to be considered in a strictly business way by the committee.

DR. WM. OSLER OF CHLOROFORM FAME

In An Address to Physicians, Said: I Believe the Best Doctor Is the One Who Knows the Worthlessness of Drugs—Electro-Oxygen Remedy.

The old school doctor has had his day," says Dr. Osler. "His methods belong to the mystery and superstition of the dark ages. Most physicians of today are doing just what the doctors of a thousand years ago did—dosing suffering humanity with poisons. Any man who thinks for himself knows that poison can not build up health. They will give temporary relief by stupefying the nerves, but they don't remove the cause of disease. By way of illustration: If you had a fine watch and some part of its mechanism broke, would you try to mend it by filling it with oil? No, you would take it to the best watchmaker and have him find the cause of the trouble and repair it. Your body is a far more delicate mechanism than any watch. It is the most complicated machine on earth, yet when some part breaks down or fails to do this is to give Nature the power to do it. All you need is the natural motive power—Electro-Oxygen. You can't get that with drugs. Electro-Oxygen will restore this motive power wherever lacking; all pain and disease will disappear. That is the only natural way of curing. The reason so many men and women fail at everything they attempt is because they are quitters. They have not the courage and ability to tackle and overcome the obstacles they encounter. Give me a man or woman who is kept down by loss of energy, backwardness, dependency, lost vitality or weakness of any kind and I will make a new man out of him or her by filling their nerves with the fibre of life—Electro-Oxygen. It's the man with backbone that gets the good job. It is the progressive hustler that gets the promotion when there is any. A man or woman without energy has no inclination to hustle, they are out of repair, sick and need an expert's attention

whether it be from catarrh, gall stones or female disease. But most women imagine that the only thing to do when drugs fail is to resort to the surgeon's knife. Most female complaints are the result of low vitality or weak, impoverished nerves. Where there is a deficiency of vital nerve force there is found to be sluggish action of the organs affected and then disease. Electro-Oxygen saturates the nerves with a gentle stream of electric life, enabling them to keep up a vigorous and regular action of all the organs of the body. Electro-Oxygen builds up vitality and strength in every weakened part. A great many people are told by those who do not understand the marvelous powers of Electro-Oxygen that their disease will return after the good effects wear off. Our guarantee of 100% for each case we accept and fail to cure holds good for ten years after cure is perfected and backed by a corporation of \$10,000 capital stock fully paid. Ten days remain for free examination; after that time a charge of \$5 will be made.

D. J. Jones was pronounced by several leading physicians to have tuberculosis of the stomach and lungs. An examination by the stethoscope, the greatest discovery of the age, revealed only catarrh. Mr. Jones felt greatly relieved and, in improving so fast under the electric treatment that it is only a question of a few weeks when he will be entirely cured. Automobile service free to all parts of the city. Come now before the rush.

SAVED HIS LIFE.
 "You have saved my life," said Mr. Frank Howard, of 739 St. Peter St. "When I first took Electro-Oxygen treatment I was in such pain that I could hardly walk. Life was a burden. It was with great difficulty that I could eat and sleep. I'd known what would happen because I had not found you two weeks ago. Today I am cured of one of the hardest cases of neuritis I ever saw. Had I not found Electro-Oxygen I would have either been dead or crazy. Anyone suffering as I did and falls to try it is foolish indeed. I recommend it to all my friends and acquaintances as the greatest discovery of the age."
 Hours 9 to 12, 2 to 4, and 7 to 8 p. m. Sunday, 11 to 12, 313 to 317 National Fideliity Bldg.

More Economical Both in Use and Cost CALUMET BAKING POWDER

—And it does better work. Simply follow your customary method of preparation—add a little less of Calumet than when using ordinary baking powder. Then watch the result. Light, fluffy, and evenly raised—the baking comes from the oven more tempting, tastier, more wholesome.
 Calumet insures the baking of an expert. Ask your grocer to-day.
