CHICAGO, May 14.—Rains which have improved crop prospects in both the spring and winter belts knocked support today from under wheat. Texas requests for bids on new shipments in July accelerated the smash. The market closed heavy with a net loss of %c to %@%c. Corn was off %%%c to %c and oats was down %c to %c%c. In provisions the outcome was 2%c to 12%c gain. Bears in wheat made much of the fact that each day the country has been getting nearer the period of early cutting and that the chances of acident to the crop had been greatly reduced. In addiand that the chances of acident to the crop had been greatly reduced. In addition cables were lower and Liverpool sent word of increased Canadian offerings to a cut-price basis.

Temporary upturns were brought in wheat, owing to lightness of receipts at leading terminals and because of talk that moisture in the southwest had been accessive.

that moisture in the southwest had been excessive.

There were also assertions of export sales at Baltimore. Shorts covered freely, but then the market found itself without any prop. General liquidation which developed was in rapid progress in the final hour, especially on the part of speculators who were loaded with old whest.

of speculators who were loaded with old wheat.

Primary receipts of wheat were 397,000 bushels, against 424,000 bushels a year ago. Seaboard clearances of wheat and flour equalled 725,000 bushels.

Decided loosening up of offerings by country owners weakened corn. The rains were said to have given the crop, on the whole, a good start. The weather map proved too much for the buils in oats.

Provisions worked higher, influenced by an advance at the yards. Packers competed actively for control of the cash trade in lard. Quotations ranged as follows:
