

A BALM FOR EVERY ILL

And There Is More Than a Grain of Truth in That Saying, 'It Only Remains for Us to Find It.' Grief Alone Will Produce Most Any Disease, Especially Bright's Disease

Nature Will Provide, Says Electro-Oxygen President, the Celebrated Lecturer and Scientist, in His Lecture to Physicians Last Night.

In the Electro-Oxygen Co.'s Offices a \$5,000 Machine Installed

Another Expert Bacteriologist Arrives With the New Safer and Fredman Serum.

Original investigation, especially upon medical subjects and where the results are phenomenal, is almost necessarily fatal to the finances and reputation of the investigator unless he is spared long enough to gain the company of sufficient support to strengthen his position. How prone is the physician to criticize adversely the things that are new, and how inexplicable is human nature in general in this respect. I was forcibly reminded of this seemingly innate characteristic of all mankind when several years ago I had the temerity to attack the old accepted pathology of a recognized incurable lesion, chronic Bright's disease. And how nearly fatal it proved to my medical aspirations until by persistent and extended clinical work, the dark clouds of adverse criticism were replaced by the sunshine of honest investigation. Let us look further into how Electro-Oxygen does its work. There is no cure here today which would doubt after the elaborate and conclusive experiments of Schiff, Dubois, Raymond, D'Arsouval and others, that we have electric currents traversing our bodies in every direction and that the nerves are the carriers of these currents. It is also true that everything that acts as a carrier of an electric current vibrates. The molecules of a copper wire become so disturbed by the vibration of an electric current that in time it may be broken like a piece of cast iron. Then it is manifest that if the nerves carry currents of electricity they must vibrate and in the state of perfect health the nerves are constantly vibrating. Each nerve vibrates in a different way from every other nerve because they all carry different kinds of currents. The rate of vibration is peculiar to the kind of current carried by the nerve. Whenever a nerve loses its normal vibratory tone, its function is destroyed and degenerative changes occur. The patient taking Electro-Oxygen is subject to a rate of vibrations from a few to many millions per second, so that every nerve in the body will find a rate to which it will respond, and they will vibrate normally; it will choose its vibratory tone from the currents generated by the Electro-Oxygen machine. Every nerve in the body takes the vibrations peculiar to it and is made normal. Of course, if degenerative changes have taken place in the nerve so that there is no longer any substance to act as a carrier for the current, the nerve will not vibrate—it is dead.

He accidentally fell and injured the nerve that supplies the left internal rectus muscle of the eye. In consequence of this it injured the nerve causing left diplopia or double vision. An object held up before him before the machine was in action he always saw two objects, one about four or five inches above the other and a few inches to one side. Then when the machine was started he would after a few minutes see only the one. The reason for this was that the vibratory action of the current had conveyed the proper vibrations to the injured nerve and his vision became normal. A beautiful illustration of what Electro-Oxygen will do for the kidney trouble was demonstrated upon no less an authority than the celebrated Dr. Klebs. When he began treatment he said that positively he had no confidence in electricity, but that he had no objection to trying it. His urine contained 5 per cent albumen by volume and both hyaline and reticulate to such an extent that his vision was seriously impaired. I gave the doctor sixteen treatments in all, the last I have ever given in any case. He went back home into active practice, something he never expected to do. He is now entirely cured. Another case of a physician being cured was that of Dr. J. A. L. Recordy, a prominent physician of Anad, Okla., who came to the office rooms and began treatment for an enlargement of the prostate gland, which became so aggravating that he was compelled to give up his private practice and seek medical aid. After the first treatment the doctor made the statement personally to me that he received so much relief that he shouted with joy after the first micturition and that he had constantly improved after each treatment until last night he boarded the train to return to his old practice at Anad. A society belle of Lincoln whose name is withheld for the present, Miss H—, age 23, referred for treatment by a prominent physician who is enlightened on these modern methods, had albumen in urine since age of 17. Analysis showed 64 grains to the liter, numerous casts both hyaline and waxy. Although large of frame, she was anemic and yellow and so weak she could not stand alone. Weight 55 pounds; ankles swollen; heart fair. After four treatments she came to the office unassisted, and in three weeks could walk five or six blocks for her daily exercise. In four weeks she menstruated normally—the first time in twelve months; at the end of six weeks she was pronounced cured, her urine showing no albumen and no casts. She now weighs 75 pounds and feels as well as she ever did.

