INSPECTORS IN CONFERENCE

State Commissioner Harman Instructs His Men.

SEE CREAMERY MEN TODAY

Twelve Men Will Cover State. Which Has Been Divided Into Eleven Districts, One Man Working at Large.

(From a Staff Correspondent.) LINCOLN, April 29.—(Special.)—A meeting of the deputy inspectors of the food and oil departments was held in the office of Commissioner Harman yesterday.

All inspectors were present and a general school of instruction was held covering the work to be done under the new consolidation of the pure food and oil inspection departments.

While sixteen assistant inspectors are allowed by law, but twelve will be used unless it becomes necessary. Commissioner Harman has divided the state into eleven districts, putting an inspector in each district. The extra man will be used as a sort of special to be sent where his services are needed most. The men began work this morning, all of them in Lincoln and tomorrow will start out in their respective districts.

Tomorrow they will meet with the traveling representatives of the creameries in order that there may be a general understanding among the creamery interests of what will be expected of them to keep within the law. At noon all of them will take luncheon at the Lindell hotel.

Assistant inspectors selected and who were present yesterday, were:

Fred Ayer, Holbrook; V. E. Stahl, Seward; T. J. Cunningham, Spalding; George Mayo, North Platte; D. W. Heckel, Kearney; E. A. Walrath, Osceola; W. S. Austin, Central city; John W. Moore, Lincoln; Adam Shoup, Omaha; J. G. F. Hildebrand, Lincoln; E. C. Kimble, Lincoln, and P. J. Bygland, O'Neill.

OLLIS STILL IS FIRM FOR UNIVERSITY REMOVAL

(From a Staff Correspondent.) LINCOLN, April 29.—(Special.)—Senator Ollis of Valley ventured back to town today.

"I haven't got the university moved yet," said the senator, "but if the people get a chance to get a true knowledge of the matter you will see a big majority piled up for university removal to the state farm when the vote is taken."

"The mistaken idea that some people have in their minds that it will cost more to move than to stay where we are is all wrong. We went to a lot of trouble to prepare a statement of the cost it would take to reproduce the present buildings on the state farm in comparison to purchasing the extra six blocks down town and building there, and presented to the house committee, but they would not consider it. That estimate showed that we could duplicate the present buildings on the state farm at a cost of something like \$50,000 less than it would take to buy the six blocks down town and build there, and we got the figures from Lincoln people too. But that committee would not listen to any proposition unless it was all their way, and so nothing came of it."

"Why, the proposition submitted by the Lincoln papers, which published a picture of the university as it would look on the six blocks, estimated the cost of expansion on the down town campus at \$4,000,000. Why, give us half that amount on the state farm and we will show them a university they will be proud of, and one which will successfully show up with that of almost any of our western states."

Senator Ollis said that small grain and alfalfa were looking fine up in his section of the state, and he thought with the present outlook that wheat would yield 30 per cent.

Take Plenty of Time to Eat

There is a saying that "rapid eating is slow suicide." If you have formed the habit of eating too rapidly you are most likely suffering from indigestion or constipation, which will result eventually in serious illness unless corrected. Digestion begins in the mouth. Food should be thoroughly masticated and insalivated. Then when you have a fullness of the stomach or feel dull and stupid after eating, take one of Chamberlain's Tablets. Many severe cases of stomach trouble and constipation have been cured by the use of these tablets. They are easy to take and most agreeable in effect. For sale by all druggists.—Advertisement.

Mrs. Belmont and Mrs. Catt Reconciled

LONDON, April 29.—The antipathies of Mrs. O. H. P. It is expected that the American women will express their views.

Mrs. Belmont, who is staying at a hotel in London, gave the following statement to the Associated Press today:

"I mean just what I say when I declare that if New York fails to awake, we shall introduce militant methods of the type used in England. I also meant what I said before leaving America about spending no money in England. But I was compelled to stay at this hotel because I found spring clean-

The A-B New Idea is the Most Economical and Sanitary Gas Range in the World

Special Demonstration Now Going On

**A Few of the Most Important Features of The Famous A-B New Idea Gas Ranges.**

- 1.—Carefully notice the above illustration, and observe the Cabinet and Table range built at the right height. This obviates stooping and makes baking a real pleasure.
- 2.—Another important feature is the "iron-clad" rust proof guarantee that is backed by both manufacturer and ourselves.
- 3.—Requires no "stove blacking," merely clean it with a damp cloth, and your stove will look like new.
- 4.—The White Enamel broiling pan and clean-out tray, which is so unlike the grease crested pans found on the ordinary gas range.
- 5.—Patented features found on no other gas burner, prevent the flames from "floating," thus avoiding an unnecessary waste of valuable gas. The A-B is constructed to consume 25% less gas than any other make of stove.
- 6.—There are still scores of other superior features. Space will not permit us to tell all of them.

**The New Idea**

The above illustration shows one of the famous A-B gas ranges, and nowhere does the A-B show itself to better advantage. The patented burners, which are found on no other stove but the A-B, keep the flames from floating, thus avoiding an unnecessary waste of gas.

**The Old Idea**

Notice the inefficiency of the above burner, which is found on the ordinary gas range. Observe the floating flames which cover the lower half of the kettle, which is a tremendous waste of valuable gas. Carefully compare the two illustrations and you will be easily convinced that the A-B is the most economical gas range made.

Girl's Brother Kills Lover with Hatchet

CHICAGO, April 29.—Anthony Marasco, 25 years old, was struck on the head with a hatchet and killed after he attacked Anna Forte, 16 years old, because she refused to marry him. Pasqual Forte, 19 years old, a brother of the girl, is said to have struck the blow which resulted in Marasco's death. Pasqual has not been captured.

Mrs. Pasqualina Forte came to the assistance of her daughter, armed with a revolver. She fired a shot at Marasco, but the bullet went wild, sped through a window and struck Frank Alfona, who was walking past the house, over the heart. Physicians say Alfona probably will die. He is 22 years old.

Mrs. Forte, mother of the girl, Pasqual Forte, a member of the firm of Forte Brothers, bankers, and a cousin of the girl, and Anna Forte were taken into custody to be held pending further investigation by the police. Tony Bianco, 16 years old, told the police he was an eye witness of the assault, and he was detained to be questioned later.

Steamship Fram Will Go Through Canal

WASHINGTON, April 29.—Rosal Admunsden, the Arctic explorer, has written to Secretary Garrison expressing his purpose to avail himself of the privilege of passing through the Panama canal this fall with the "Fram," the vessel in which he is to make his latest Arctic trip. The "Fram" is now at Buenos Ayres.

"I have directed the Fram to meet me this fall at Panama," wrote Admunsden. "I naturally understood that the passage of the vessel through the canal is entirely dependent upon the condition of the slides, but I also realize that even if some should delay me, it would be of immensely more advantage for the Fram to pass through the canal than to go around South America. I shall consequently have my vessel await such time as may suit the convenience of the United States as well as may prove possible for the passage of ships."
