danger of unwholesomeness is in the use of the Royal Baking Powder only. This powder is mentioned because of the insumerable reports in its favor by high medical authorities by the U.S. Government, and by the official chemists and Boards of Health, which leave no doubt as to its entire freedom from alum, lime and ammenia, its absolute purity and wholesomeness. While its use is thus a safeguard against the poisonous alum powders it is satisfactory at the same time to know that it taskes the whitest lightest, sweetest and most delicious food, which will keep moist and fresh longer, and that can be eaten with immunity hot or cold, stale or fresh, and also that owing to its greater strength it is more econemical than others. These facts should incline consumers to turn a deaf ear to all importanties to buy the inferior powders. If a grocer urges the sale of the cheap, impaire, alum brands, it should be borne in mind that it is because he can make more profit on them. The wise housekeeper will deeline in all cases to take them.

Attention has been called to the fact that the ratio of marriages is falling off from year to year. Not only is this true abroad, but in this country. New York especially has explored a strange truth revealed by statistics, and in New England the waning or Hymen's torch has been so manifest as to attract the attention of thinkers and provoke theories innumerable. Statistics compiled by the Examiner show a smillar condition of affairs in San Francisco. One More Lucky Letter.

There are people who are always searching for coincidences and placing great stress upon "lucky" and "unlucky" combinations of circumstances. To individuals so constituted the suggestion is offered by the Rochester Herald that the selection of Gresham to fill the distinguished position of Secretary of State adds another of the list of "lucky" men whose names begin with the letter This letter is not the most conspicuous in the alphabet, but it seems to be a good letter to have for a last initial. Sensible people, of course, reject all such theories as enending January 1, 1870: Population, tirely fanciful, yet considerable evithis case to convince the credulous. Let us consider how many of the

The navy has its Gherardi and the army will not forget Dr. Gatling's gun. Gott-schalk, the composer, and Gilmore, the band leader, may also be men-tioned, while Asa Gray and President Gilman deserve a high place among the scholars of the century. In Europe one name comes quickly to the mind, that of Gladstone. France contributes to the list Gambetta, Grevy, and Goblet.