Chronic nephritis, more essentially a disease of central nervous impairment. One of the strongest proofs of this is the kind of persons afflicted. The natural path along which impressions are conveyed to the kidneys are through the splanchnic and spinal cord and when these tracts are impaired the functions of the kidneys are correspondingly affected. The reduction of albumen obtained by strict diet has no significance. Electro-Oxygen will hasten the oxidation of waste products; it is the logical remedy, because the "evolution" of oxygen, always accompanying this modality, not only hastens the elimination of waste, but gives a better tone by its vibratory action to the nerve centers affected. It is a powerful equalizer of the nervous forces, as is evidenced by its effect on the temperature, respiration and pulse. OXYGEN AS A CURE. Oxygen is in reality the "world builder" and has more to do with the phenomenon of life than any other agent. It has much to do with metabolism, and without metabolism life must cease. Much of the therapeutic value of electricity applied to the body depends upon the generation of this agent. All currents produce it in different degrees, the higher the voltage the greater the production. The Oxygen you breathe in the atmosphere is not of sufficient strength to overcome disease. The Oxygen generated on this machine artificially will cure consumption, asthma, hay fever, neurasthenia, anemia, beyond a doubt. It cost the Electro-Oxygen company \$5,000 cash to build it, which is another proof that the policy of this company is "nothing too good for their patrons." When inhaled it hastens the oxidation of the blood, increases the red corpuscles and quickens results in neurasthenia, melancholia, hysteria, neurosis and lost vital power of men. Only a limited number of these cases have been treated since we established this magnificent machine, yet the results have been marvelous in every case. Friend aptly remarked, "Electro-Oxygen must be learned practically under a skilled operator, and not from books." The advantage of this machine is that it is in charge of honorable and courteous to the highest degree; they will do all they claim, I am perfectly assured." The office, rooms 23-17 National Fidelity Building, Twelfth and Farnam streets, is open on Sundays from 11 to 12; week days 9 to 12, 2 to 4 and 7 to 8. Free examination will only be given a few days longer. Call now and avoid the crowd. Elevator service now at night, 7 to 8, beginning Monday.

exactly what an overloaded stomach would do—there would be an excess of gas, the same as there is an excess of food to be disposed of, which overtaxes the stomach. This machine is the only one here and was installed only a few days ago at an expense of five thousand dollars. Two expert operators go with the machine to see that the most scientific and expert treatment is given. I consider his one of the greatest benefactors of the human race. Omaha is indeed lucky to possess such a great invention for the saving of human life. What Well Known People Say About Electro-Oxygen. Mrs. W. S. Carter and many other prominent citizens recommend this marvelous new science in the highest terms. Mrs. Carter, in speaking of the wonderful benefit in her case, remarked: "I have felt better since taking the Electro-Oxygen treatment than I have for years; strange to say it has toned up my whole system and makes me sleep like a top. I certainly enjoy it, as it has been my one great trouble for a long time. I recommend it to everyone and have particular faith in it as a wonderful cure in diseases peculiar to women." Mr. Lee Nolan, a well known employe of a manufacturing company, has improved under Electro-Oxygen beyond words, the terrible affliction of the bronchial tubes, which caused him to cough, has disappeared, as well as pains in the stomach and kidneys. He is telling all of his friends about this good work; ask him about it if you know him. Mr. M. Hall, the well known railroad man is loud in his praises of the good results he has experienced for stomach and bowel trouble. Miss Ora Simmons, says: "I have felt better since taking the treatment than I have for years; in fact, my friends and neighbors were surprised and delighted to see me walk several blocks to their homes to pay them a social call. My nerves are in better shape and I feel better in every way than I have for years. I can heartily recommend this treatment as one of the wonders of the age, and should be taken advantage of by all." The physicians in charge are honorable and courteous to the highest degree; they will do all they claim, I am perfectly assured." The office, rooms 23-17 National Fidelity Building, Twelfth and Farnam streets, is open on Sundays from 11 to 12; week days 9 to 12, 2 to 4 and 7 to 8. Free examination will only be given a few days longer. Call now and avoid the crowd. Elevator service now at night, 7 to 8, beginning Monday.

FLAW IN COMPENSATION ACT

Lincoln Member Discovers Defect in New Law. MAY MAKE IT INVALID. Other Laws Show Up in Bad Shape and Much Inconvenience is Likely to Result from Condition.

(From a Staff Correspondent.) LINCOLN, Neb., April 30.—(Special.)—Representative Richardson of Lancaster has found some defects in the compensation law passed by the recent legislature, and while he will not divulge just what the trouble is, he showed enough agitation over the matter in his anxiety to get hold of the attorney general this afternoon to leave the impression that the defect must be serious. As soon as Chief Clerk Richmond of this house was informed of the trouble, he at once got in communication with Guy Cramer of Omaha, one of the chief workers for a compensation act during the session, and with Omaha attorneys, whom it is claimed have also discovered defects in the bill which may render the law unconstitutional. A bill providing for an increase in the bond issues of school districts, which it was intended to pass with an emergency clause to permit districts to take advantage of this year, was today discovered to have been passed without the emergency clause, and its operation will thereby be delayed until too late to increase the issue this year. Error in Appropriation. Some other doings of the last legislature are accountable for trouble. All appropriation for \$5,000 to cover printing of schedules, etc., necessary to secure assessments of railroads and other corporations was cut out by the senate committee and the mistake was discovered too late to have the matter remedied. According to L. G. Brian, ex-state treasurer, and a former member of the state board of Equalization, these blanks and other supplies will have to be furnished some way in order to get the valuation of the corporations. How it will be done has not yet been figured out. Another little jumbled up affair has been found in the bill passed to pay claims for printing the constitutional amendments. Clark Perkins of the Aurora Republican published half of the

CHILD DIES FROM BURNS RECEIVED IN FIELD

LAWRENCE, Neb., April 29.—(Special.)—The 7-year-old daughter of Mr. and Mrs. Fred W. Schroeder, living several miles southwest of Lawrence, met her death last evening as the result of severe burns about the breast and face, received while in the field with her father. The child had carried a lunch to her father in the field, where he was working on burning corn stalks. After partaking of the lunch, Mr. Schroeder went on about his work, supposing the girl had gone toward home; but later, hearing her cries, ran to her assistance, but the clothing being all ablaze, it was too late.

PLATTSMOUTH CONTRACTOR IS CAUGHT BY CAVE-IN

PLATTSMOUTH, Neb., April 30.—(Special.)—Walker White, who has the contract for putting a private sewer in the Third ward, met with a very serious and almost fatal accident this afternoon while working in the bottom of the five-foot sewer. He was adjusting the sewer pipe and was in a stooping position, with his right hand under the pipe when five feet of earth caved down on him, almost

UNIVERSITY BILL FOUND DEFECTIVE

LINCOLN, April 30.—The bill passed by the last legislature providing for an appropriation to erect new buildings at the state university and submitting the location of the school to a vote of the people has been found defective. The signature of the chief clerk of the house, which is required by law, was today discovered to have been omitted. The bill providing for pensioning widows of Omaha policemen, also passed by the legislature, has not been signed by the speaker of the house, who is required to affix his signature in the presence of the members of that body. Officers of the legislature believe that it may be possible to have the measure despite these omissions, but it was feared at the state house that the bills might be unable to withstand a test of the courts.

PLATTSMOUTH PROTESTS AGAINST RAISE IN TELEPHONE RATES

PLATTSMOUTH, Neb., April 30.—(Special.)—At a meeting of the city council last night steps were taken to have City Attorney A. L. Todd meet with the State Railway commission May 5 and voice the protest of Plattsmouth and its citizens against the contemplated raise in telephone rates which the Lincoln Telephone and Telegraph company is about to place in effect. The company proposes to make business phones \$2.50, where the old rate has been \$2 and charge residence patrons \$1.50, where they have been paying \$1 heretofore.

NEBRASKA WHEAT IN PERFECT CONDITION

(From a Staff Correspondent.) LINCOLN, April 30.—(Special.)—W. N. Purvis, tax commissioner of the St. Joe & Grand Island railroad, was calling on Secretary Seymour of the state board of assessment this morning. He said that the crop conditions along his line of road at the present time are perfect, adding: "In Nebraska the condition of wheat is 100 per cent and down in Kansas the report is nearly as good, showing about 97 per cent."

Nebraska

HOWARD DENIES THE RUMOR

State Auditor States Has No Intention of Handing in Resignation. WILL CONTINUE IN HIS OFFICE. Has Had No Conference with Governor Morehead Relative to Turning Place Over to Some Democrat.

(From a Staff Correspondent.) LINCOLN, April 30.—(Special.)—The report was in circulation about the state house that Auditor W. B. Howard would resign as state auditor. In connection with this report was another that he had made a deal with Governor Morehead by which he would resign, that the governor was to appoint a democrat as auditor and then the board would appoint Howard as insurance commissioner under the new law. In speaking of the matter to The Bee, Auditor Howard emphatically denied any deal of any kind relative to the auditor's office or the insurance commissioner. "I was elected state auditor," said Howard, "and I promise to fill the office to the end of my term and an endeavoring to conduct in the best interests of the taxpayers of the state. I have not talked with Governor Morehead about anything relative to the insurance commissioner and certainly have not made any deal like the one reported. As I said before, I was elected auditor and expect to fill out my term."

