—The reports from all points indicate that the oil fields of Wyoming are to be developed during the coming season. —Notice is given for a special meeting of the school district No. 7 to be held at the public school building in Harrison on Thursday, April 10, 1890, at 9 o'clock p. m. for the purpose of furnishing a permanent supply of water for said district and in that manner cancel the debt of the village of Harrison to said school district No. 7. It is expected that the village trustees will submit a proposition to do the work and thus cancel the debt of the corporation to the school district. This matter should be settled in some way and the sooner it is done the better for all parties interested.
