

LABOR AND WAGES.

Some weeks ago we agreed to write an editorial upon "Labor and Wages." We agreed to do this because we believed the laboring man would cast the deciding vote in the election that takes place Nov. 3d, and because we hoped to be of some assistance to him in arriving at a correct conclusion.

In this editorial we shall not claim that the laboring man will derive all the benefits accruing from a wise choice of leaders and measures, for we believe it impossible for him to reap without every other citizen feeling the good and wholesome effect of his prosperity.

This brings us to the point from which we believe the argument should proceed. From 1865, according to The Defender, the country was operated under a protective tariff. A large per cent of the men who are idle today were employed at good wages, their families were provided for and peace and plenty reigned where want and privation hold sway today.

The loss in wages in two years amounted to \$2,394,814. Loss to Company.—The value of the product of Cambria Iron Company in 1893 was \$2,064,000 less than in 1892.

The shrinkage in two years amounted to \$6,980,200. The Cambria Iron Company is but one of thousands which could tell a similar story of loss to the employees.

An Ounce of Prevention is cheaper than any quantity of cure. Don't give children narcotics or sedatives. They are unnecessary when the infant is properly nourished, as it will be if brought up on the Gall Borden Eagle Brand Condensed Milk.

Our Campaign Song. (Air—"Tramp, Tramp, Tramp.") In the foremost rank I stand with Old Glory in my hand, And I'm shouting for McKinley tried and true.

Supply and demand regulates the price of labor as much as it regulates the price of the farmer's product and the output of the mills. When there are half a dozen men running after every opportunity for employment wages naturally go down, because some of the men will be only too anxious to cut the price that he may secure the work in order that he may be able to earn something with which to buy the necessities of life for the dear ones depending upon him for support.

For this reason we believe the opportunities for employment should be increased; that all men who desire to work should be given a chance to use their talents, thereby providing for their families and keeping them from becoming a charge upon the community in which they live.

As we said in a former paragraph the country was operated under a protective tariff until 1893. From 1865

until 1893 there was not a year that showed the expense to be greater than the income. In 1865 the interest bearing debt was \$2,332,331,205, and by 1892 it had dwindled down to \$585,029,330—or to one-fourth its original size.

The comparison of wages paid by the Cambria Iron Company and value of its product in 1893 and 1894 as compared with the banner year—1892—is accurately stated as follows, wages at mines being included: Cambria Iron Company Exhibit—loss to workmen.—There were \$888,404 less wages paid in 1893 than in 1892.

The loss in wages in two years amounted to \$2,394,814. Loss to Company.—The value of the product of Cambria Iron Company in 1893 was \$2,064,000 less than in 1892.

The shrinkage in two years amounted to \$6,980,200. The Cambria Iron Company is but one of thousands which could tell a similar story of loss to the employees.

Labor the same as a dollar must be employed to be valuable. If it is employed wages will increase. If it remains idle wages will drop. Under a Republican administration wage-earners have been prosperous; under a Democratic administration they have revealed in but three things—want, misery and privation. Which will you choose?

Our Campaign Song. (Air—"Tramp, Tramp, Tramp.") In the foremost rank I stand with Old Glory in my hand, And I'm shouting for McKinley tried and true.

Yes, we'll march and shout and sing, we'll make the welkin ring 'Neath the banner of the red, the white and blue; We will smite them hip and thigh, till we make the rascals fly.

For when these fires again shall burn, prosperity will return, And poverty and want shall flee away. When the third day of November rolls around; For upon that day he'll see that our people still decree To have protection and a currency that's sound.

For this reason we believe the opportunities for employment should be increased; that all men who desire to work should be given a chance to use their talents, thereby providing for their families and keeping them from becoming a charge upon the community in which they live.

As we said in a former paragraph the country was operated under a protective tariff until 1893. From 1865