Plainview People Ask For a Union Station

(From a Staff Correspondent.) LINCOLN, April 30.—(Special.)—Railway Commissioners Clark and Taylor left last night for Plainview, where they will hold a couple of hearings on applications for new depots there and a small station near that town. Commissioner Hall will go to Plainview, where there will be a hearing relative to putting in a union station by the Northwestern and Burlington roads. The former road has made a proposition to rebuild its old depot, putting in two waiting rooms, toilet, heat and light and otherwise fitting up the station in a modern way. The Northwestern station is close to the business part of the town, while the Burlington is about half a mile or more distant. The roads cross each other about half way between the two stations and the people of the town want a union depot erected at that point. Mr. Hall will return Friday night.

Powell Will Look Into Phone System

(From a Staff Correspondent.) LINCOLN, April 30.—(Special.)—Rate Clerk U. G. Powell has gone east on business connected with the railway commission. He will go to a town in Michigan about the size of Lincoln, where they have a telephone system similar to that which is a bone of contention here and investigate, hoping to get some facts and figures which may assist the commission in solving the conditions at home. The Lincoln trouble has been before the Nebraska commission for the past six months.

Insurance Company Lacks Authority

(From a Staff Correspondent.) LINCOLN, Neb., April 30.—(Special.)—Several letters have been received by the state auditor during the last few days notifying him that agents of the Inter-Insurance Company of America have been soliciting business in different portions of the state. Auditor Howard says the company has no authority to do business in Nebraska and that he will get prosecution of agents if any more reports come in. The company does a business of insuring stations and jacks and it is reported to have written a number of policies.

Auto Registration Break the Record

(From a Staff Correspondent.) LINCOLN, April 30.—(Special.)—During April 137 automobiles were registered in the office of the secretary of state, making a record for any one month. April and May are claimed to be the two best sales months in the year by automobile dealers, and it is possible that next month may also be a record breaker.

GAME BIRDS MUST NOW SHIFT FOR THEMSELVES

(From a Staff Correspondent.) LINCOLN, Neb., April 30.—(Special.)—The raising of game birds by the state with which to stock Nebraska is a thing of the past, the recent legislature refusing to vote any more money in trying to make Nebraska a mecca for birds of beautiful plumage and sweet song. The game warden has been shipping those on hand to different parts of the state. Several birds were sent to Senator Grace, mascot. Senator George Wolk of Fremont received a few. Former State Senator Burman got a consignment at St. Libory and ex-State Secretary Junkin will see that another bunch is protected out in Gosper county. Senator Fries got a few for Howard county, Representative Potts was remembered in Lawrence county and Secretary of the Senate Clyde Barnard captured a number to roost in his apple trees at Table Rock.

Fall to Report Terminal Tax

(From a Staff Correspondent.) LINCOLN, Neb., April 30.—(Special.)—Forty-one counties have failed to report to the secretary of the State Board of Assessment on the terminal tax assessment. The law gives them until May 1 to make their reports. Douglas county was one of the first to report, but Lancaster county is still among the delinquents.

Clinic to Summer Normal

(From a Staff Correspondent.) LINCOLN, Neb., April 30.—(Special.)—Superintendent E. M. Cline of Geneva has been appointed superintendent of the Alliance Summer Normal school in place

OMAHA'S ONLY MODERN CLOTHING STORE KING-PECK CO. 16TH AT HOWARD. HOME OF QUALITY CLOTHES.

Here's Interesting News to the Man Who's Spring Suit Price Is From \$15 to \$25

A good big portion of the clothing business enacted at this store is on suits that sell at \$15, \$18, \$20 and \$25. Our experience, in catering to men of all classes has demonstrated that fully three-fourths of the men of Omaha buy suits at some one of these prices. Naturally, our greatest showing is at prices on which there is the greatest demand. In our search for fabrics this season to be made up into these popular priced suits we were extremely fortunate in the number of smart, desirable patterns we secured. The utmost of style is tailored into every suit at these prices, assortments that will astonish you.

