The surest and best of all recordies for all disorders of the liver, stomach, nd blood, is Dr. . ierce's Golden Medi-

# Frozen 6,000 Feet Deep.

For many years scientists have been explexed over the phenomena of a cerain well at Yakutsk, Siberia. As long go as 1828 a Russian merchant began wink this noted well, and, after worklog on it for three years, gave it up as abad job, having at that time sunk it to the depth of thirty feet without getting through the frozen ground. He communicated these facts to the Rusthan Academy of Science, which sent men to take charge of the digging op. perations at the wonderful well. These scientific gentlemen toiled away at their work for several years, but abandoned it when a depth of 882 feet had been reached, with the earth still frozmas hard as a rock. In 1843 the academy had the temperature of the soil at the sides of the well taken at various depths. From the data thus obtained bey came to the starting conclusion that the ground was frozen to a depths exceeding 6,000 feet. Although it is known to meteorologists that the lowstknown temperature is in that refion of Siberia, it is conceded that not eren that rigorous climate could force frost to such a great depth below the arface. After figuring on the subject for over a quarter of a century, geologhas have come to the conclusion that be great frozen valley of the Lena liver was deposited, frozen just as it found to-day, during the great grindup of era of the glacial epoch.

Mrs. Rrill, of Rhode Jeland, widow, ranted to prove her love for Charles frome, aged 22, the therefore put \$15,000 into his bands to keep for a rek, and he was last heard of among the windmills of Holland. They won't blow him back until he has squandered the money.

## An Indian Stors

In the summer of 1877, a dirty, tiredooking party of horsemen, forty in lumber, were wending their wa over ATALE ORTWO FOR THE CHILDREN. the rolling prairie land of Western Ne. braska. In the lead and to the year road a detachment of Uncle Sam's blue coated soldiers, commanded by a Leardeathing from Mr. Frank ed captain whose experience on the prostrictor of the De Witt frontier had made his name well known programme, and the Toutine in the midst, carefully guarded, were a hourswick, Me. Hotel men half a dozen Cheynne Indians, and folotel licumwice. the warriant slow in sizing people garb betokened them to be settlers of the plain, and whose jaded norses the says that he has lost a showed they had been hard ridden,

Hamilton Gibson shows at Thurber's gallery, Chicago, a set of sixty water colors exhibited by the Paiette club at the Art institute have found very scant favor.

Holman Hunt's "Finding of Our Savior in the Temple," painted in Palestine in 1854, was bought by a collector named Matthews, who always declined to exhibit or lend the picture for exhibition.

The Corcoran Art gallery, of Washington has bought a large painting by G. S. Truesdell, called "Going to Pasture." It is seven feet by five, and shows a French peasant girl leading a a flock of sheep to pasture in autumn

A monument of General Hartranft of Pennsylvania, unveiled at Norristown on Decoration day, May 30. A bronze medallion, showing the general's head in profile, modeled by Henry Manger of Philadelphia, ornaments the monument.

## Why a Girl Cannot Throw.

The difference between a girl's throwing and a boy's is substantially this: The boy crooks his elbow and reaches back with the upper part of his arm about at right angles with his body and the forearm at an angle of 45 degrees. The direct act of throwing is accomplished by bringing the arm back with a sort of a snap, working every joint from shoulder to wrist The girl throws with her whole arm rigid, the boy with the whole arm relaxed. Why this marked and unmistakable difference exists may be explained by the fact that the clavicle ro collar bone in the feminine anatomy is some inches longer and set some degrees lower down than in the masculine frame. The long, crooked, awkward bone interfers with the full and free use of the arm. This is the reason el cannot there a stone.

She dressed so neatly, and looked so bright and kind and obliging, that she gave her mother a thrill of pleasure whenever she caught sight of the young pleas in face.

She dressed so neatly, and looked so bright and kind and obliging, that she gave her mother a thrill of pleasure whenever she caught sight of the young pleas in face.

She wrote a letter to her father, who was absent on business, and gave patient attention to a long story by her grandmother, and when it was ended made the old lady happy by a good night on that principle. (We beginned the figure of an Indian, six feet)

cube. His spear and coil of rope were upon his shoulder, and by driving the spear into the hard, blue cube he was enabled to get upon it. It was just large enough to bear his weight, but he mals. was obliged to stand very still on the middle of it to prevent it from keeling to one side and sliding him into the water. It was almost as dark as night in the pool, and Oscar could see the two glowing eyes of the bear looking down on him. But the beast did not come into the pool. It turned away from the brink, and for two hours of wet, and cold, and terror, Oscar did not see the bear

Then Oscar resolved to go to the top again, and sprang into the water, climbing hastily by the easiest way to the floor of the cavern. To his utter dismay he saw the great brute lying on the ice close to the cave's mouth!

