

# GALVANISM WITH OXYGEN

## And Fredman's Serum Dissolves Gall Stones for Mrs. Hartley From Mobile

### MANY BEING CURED IN OMAHA DAILY

Cholesterol is the base of gall stones, found in man, according to Hoppe and Seyler (acknowledged the most reliable experts, 636 parts in 100 of bile. It is soluble in bile salts and is precipitated from the bile when there is a deficiency of salts or when the bile is lacking in watery constituent. It is due to this precipitation and the presence of germs that gall stones are formed. Now, it has been proven by a cure effected in Mobile, Mrs. F. E. Hartley, 213 Congress Street, that galvanism not only dissolves this substance, but at the same time kills the germs and prevents them from forming again. A solution of sodium succinate, sodium salicylate and sodium glyco colate of two grains each is driven by cathodes directly into the gall bladder, which causes an increase in the watery elements of the hepatic excretion, at the same time kills the germs. That we do not stand alone can be proven by anyone who will write and consult the leading medical centres in Europe. Dr. Kehr or Dr. Payne or Dr. Home or the veteran operator, Joe Price, M. D., Philadelphia, who refuses to operate on many cases since this discovery, saying in the Southern Medical Journal, a most suggestive paper, heading "Medical Junk," a distinguished specialist on gall stone and gall bladder diseases, lost four patients in succession in a series of five. I re-

opened the gall-bladder twice in the fifth patient. I thought I could relieve him by freezing adhesions in the first attempt. In the second I removed his gall-bladder and placed his viscera in normal relations.

Dupuytren, the leading surgeon of his day, said, "I had rather end life by God's hand than that of a surgeon."—New York Medical Journal, February 1, 1908.

I do not condemn justifiable surgery, but I do contend that about half the cases that are operated upon are un-called for and dangerous, illogical and murderous.

The same treatment proves successful in stone in the bladder. Mr. R. S. Lemett, assistant superintendent of the Lenoir, Atlanta, Ga., came to us in terrible agony, saying he wanted to take him to the hospital for stone in the bladder. We applied galvanism and Electro-Oxygen and expelled it. It was as large as a large bean.

The crowds are increasing so fast that only a limited number will be accepted. So if you, your friend or acquaintance desire to take advantage of the greatest of all cures, come at once and get a free examination. Hours 9 to 12, 3 to 4 and 7 to 8. Elevator service at night commencing Monday, 313-17 National Fidelity Bldg., 12th and Farnam.

## DUN'S REVIEW OF TRADE

### Growing Confidence as to the Future Reflected in Report.

## LABOR GENERALLY EMPLOYED

Exceptionally Favorable Crop Outlook, in No Way Diminished During Week, Chief Cause of Optimism.

NEW YORK, May 2.—Dun's review tomorrow will say:

While the business situation throughout the country shows a further slight recession in activity, there appears to be a growing confidence as to the future and the volume of current transactions is much larger than is generally realized. It is, moreover, significant that labor is being employed and that wages are fully maintained and, in the cases of railroad firemen, have been advanced. The exceptionally favorable crop outlook, which developments during the last week have in no way diminished, accounts in a large degree for the prevailing feeling of optimism as to the future. Recovery from western flood conditions has been rapid, as is indicated by the returns of gross railroad earnings, which showed a gain of 4.4 per cent in the third week of April, a loss of 2.8 per cent in the first week, the net gain for the three weeks being 1.2 per cent.

On the other hand, bank clearings in April showed a loss of 4.7 per cent as compared with the corresponding month a year ago, due chiefly to the dullness in the leading speculative markets and in part to the interruption of business caused by the recent floods. Owing to renewed anxiety regarding the Balkan situation, money rates abroad are again firmer, while the local market has also hardened in anticipation of the requirements in prospect. While current production in iron and steel is close to the point of saturation, no movement in business and premiums are no longer so prominent a factor. The lumber trade is active, the coal market normal. Most reports continue to be highly favorable and from present indications this promises to be a year of phenomenal growth.

The export trade continues large and at the port of New York amounted to \$21,522,606 last week, an excess of \$1,888,941 over imports and comparing with \$18,448,034 of exports last year.

Commercial failures this week in the United States are 28, against 215 the corresponding week last year. Failures in Canada number 34.

## BRADSTREET'S OPTIMISTIC.

Report Shows Forward Movement of Trade for Week.

NEW YORK, May 2.—Bradstreet's tomorrow will say:

Trade reports will continue to show mixed aspects, but when the primary factors are sifted, the indications are that things moved forward rather than backward. Thus winter wheat presents an extraordinary picture for this season. At the close of the year, other crops are being seeded under auspices that are distinctly more favorable than those of last spring and in the south wheat planting has progressed in a relatively satisfactory way, with indications favoring an increased acreage.

Distributive trade at retail has been stimulated by bright, spring-like weather and reorders, except in the east, are of pretty satisfactory volume, while throughout the northwest and parts of the south buying for fall accounts is such as to suggest that little or no movement exists in those sections. Moreover, the south seems more cheerful and in the central valley country fear of the drouth has virtually passed. In the operations are proceeding apace, the industrial and farm operations afford active employment to a large number of men. A great degree of disturbance, it is, however, contended, is to be expected in the case of iron and steel and specifications for iron and steel are lighter, that premiums on finished goods are being eliminated, and that the worsted mills are working at a reduced rate.

Collections vary and in general they are hardly above par. The reports coming from the southeast. Demands for money are not so active and the banks which are not so active in encouraging borrowers, this fact presumably being more important than any showing down in trade. The week has continued dull and narrow, early weakness being superseded by higher prices at the week end.

Wheat, including flour, exports from the United States and Canada for the week ending May 1 aggregate 5,218,331 bushels, against 3,543,112 bushels this week last year.

Business failures for the week ending May 1 were 28, which compares with 24 in the like week of 1912.

## REPORT OF CLEARING HOUSE

Transactions of Associated Banks for the Week.

NEW YORK, May 2.—Bradstreet's bank clearings report for the week ending May 1, shows an aggregate of \$1,810,000,000, as against \$1,740,000,000 last week and \$1,577,000,000 in the corresponding week last year.

## Judge to Decide if Money Goes to Heirs

Whether the Armour Packing company must pay heirs in Greece of James George the Heir awarded to the young man by a district court jury a few hours before he died in the County hospital last February, will be decided by Judge Sutton in a short time.

His death from consumption, growing out of worry over an old-world superstition that his loss of two fingers would prevent his entrance into heaven prevented judgment being entered in accordance with the jury's verdict. An attempt to revive the verdict in behalf of his heirs was resisted in Judge Sutton's court. The judge took the question under advisement.

"Whatever is the outcome of this case," said Judge Sutton, "it demonstrates the need of an adequate workmen's compensation law. This law need not have

## Omaha's Greatest Clothing House

Ladies! Come in and try on the Genuine Bankoks and Panamas. We have them in many different styles.