Quality Suits \$10 to \$40 Most Exceptional Values at \$15-\$18-\$20-\$25

Swimming Teacher Gets Severe Shock

Consternation struck the patrons of the Metropolitan swimming pool Tuesday night when Mrs. Whitney, the girls' instructor, was thrown the length of a dressing room by an electric shock and was injured so that she could not continue her work. Mrs. Whitney attempted to turn on the hot air current. Some of the girls had complained that the air was cold. As the instructor reached the switch she was hurled backward, but was unable to relax her hold on the switch, and the fixture was torn from its socket in the wall. A janitor was called and assisted Mrs. Whitney to her dressing room, where she partially recovered from the shock.

W. K. Cundiff Given Gold Watch as He Leaves for New Job

Warren K. Cundiff, assistant general passenger agent of the Union Pacific, who was transferred to the Kansas division, with headquarters in Kansas City, leaves for his new field of duty tonight. Mr. Cundiff has been in the general offices here for a number of years, rising to his present position from the rate desk. The last change is looked upon as a substantial promotion, for at Kansas City he will have charge of the entire Kansas and southwest territory, his jurisdiction extending as far west as Ellis. He will work in conjunction with General Agent Kall. Yesterday just before Mr. Cundiff closed his desk at headquarters for the last time and just as he was getting ready to go home and pack his trunk, he was given a pleasant and unexpected surprise. Twenty or thirty of his associates in the passenger department marched into his room, Louis Heindorff, city passenger and ticket agent, heading the party. As spokesman, and in a short and fitting speech, Mr. Heindorff presented Mr. Cundiff with a solid gold watch as a token of the appreciation of the men who have worked with him in former years. Mr. Cundiff was so taken by surprise that it was some minutes before he was able to respond. Then he thanked the men, shook hands with them and bade them all goodbye.

Pope Pius Visits Audience Room

ROME, April 30.—Pope Pius for the first time since his recent illness descended today from his apartment to the floor below where he generally holds audiences. Those who accompanied his holiness said that his recovery is now complete.

A Child's Waste Clogged Bowels

Makes it cross, peevish, restless and feverish—If tongue is coated give "Syrup of Figs." Children dearly love to take delicious "Syrup of Figs" and nothing else cleans and regulates their tender little stomach, liver and 30 feet of bowels so promptly and thoroughly. Children get bilious and constipated just like grown-ups. Then they get sick, the tongue is coated, stomach sour, breath bad; they don't eat or rest well, they become feverish, cross, irritable and don't want to play. Listen Mothers—for your child's sake don't force the little one to swallow nauseating castor oil, violent calomel or harsh irritants like Carhart's pills. A teaspoonful of Syrup of Figs will have your child smiling and happy again in just a few hours. Syrup of Figs will gently cleanse, sweeten and regulate the stomach, make the liver active and move on and out of the bowels all the constipated matter, the sour bile, the foul, clogged-up waste and poisons, without causing cramps or griping. With Syrup of Figs you are not drugging or injuring your children. Being composed entirely of luscious figs, senna and aromatics it cannot be harmful. Full directions for children of all ages and for grown-ups plainly printed on the package. Ask your druggist for the full name "Syrup of Figs and Elixir of Senna" prepared by the California Fig Syrup Co. This is the delicious tasting, genuine old reliable. Refuse anything else offered.

Fined for Throwing Bricks at Synagogue

Harry Moore, 707 1/2 North Eighteenth street, who was arrested Tuesday as the leader of a gang of boys and young men who created a disturbance at the Jewish synagogue, Nineteenth and Burr streets, was fined \$50 and costs in police court. Numerous complaints have been made to the police within the last few weeks, and Judge Foster states it will go hard with any boy brought in on the charge.

TWO ELECTIONS COULD BE HELD AT THE SAME TIME

If an election by the county to vote bonds for the assistance of victims of the tornado is found advisable, it may be held at the same time as the city charter election, according to Chairman McDonald and Commissioner Lynch of the Board of County Commissioners. "I view of the fact that the charter election cannot be held for several months," said Chairman McDonald, "I am merely making the suggestion that the two elections might be held at the same time. If such a plan is feasible, it would save the county considerable expense."

OMAHA PEOPLE PLAN TO ATTEND CONVENTIONS

The Northwestern has lined up three specials out of Nebraska for conventions that will be held in the near future. The Nebraska Travelers' Protective association will send a delegation to the national meeting at Richmond, Va., early in June. They will occupy a special car and will use the Northwestern to Chicago; the Pennsylvania and the Chesapeake & Ohio from there. For the National Medical association meeting, to be held at Minneapolis, a special train will be run out of Omaha June 16 and another July 26, when the members of the Real Estate exchange go to the national convention at Winnetka. The Kansas City contingent will join the Omaha crowd here and go on the special.