Hour after hour passed, until Oscar knew that it must be late in the afternoon, for the sun shone yellow on the ice beyond the mouth of the cave. Still his savage jailer made no move; still Oscar sat, not moving from the lump of

Another half-hour of terror passed, and then Oscar saw the bear spring to its feet, thrust out its head, and make for the opening of the cavern. Oscar held his breath, and peering out, saw a seal slowly crossing the great ice plat-form, making for the rocks. The bear swiftly disappeared, making after the new prey, and you may be sure Oscar was not long in getting outside of his

terrible dungeon. What was Oscar's amazement presently to see the seal stand up, throw back the fur from its head and shoulders, and turn into a girl!-yes, into his own dear sister Hilda! She shouted aloud and waved her

handkerchief. The bear, evidently disconcetred, turned, ran lumberingly up a guich, and disappeared into a tangle of ground-firs. Hilda, borrowing another cloak, had come to look for Oscar and had seen the bear at the mouth of the cave. At once suspecting the cause of her brother's absence she went home, got the skin, and personated a seal success.—St. Nicholas.

A Conneticut dairyman tried warming the water for his cows to drink in winter and the increase of butter in ten days paid the expense of piping the

The improved mutton breeds of sheep can not be kept in the manner usual with common sheep. They demand good pasturage, liberal feeding and at-tention, but they pay well for the care bestowed. There is a great demand for superior mutton.

When vegetables are stored in cellars Oscar sat, not moving from the lump of ice, thinking of the terror of Hilda at his long absence. Still another hour went by, and the goiden glow on the ice outside began to turn gray, for the sun was below the hills that shelter Upby packing in barrels.

The problem in farming consists in making the soil fertile. Manure is considered the farmer's savings bank and if more of them would have large heaps of it every spring to spread upon their lands instead of money at interest, they would prosper better in the end.

Small losses are not always observable. A loss of one quart of milk per day at 5 cents per quart, 200 days, amounts to \$10 or more than the interest on the value of the cow. It should be the object of the dairyman to gain an aditional quart and keep up the flow

Geese do not receive as much atten-tion as they should on farms especially addapted to the rearing of water fowls. Besides yielding a regular income in may of feathers, they are one of the most profitable fowls for the market. Much easier raised than turkeys, they sell as readily in most seasons at as good profit.

Attend well to the sanitary condition of the cow. Give her pure air, pure water and pure feed, and keep her in a good, clean stable whenever it is neces-Our pet goldfinch, having escaped from his cage, flew into a tall ailanthus tree in the back yard. There he sat singing his sweetest and rejoicing in his unexpected freedom. We brought out his gilded cage and set it on the top of a tall step ladder, leaving the door open, and just inside a cup of tempting to look at it, though he often fixed his bright little eyes on us when we called him, and answered us with a cheery, defiant "Witzah!" We had almost given up hope of ever getting him back, when up hope of ever getting him back, when it occurred to us to ring his breakfast at regular hours each day.

## A Healthy Location

City Man (looking for a home in the suburbs)-"I like this place very much, but I am told it isn't healthy."

Agent-" Ain't healthy? D'ye see that mule over in that field? That mule hez liven here all his life, an' it in't a week since he kicked a locon odive off th' track."-New York Weekly.

Channey Depew says: "I lately got a letter praising my speeches and saying: 'So much have they impressed me that I have but one grand wish. I wish to listen to the speech you-Here I reached the end of the page On turning the sheet over 1 read the rest: 'would make r'ter a dinner in sour railway restaurant at l'oughkeepsie."

An experienced florist savs: "Were I restricted in my gradening operations to the use of four species of plants, then, without hesitation, I should choose hardy roses, lilies rhododendram and elematis. Lilies I should give the second place in importance, roses the first, but if I consider results in proportion to labor and expense, then lilies should have the first place. And in every garden these four plants should predominate and should be relied upon for grand effects.

## His I atest Opns,

Musical Editor (meeting composer)-Hello, Tewnes. I haven't seen you since you got married. Doing anything in our line?

Composer-Nothing much. Only a fittle-er-cradle song in A flat.-Chi-Tribune.

It's sometimes said patent medicines are for the ignorant. The doctors foster this

"The people," we're told, "are mostly ignorant when it comes to medical science."

Suppose they are! What a sick man needs is not knowledge, but a cure, and the medicine that cures is the medicine for the sick.

Dr. Pierce's Golden Medical Discovery cures the "do believes" and the "don't be-lieves." There's no hesitance

There was only one course. Oscar sprang into the icy water, and in three sprang into the icy water, and in three to six people in one day, and yet she wouldn't do!)

Choking, sneezing and every other form of catarrh in the head, is radically cured by Dr. Sage's Catarrh Remedy. Fifty cents. By druggists.
