The past week has been one of the most stormy known in this locality. On Friday it began to snow and blow and kept it up until Saturday morning. Saturday was quite pleasant, but during that night it began to storm again and kept it up for forty-eight hours. It did not get very cold so that little suffering or loss resulted. From the meagre reports obtainable it was much worse further east. No trains from the east on the F. E. & M. V. had reached Chadron up to Wednesday evening and no mail has been received here later than Saturday. Three trains have been stuck in the snow east of Chadron and the rotary snow plow was broken, hence the delay in opening the track. It has cleared up at present and the probabilities are that spring will be with us from now on. In the south and east part of the state a great deal of property and some lives were lost by a cyclone which passed over it the latter part of the week. But very little can be learned as to the extent of the storm or the amount of damage done. The people of northwest Nebraska have reason to be glad that they do not experience as severe storms as do the residents of the countries further east.
